HOW TO CHARGE

- Please use a standard 5V charger to charge this device. Put the provided charging cable into the charging jack, connect the other end to the charger, the charging indicator will light up and will continue to stay lit as it charges.

IMPORTANT

- When playing music during charging, please put the volume to mid-level, because for some music with heavy bass, the charger may not afford the high current temporarily under the maximum volume.
- Charge time should be 3-4 hours. When charging full, the indicator light will switch off.

- For the first time usefully charge the device until the light indicator turns off. This can take up to approximately 8 hours to fully charge. If you don't, the device will not function at full capacity.

NOTE
When the speaker is not in use please turn off the device to conserve battery life. Make sure to turn down the volume when you turn off the device so you can maintain the speakers' (sub)woofer in good condition. This way you are less like to burn out or damage the device.

Prompt
When people sleep, they need a quiet environment. Please turn off the music or turn off the power while sleeping
