Overview

You can start a passwordless or MFA web service for your users!

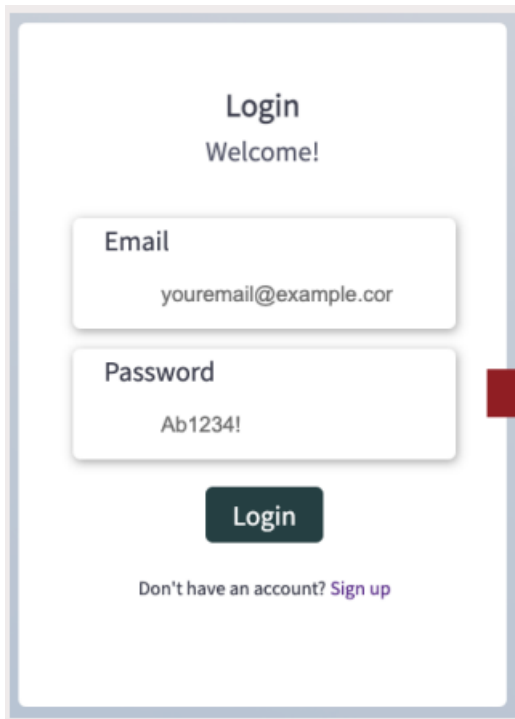

AuthFi Overview

Achieve Passwordless/MFA

ID/Password

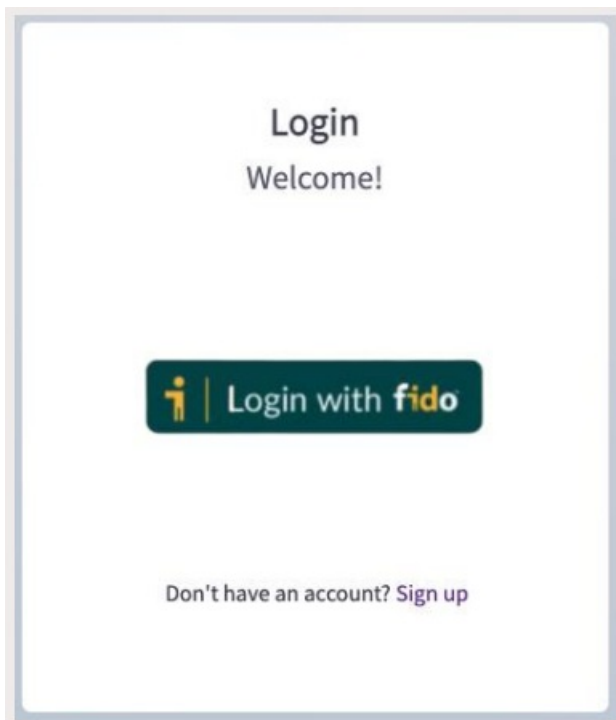

- Inconvenient
- Insecurity
- Take effort to deal with

The image shows a login form with a light blue border. At the top, it says "Login" and "Welcome!". Below this are two input fields: "Email" with the placeholder text "youremail@example.cor" and "Password" with the placeholder text "Ab1234!". To the right of the password field is a small red square. Below the input fields is a dark green "Login" button. At the bottom, it says "Don't have an account? Sign up" with "Sign up" in purple.

Passwordless/MFA

- Convenient
- Security
- Easy to management

The image shows a passwordless login form with a light blue border. At the top, it says "Login" and "Welcome!". Below this is a dark green button with a yellow FIDO icon and the text "Login with fido". At the bottom, it says "Don't have an account? Sign up" with "Sign up" in purple.

Set up your AuthFi to start the passwordless

You can start with an ATKey or download APP as authenticator later.

Phrases to start your passwordless journey

Start the journey of AuthFi with desktop or laptop will have better experience.

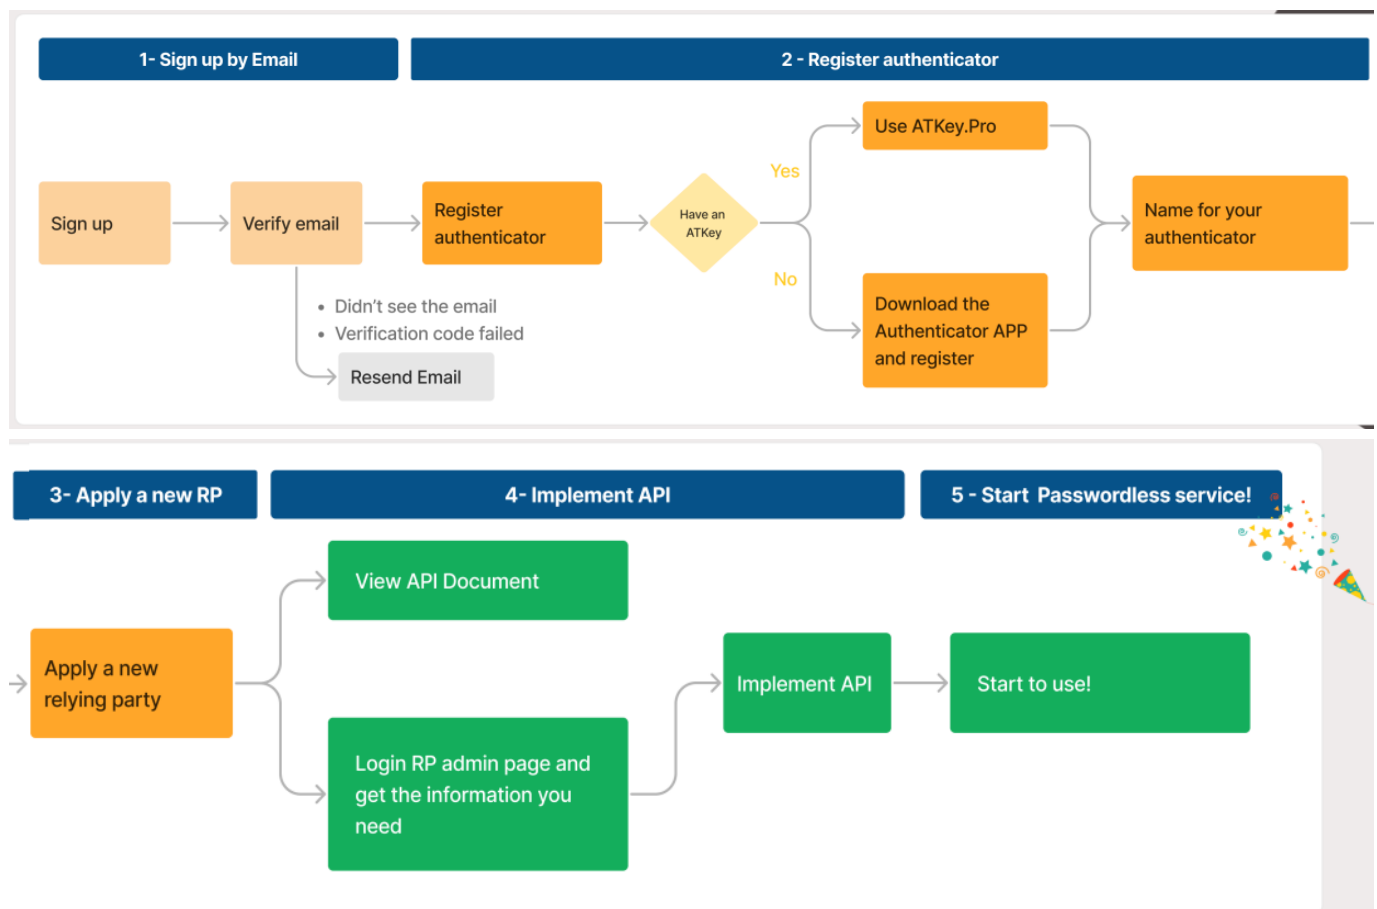

Sign up for the free trial at AT.AuthFi : <https://authfi.authentrend.com/>

Detail steps in the following pages ->

You can contact us for customize plan after free trial.

Steps to start your passwordless journey

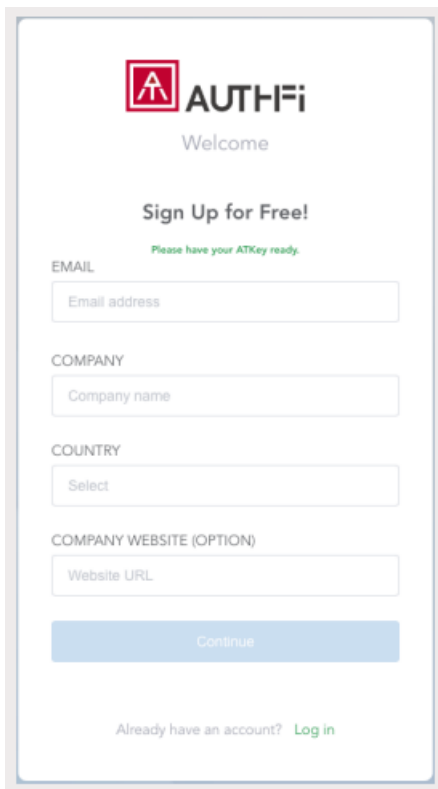

Don't forget to contact us for active after your free trial!

In the following pages, we will help you set up step by step.

Sign up by Email

1. Sign up

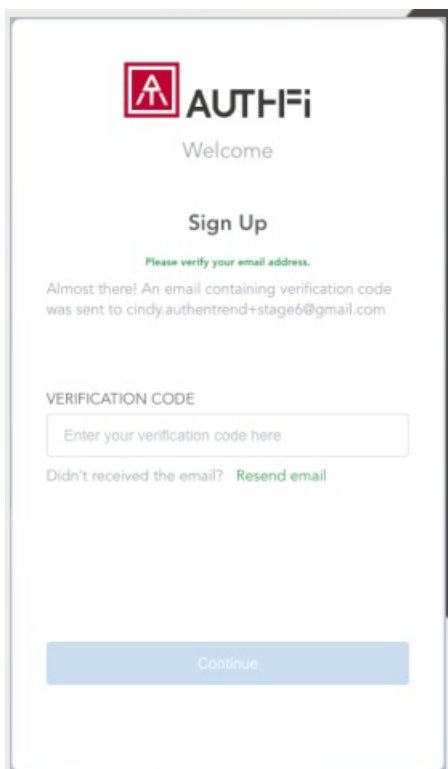

The image shows a web form for AUTHFi. At the top is the AUTHFi logo and the word 'Welcome'. Below this is the heading 'Sign Up for Free!' followed by a green note: 'Please have your ATKey ready.' The form contains four input fields: 'EMAIL' (with placeholder 'Email address'), 'COMPANY' (with placeholder 'Company name'), 'COUNTRY' (with a 'Select' dropdown), and 'COMPANY WEBSITE (OPTION)' (with placeholder 'Website URL'). A blue 'Continue' button is at the bottom. At the very bottom, there is a link: 'Already have an account? [Log in](#)'.

2. Verify email

If you can't find the verification email, please check your spam or advertisement mail.

If you still can't get the verification code, please contact us with email : customer.support@authentrend.com

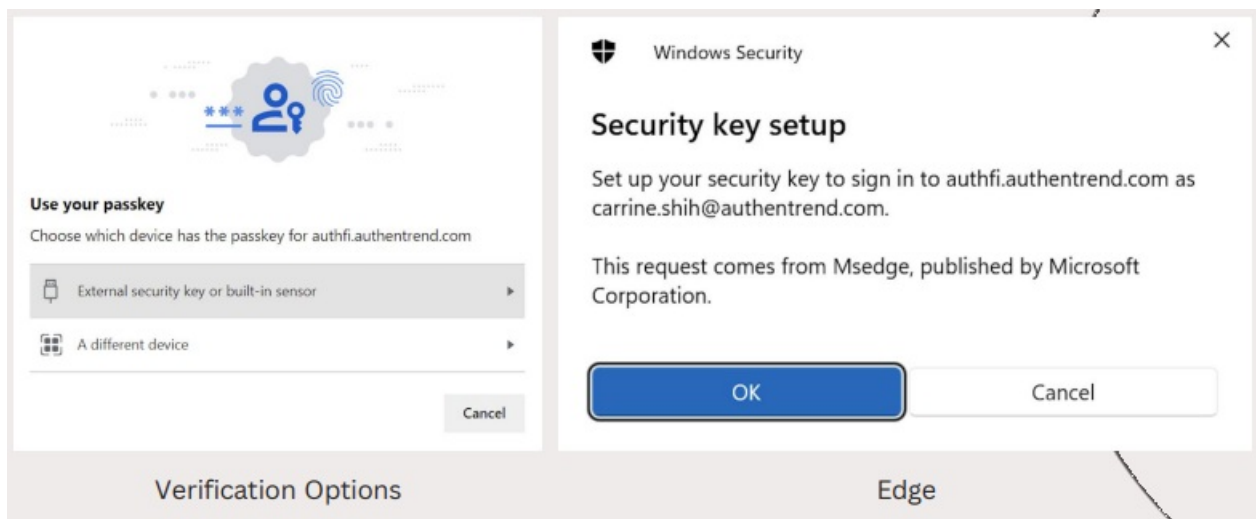

We will help you to start the trial.

The image shows a web form for AUTHFi. At the top is the AUTHFi logo and the word 'Welcome'. Below this is the heading 'Sign Up' followed by a green note: 'Please verify your email address.' Below this is a message: 'Almost there! An email containing verification code was sent to cindy.authentrend+stage6@gmail.com'. The form contains one input field: 'VERIFICATION CODE' (with placeholder 'Enter your verification code here'). Below this is a link: 'Didn't received the email? [Resend email](#)'. A blue 'Continue' button is at the bottom.

Register authenticator – [ATKey.Pro](#)

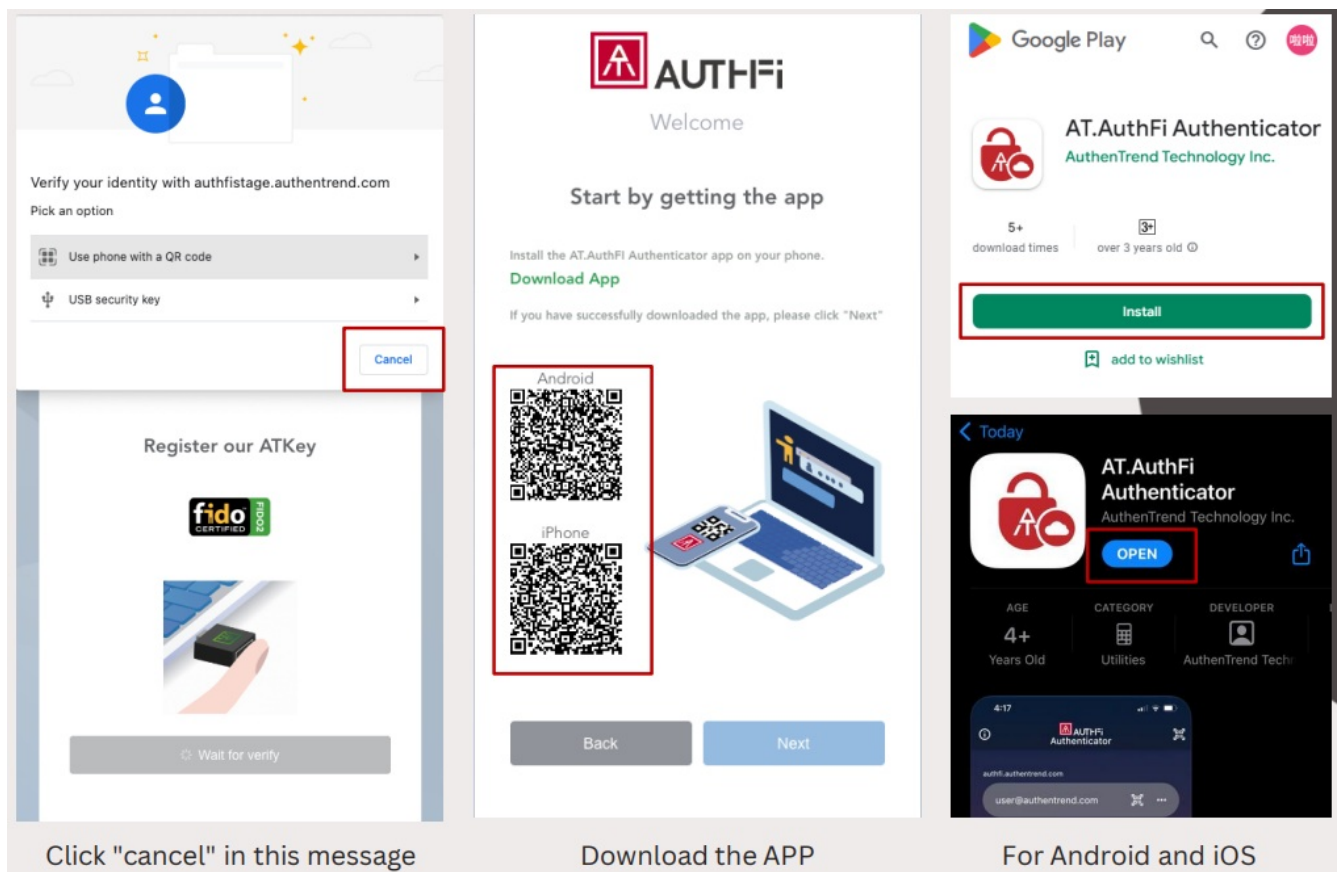

3. 3A Choose “USB security key” and register authenticator by ATKey.Pro.

* If you don't have an ATKey, you can Buy an ATKey on [Amazon](#). Or read the next page.

Register authenticator – APP

3B If you don't have an ATKey, click "cancel" then download the APP and follow the steps to register the authenticator.

iOS

Android

1. Click “Next” on the AuthFi.
2. Open the Authenticator APP, and click the QR code icon in the APP to scan the QR code on the AuthFi.
3. Register your mobile device as an authenticator.

**AUTHFi**
Welcome

Start by getting the app

Install the AT.AuthFi Authenticator app on your phone.
[Download App](#)

If you have successfully downloaded the app, please click "Next"

Android

iPhone

Back

Next

1.After download the APP then click next

6:45

**AUTHFi**
Welcome

Scan QR code to set up

Use the Authenticator app to scan the QR code and connect the app with your account.

Back

2.Click the scan icon in APP and scan the QR code on AuthFi

Click "Register" button to verify your biometrics (facial, fingerprint) to be an authenticator to login AT.AuthFi (FIDO cloud).

Please make sure your Phone with Biometrics (facial, fingerprint) enabled.

AuthFi APIs

v1.1.0
Add Mobile Authenticator app relative API and error codes

v1.0.1
Fix FIDO2 verify api name typo

Introduction

Following describe how AuthFi API work. Request and response are implement by Relying Party to communicate with AuthFi server.

Overview

- You need a valid API Key to send requests to the API endpoints. You can get your key from the AuthFi dashboard.
- The AuthFi API will only respond to secured communication done over HTTPS.
- Response to every request is sent in JSON format. In case the API request results in an error, it is represented by an "code": error_code key in the JSON response.
- The request method (verb) determines the nature of action you intend to perform. A request made using the GET method implies that you want to fetch something from AuthFi, and POST implies you want to save something new to AuthFi.
- The API calls will respond with appropriate HTTP status codes for all requests. A 2XX indicates all went well, while 4XX or 5XX response codes indicate an error from the requesting client or our API servers respectively.
