Aspiron NB-OL011 Smart RGBCW Flood Lights

Product Information

The Smart RGBCW Flood Lights (Model: NB-OL011) are outdoor lights designed for various lighting options. The lights are made in China and comply with part 15 of the FCC Rules. They offer different color options including rainbow, red, green, blue, warm white, and various lighting effects such as breathing, flowing, and chasing. The lights can be controlled using the Cozylife App, which can be downloaded from the App Store or Google Play. The lights come with an adapter for secure connection and have undergone testing to comply with Class B digital device standards.

Product Usage Instructions

1. Ensure that the product is used outdoors only and avoid prolonged exposure to humid environments.
2. Do not immerse the product in water or any other liquids.
3. During installation, make sure that the screws are tightened securely.
4. Avoid installing the product in high-temperature environments.
5. Connect the adapter securely and ensure there are no looseness or poor contact.
6. Do not disassemble or assemble the lights by yourself.
7. To operate the lights:
 - Short press the button to cycle through different color and lighting options.
 - Long press the button for 5 seconds to enter pairing mode indicated by a flashing red light.
 - Double press the button to power off the lights.
8. To restore the lights to factory settings, either long press the button for over 5 seconds or turn on/off the lights over 3 times. The light will flash, indicating that the light strip has been set to the factory mode.
9. To query the MAC address, check the internet access on the computer, enter the network properties, and find the physical address (MAC).
10. For any further questions or troubleshooting, refer to the provided FAQs or consult an experienced radio/TV technician.

Software Installation

1. Sign up and sign in to the Cozylife App by downloading it from the App Store or Google Play.
2. Add the device to the app following the provided instructions.

Please read before installation.

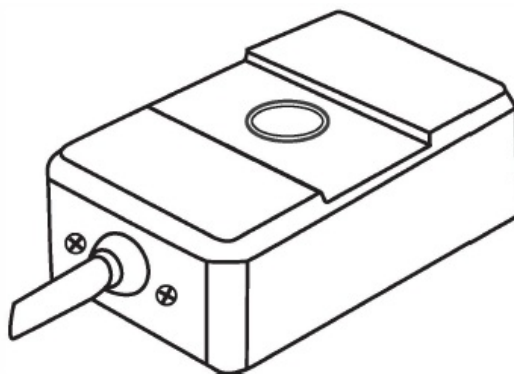

Please keep the manual for future reference.

SOFTWARE INSTALLATION

Sign up and sign in:

- Cozylife APP download: Scan the QR code below or search for “Cozy life” in App Store or Google Play, then register and log in after downloading.

Add the Device

- **Step 1:** You are using a Wi-Fi + Bluetooth dual mode product. Please make sure your phone's Bluetooth is turned on and connected to Wi-Fi (only supports 2.4G WiFi networks) . Also, ensure that the light is turned on and it is in the factory mode.
- **Step 2:** Open the “CozyLife” APP, the phone will automatically recognize the product, and a prompt box will pop up at the “+”, showing “Scan to 1 device”;
- **Step 3:** After clicking “+”, select the device to be connected, click Next, and you will enter the Wi-Fi setting page;
- **Step 4:** After entering the Wi-Fi password, wait for the network configuration to be completed (only 2.4G Wi-Fi network is supported);
- **Step 5:** After successful connection, you can reimport the product and classify the room.

FAQs

- **Q1:** How to restore the light to factory settings
 - **A1:** Long press button over 5s or turn on/off over 3 times, the light flashes, indicating that the light strip has been set to the factory mode.
- **Q2:** How to query the mac address
 - **A2:** Check the Internet access on the computer, enter the network properties, and pull down to find the physical address (mac).

FCC Statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference
2. This device must accept any interference received, including interference that may cause undesired operation

Caution: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy

and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment must be installed and operated in accordance with provided instructions and the antenna(s) used for this transmitter must be installed to provide a separation distance of at least 20 cm from all persons and must not be co-located or operating in conjunction with any other antenna or transmitter. End-users and installers must be provide with antenna installation instructions and transmitter operating conditions for satisfying RF exposure compliance.
