**ATTENTION:** With the key out of the ignition, disconnect the negative battery terminal before installing this product. Ensure that all installation connections, especially the air bag indicator lights, are plugged in before reconnecting the battery or cycling the ignition to test this product.

NOTE: Refer also to the instructions included with the aftermarket radio.

## CONNECTIONS: LD-XSVI-9006NAV

## INSTALLATION

**With the key in the off position:**

1. Connect the AXDI-VW2 harness into the interface, and then to the wiring harness in the vehicle.  
Note: The harness will connect to the harness removed from the disc drive located in the glove box for remote tuner applications.
2. If an AXSWC (sold separately) will be used, do not connect it until the interface is programmed and fully functional.

## PROGRAMMING

Attention! If the interface ever loses power, the following steps will need to be performed again. Please ensure that the owner of the vehicle knows this.

1. Turn the key (or push-to-start button) to the ignition position and wait until the radio comes on. Note: If the radio does not come on within 60 seconds, turn the key to the off position, disconnect the interface, check all connections, reconnect the interface, and then try again.
2. Turn the key (or push-to-start button) to the off position, then to the accessory position. Test all functions of the installation for proper operation, before reassembling the dash.
