9. HDMI ARC output port
10. Toslink/Digital/optical output port
11. Analog audio output port

Box Contents

- 1 – HDMI Audio Extractor
- 1 – Power cable

Connection and Operation

Output Mode: EDID Management

2.0CH	For 2.0 (Stereo) Home Audio System or Bluetooth/Wireless Transmitter.
5.1CH	For 5.1 Surround Sound Home Audio System.
ADV	For more advanced audio format (e.g. 7.1 CH). If no sound in this mode, switch to 5.1CH or 2.0CH mode.
ARC	Enable to ARC function by Clicking the ARC button. The ARC indicator will light up and the Toslink port will start outputting the TV ARC audio. (Please make sure that you're using the ARC HDMI port on your TV.) The ARC function can be turned off by clicking the ARC button again. Once turned off, the HAX04 will not be able to process ARC signal.

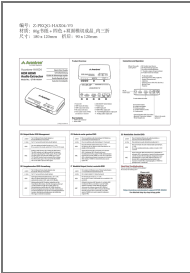

Need Help Troubleshooting:

How to connect/use HAX04 with Sound bar?

No sound, not working well?
