EU Product Fiche

Type of model CS6692C

Energy Efficiency Index per cavity (EEI cavity) 81,4

Energy Efficiency Class per cavity A+

Energy consumption in fan-forced mode per cavity (electric final energy) (EC electric cavity) 0,7

Energy consumption during a cycle in conventional mode per cavity (electric final energy) (EC electric cavity) 0,96

Number of cavities 1

Volume per cavity (V) 73

Type of oven elektrisch

Mass of the appliance (M) 46,1

Energy saving tips

- During cooking, the oven door should remain closed except for turning food over. Do not open the door frequently during cooking to maintain the oven temperature and to save energy.
- If cooking time is more than 30 minutes, the oven may be switched off 5-10 minutes before the end of the cooking time to save energy. The residual heat will complete the cooking process.
- Plan oven use to avoid turning the oven off between cooking one item and the next to save energy and reduce the time for re-heating the oven.
- Wherever possible cook more than one item at a time.

* 1 kWh/cycle = 3,6 MJ/cycle

** "Data determined according to standard EN 60350-1 and Commission Regulations (EU) No 65/2014 and (EU) No 66/2014."
