Snowflake Projection Light User Guide

THANK YOU for purchasing our products. For offering you a better experience, please read the instruction carefully before using them. Any problems occur during use, please feel free to contact us, we will help you out within 24 hours.

⚠️ **Warnings:**

1. Please carefully check the completeness of the product to ensure that all product accessories have received good results before installation.
2. Please be careful with the barbed light nail holder during installation to avoid any accidental injury.
3. Pls, tighten the cap of the product connection line to avoid damage to the product caused by water.
4. The waterproof grade of this product is IP65, it can be used when it rains but cannot be directly immersed in water. And the Power Supply is waterproof IP44 so pls add a waterproof insulation box to cover it.
5. Please do not disassemble the product to avoid damage product.
6. Please do not modify the product during the warranty period.
7. If there is any problem with our product, please do not repair it without authorization, you can contact our customer service or professional staff to get help.
8. The working temperature will form a temperature difference at night/winter, causing water droplets on the lens which is a normal phenomenon. The water droplets will disappear after the temperature is constant, pls don't worry.
