BACtrack.

BACtrack BAA-DsF_1Z8 Mobile Breathalyzer for iPhone and Android Devices

Product Information

Specifications

- Product Name: BACtrack View
- Function: Remote alcohol monitoring system
- Features: Real-time, video-verified results, app-connected breathalyzer tests
- Key Users: Tester, Monitor, Accountability Partner
- Payment Options: Monthly payments by either Monitor or Tester

Product Usage Instructions

Getting Started

Before starting with the alcohol monitoring service, consider affordability and accuracy of the results.

Setting Up

Designate a Tester, a Monitor, and an Accountability Partner.

Testers will take breathalyzer tests as prompted by the Monitor via the app-connected device.

Testing Procedures

Testers will be randomly tested within a specified time period or on a schedule to prove sobriety. Results will be sent in real-time to designated parties.

Key Considerations

- Consider who will pay for the monitoring service.
- Understand the consequences of missed or positive tests.
- Determine the testing schedule that best ensures safety.

OVERVIEW

Remote alcohol monitoring provides a black-and-white measure of a parent's sobriety at any given moment in time.

BACtrack View prompts co-parents to take breathalyzer tests using an app-connected device. They are randomly tested within a specified time period, on a schedule, or both to prove they have not consumed alcohol. Designated parties will receive real-time, video-verified results of each test.

Terms to Know

- **Tester** – the parent whose BAC level you wish to track.
- **Monitor** – the main party reviewing the Tester's BAC results. This person sets testing schedules, can request on-demand tests, and receives BAC test results in real-time.
- **Accountability Partner** -a party reviewing the Tester's BAC results. This person receives BAC results in real-time but cannot set testing schedules or request on-demand tests.
- **Connection** – a Monitor or Accountability Partner.

Key Considerations

Before you get started with any alcohol monitoring service, there are key factors to consider.

- **Affordability**
Affordable alcohol monitoring -without hidden fees or long-term contracts – is far easier to maintain.
- **Accuracy**
How accurate are the results? Are they stamped with key information -such as test dates and times?
- **Method of proof**
As proof of identity: Does a service only capture still photos... or record a video of the tester actually testing?
- **Customization**
Is the scheduling flexible to adapt to complex parenting time schedules?
Can you set up scheduled AND random tests?
- **Ease of use**
Is the breathalyzer tiny and discreet enough to be used anywhere? Are notifications automated/real-time?

Questions to Ask

Who will pay for alcohol monitoring?

Either a Monitor or a Tester can submit monthly payments to BACtrack View, but not both.

What happens in the event of a missed or positive (non-compliant) test?

What are the consequences and procedures?

How often will BAC reports be submitted to court?

This will determine which plan you select.

Who will become the Monitor on the account?

Who else will receive results?

Will a co-parent or counsel become an Accountability Partner?

Which testing schedule will best ensure the child's safety?

For example: During visitation, a pickup, etc.

Which testing schedule will best demonstrate a parent's commitment to sobriety?

Will tests be scheduled, randomly-timed, or both?

Should the Tester be able to anticipate the exact time of a test or not?

How many tests will the Tester submit per month?

This will determine which plan you select.

Frequently Asked Questions (FAQ)

Q: Who will pay for alcohol monitoring?

A: Either a Monitor or a Tester can submit monthly payments to BACtrack View, but not both.

Q: What happens in the event of a missed or positive test?

A: Consequences and procedures will depend on the situation.

This may impact court submissions.

Q: How often are BAC reports submitted to court?

A: The frequency of court submissions will depend on the selected plan and testing schedule.
