asleepness

asleepness Visual Timer PRO with Clock and Night Light

How to use

1. So start time to start timer.
2. The disk will disappear clockwise as time passes.
3. When the color is gone, the time is up, and the bell rings.

One click to stop the bell ringing

Ring volume adjustment: mute, low volume, high volume

Ring time adjustment: 3s, 30s

Caution: Don't rotate the button over 360° in one direction! It will cause damage to the timer.

A great time management tool
