Picture 1

Picture 2

Start to use your device

After the Bluetooth connection, the diagnostic software will be launched if your vehicle supports it. You can use all functions of the device, e.g. the standard 08D11 function, BMW diagnostics and other functions.

Standard
OBDII function

BMW
Diagnostics

Other
functions

Feedback

You can send feedback to us if you encounter any problems during use, fill in the feedback content and submit.

The screenshot shows a mobile app interface for a feedback form. At the top, there is a header bar with a back arrow, the title "Feedback", and a "Submit" button. Below the header, the form consists of several sections: 1. "(Require)Email" with a text input field. 2. "phone number" with a dropdown menu showing "+86" and a right arrow, followed by a text input field. 3. "(Require)Problem" with three radio button options: "Can't connect to device", "Communication error between equipment and vehicle ECU", and "Other problems". 4. "Problem Description" with a text area containing the placeholder text "Please fill in the problem description". At the bottom right of the text area, it shows "0/1000" characters.

Software upgrade and firmware upgrade

- 1.3910-APP software upgrade Delete the APP program directly, and then download the latest software again.
(View the latest software version: Open app-Setting-about us).
2. 3910-APP firmware upgrade
 1. Open app-Setting-Device settings-firmware upgrade-currently the latest version (no need to update).
 2. Open app-Setting-Device settings-firmware upgrade-current version and prompt for the latest version-Click the 'upgrade' menu button- Firmware upgrade is successful (Need to update)
