### Follow these simple setup options

Connecting with AT&T Smart Home Manager  
Troubleshooting and more info

### Before you get started

Here's what's in the box

AT&T All-Fi™ Hub

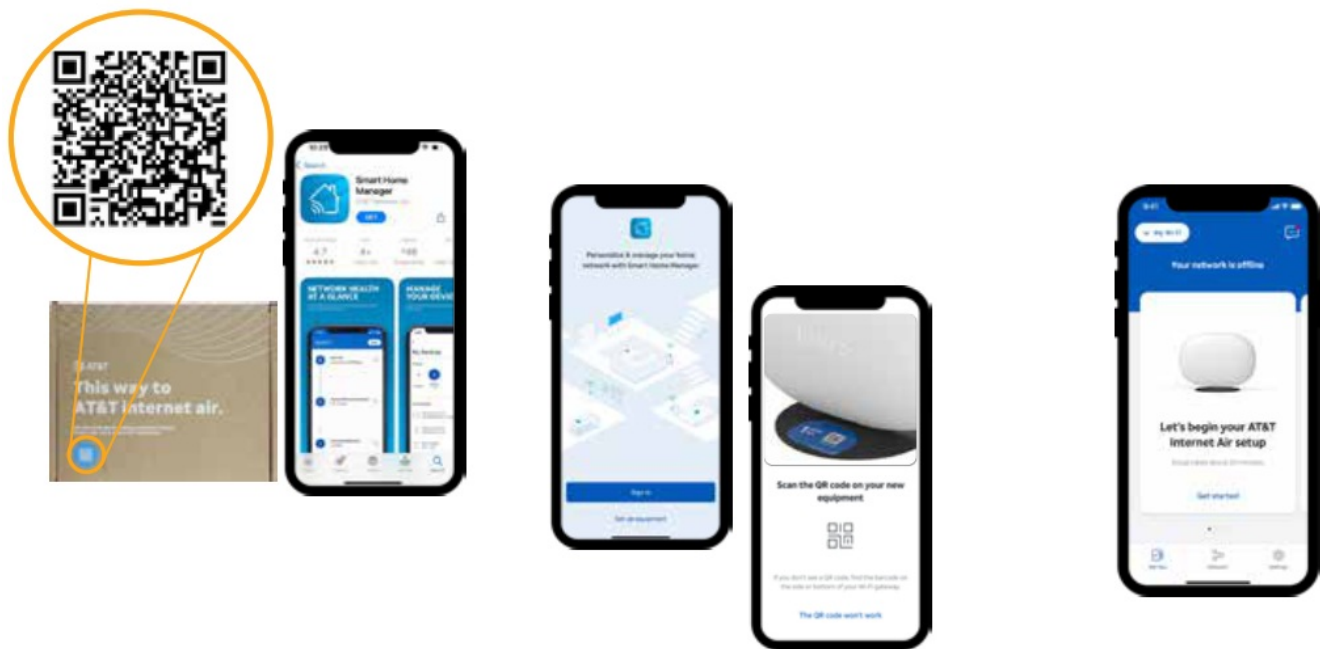

Power supply

Make sure you've registered for your service

[Register your AT&T Internet Air service](#)

Connect using the AT&T Smart Home Manager app

For quick download, open your smartphone camera and point it at the QR code on the box. After a few seconds, you'll get a notification with a link to open in your browser.

1. Download	2. Sign in	3. Set up & activate
Download the Smart Home Manager app from your app store or scan the QR code with your smartphone. You can also go to <a href="http://att.com/shm">att.com/shm</a> from your smartphone to download.	Open the Smart Home Manager app to begin. Either tap Sign in if you've registered your Internet Air service (see page 1) or Set up equipment and scan the QR code on the base of your All-Fi™ Hub when prompted.	On the Let's begin your Air setup screen, select Follow the guided setup and follow the guided setup for your All-Fi™ Hub. A confirmation screen will appear. Tap Done to go.

**Note:** AT&T Smart Home Manager is available to AT&T Internet service customers with a compatible AT&T gateway or hub.

Optimize your connection using the Smart Home Manager app

Direction of signal tower will vary.

Wi-Fi name and password will vary.

### 1. Place your All-Fi™ Hub

To find the direction of your closest signal tower, tap Help me find this direction.

### 2. Test signal quality

Plug in your All-Fi™ Hub and follow the prompts in the Smart Home Manager app to test signal strength at your chosen location. The All-Fi™

Hub display will help guide placement to make sure your signal is strong.

For more details, check the Troubleshooting section.

### 3. Connect your devices

To set up Wi-Fi on your devices, use the Wi-Fi network name and password displayed in the Smart Home Manager app.

## Troubleshooting

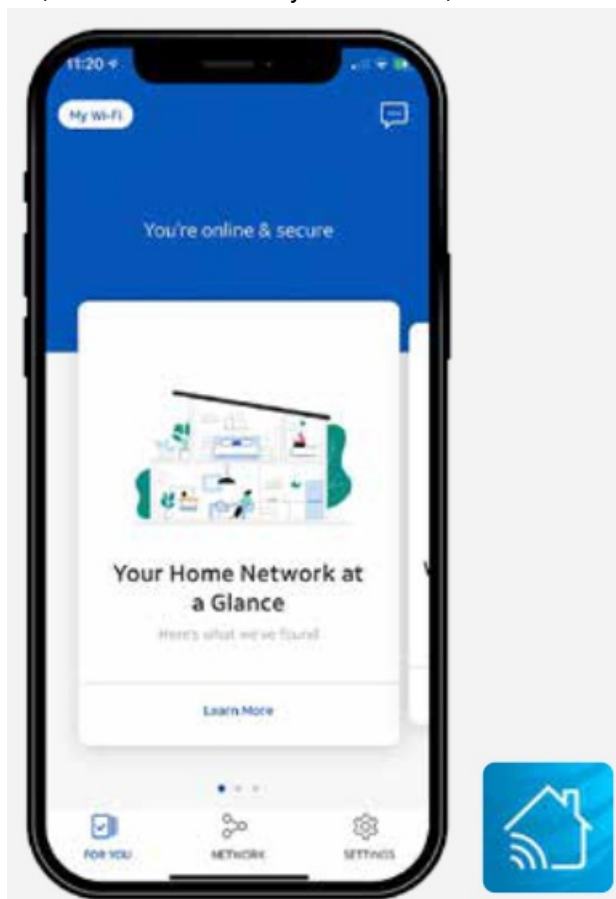

Signal status will appear on the All-Fi™ Hub display and in the Smart Home Manager app.

	<b>Green:</b> Signal strength is great. You're ready to start using your new AT&T Internet Air service.
	<b>Yellow:</b> Signal strength is good. Use the Smart Home Manager app to move the Hub to a different location to see if you can improve your signal strength.
	<b>Red:</b> Let's place your Hub again. Use the Smart Home Manager app to move the Hub to a different location to get a better signal.

## More info

### Smart Home Manager app

Manage your home Wi-Fi network, connect devices to your network, and more.

For step-by-step installation instructions, go to [att.com/AllFiHub-InternetAir](https://att.com/AllFiHub-InternetAir).

If you get stuck during setup, we're here to help you get up and running!

**Documents / Resources**

 A screenshot of the AT&T Smart Wi-Fi setup page. The header says "Setting up your AT&T Internet Air" and "Connect to your AT&T Internet Air". Below that, it says "Before you get started" and lists two steps: "1. Plug the Smart Wi-Fi extender into the power outlet" and "2. Plug the Smart Wi-Fi extender into the Ethernet port of your modem or router".	<p><a href="#">AT T 4920 Airties Smart Wi-Fi Extender</a> [pdf] Installation Guide</p> <p>4920 Airties Smart Wi-Fi Extender, 4920, Airties Smart Wi-Fi Extender, Wi-Fi Extender</p>
