How to take out or put back the wireless Bluetooth remote?

Take it out Pull up the top part of ATIJMTEKSelfie stick about 5 cm, then push the Bluetooth remote from bottom to top and take it out from the remote slot. Please refer to picture 1 and 2

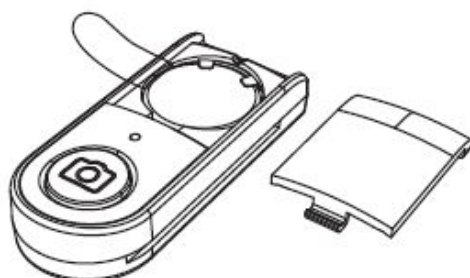

Put it back on: Pull out the top part of ATUMTEK selfie stick about 5 cm, then push the Bluetooth remote from top to bottom and place the remote back in the Remote slot as shown. Please refer to picture 1 and2

How to active the Bluetooth remote battery?

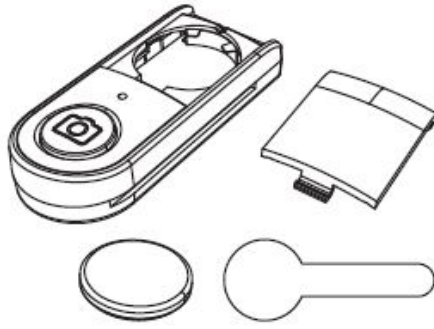

1. Taking out the wireless Bluetooth remote, hold it and push the battery cover from bottom to up about 1 mm to loose the battery cover;

2. Use your finger to lift the top part of the battery cover, and remove the cover.

3. Take out the Lithium cell from battery slot, then remove the plastic insulating strip and put the Lithium cell back.

4. Push the battery cover from top to bottom, lock the cover.

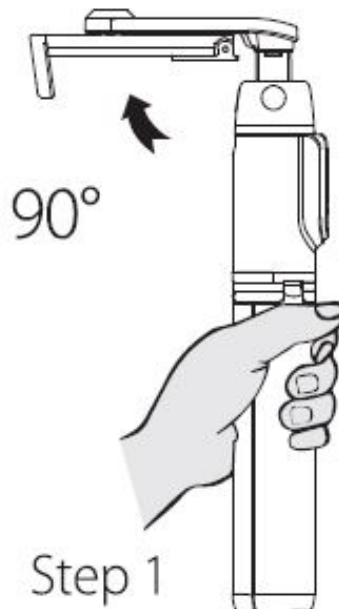

How to replace the Lithium Cell battery?

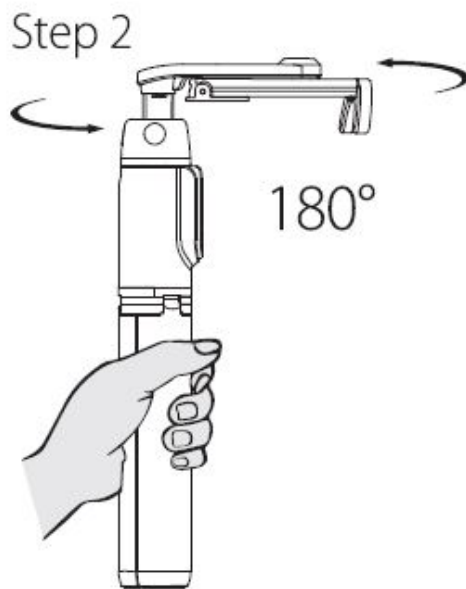

First please refer to the above step 1 & 2, then take out the Lithium battery, and put new battery in the slot; Finally lock the battery cover

How to use the selfie stick?

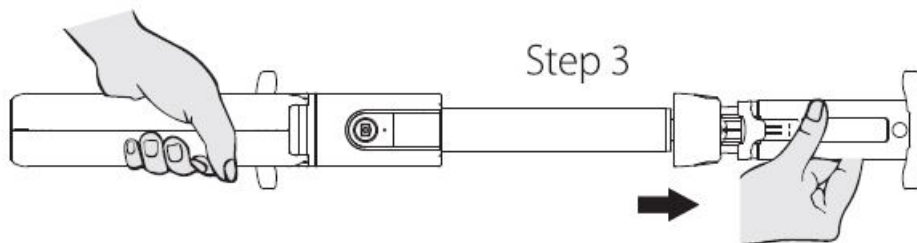

Step 1: Hold the bottom part of ATUMTEK selfie stick, rotate phone bracket upward till 90° to selfie stick. (From back side of the Product.)

Step 2: Horizontally rotate the phone bracket 180° to the front side of the product, now the phone bracket can be rotated 90° vertically.

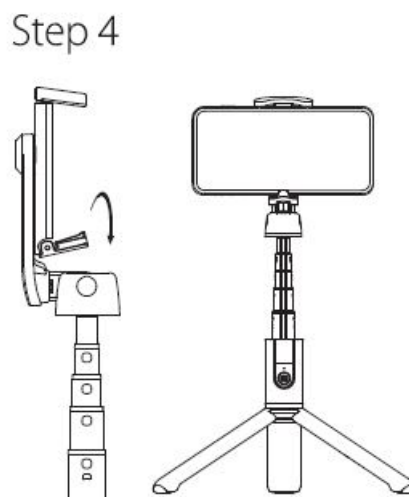

Step 3: Hold the bottom part of ATUMTEK selfie stick and use another hand to pull up the stick to your suitable length freely.

Note: Open all three of the tripod legs at the bottom manually to activate the tripod if you want to use the tripod. Put the tripod stand on fiat surface when you use it.

Step4: Pull up the foot cushion on the smartphone holder and widthwise set your phone inside the adjustable sliding bracket on the smartphone holder.

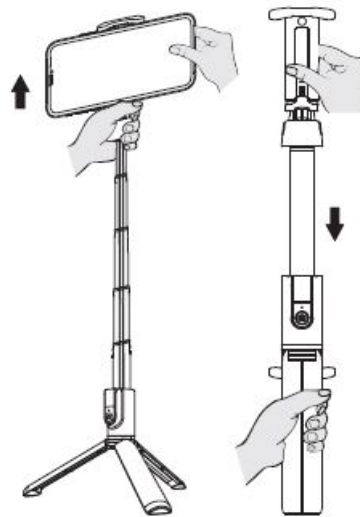

Note: please avoid sticking the buttons of your phone.

How to close?

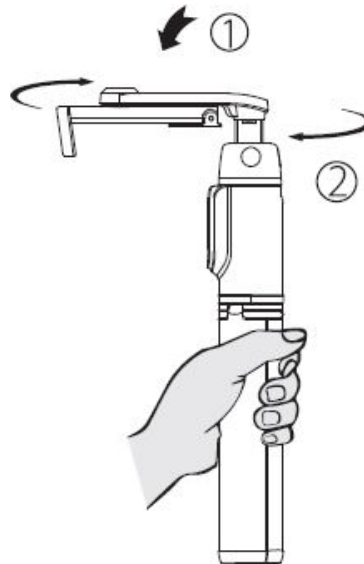

Step 1: Remove your mobile phone by releasing the adjustable sliding bracket. Then, hold the product middle position and use the otherhand to push the aluminum alloy telescopic arm back from the top.

Step 1

Note: If you open the tripod, putting back the tripod manually, the magnetic type tripod will close together.

Step 2: Rotate the phone holder 90° vertically, then 180° horizontally, ensure the phone bracket is on the back side of the product. Push down the phone holder near to the stick.

CAUTIONS:

1. Please use it in an ambient temperature between 10°C to 50°C.
2. Please do not continuously rotate the smartphone holder in high frequency.
3. Please do not continuously and frequently pull the aluminum alloy telescopic arm up and down.
4. Push out on all three of the tripod legs attached to the stem at the button to activate the tripod.
