Ballu BEF45 Remote Control

Product Information

Specifications

- **Model:** Remote Control AC Unit
- **Modes:** Boost, Comfort, ECO
- **Features:** Shutdown countdown, Temperature display, Ambient temperature sensor, Light-off button, Timer function
- **Compliance:** Part 15 of FCC Rules

Product Usage Instructions

• Power and Modes

To power on the unit, press the ON/OFF button. The unit has three modes: Boost mode for quick cooling/heating, Comfort mode for regular use, and ECO mode for energy-saving operation.

• Temperature Control

Adjust the target temperature using the temperature control buttons on the remote. The ambient temperature from the remote sensor is displayed for reference.

• Timer Function

You can set a timer for the unit to turn on or off automatically. Use this feature to schedule operations according to your preferences.

• Shutdown Countdown

Initiate a shutdown countdown to have the unit automatically turn off after a specified period. This can help save energy when the unit is not needed for an extended time.

• Compliance Notice

It is important not to make changes or modifications to the unit as it may void the user's authority to operate the equipment. The device complies with Part 15 of the FCC Rules for interference prevention.

Frequently Asked Questions

Q: How do I switch between modes?

A: You can switch between Boost, Comfort, and ECO modes using the respective buttons on the remote control.

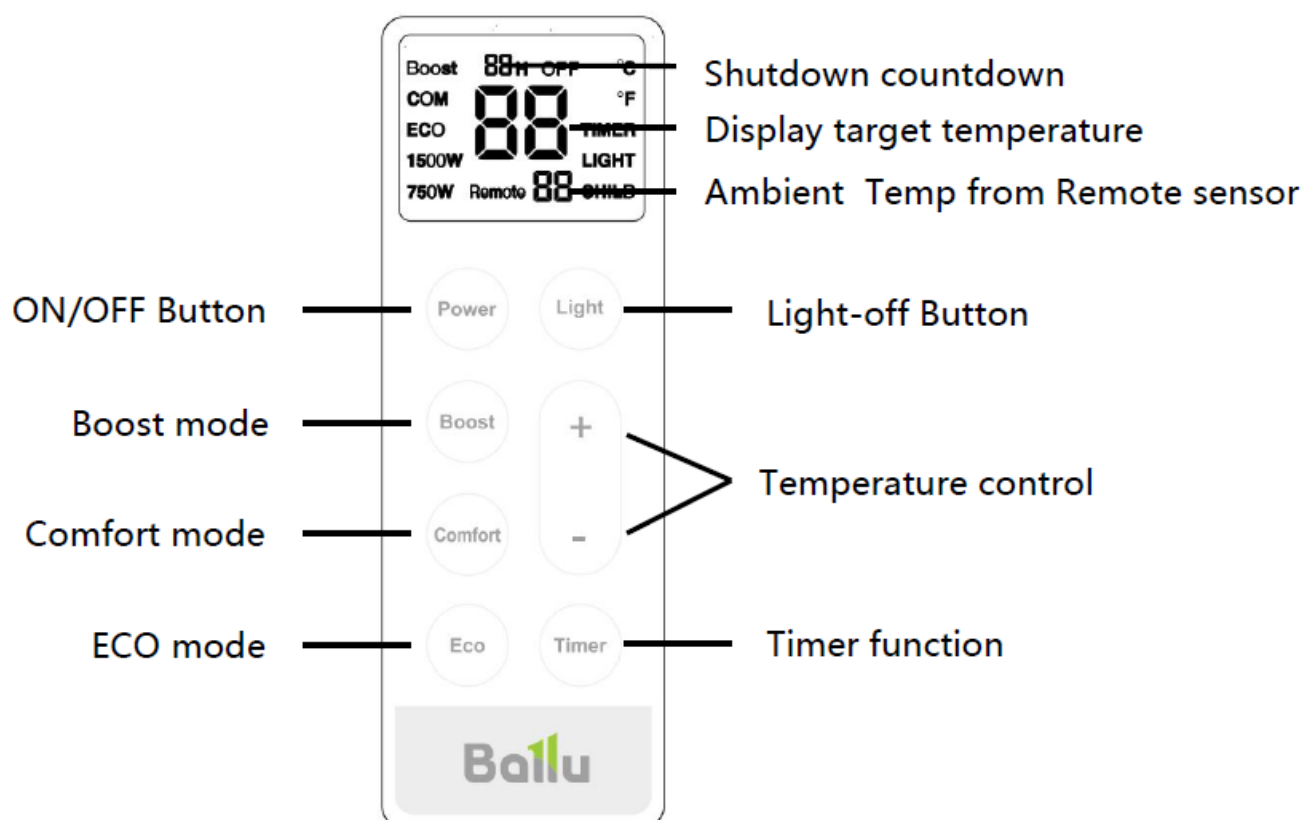

Q: Can I adjust the timer settings?

A: Yes, you can adjust the timer settings to schedule the automatic operation of the unit as per your requirements.

Q: What should I do if the ambient temperature display seems inaccurate?

A: Ensure that the remote sensor is placed in an area with representative ambient conditions for accurate temperature readings.

Overview

Warning:

Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

FCC STATEMENT

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

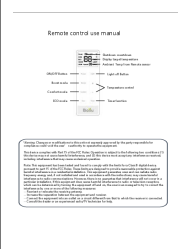

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

Note:

This equipment has been tested and found to comply with the limits for a Class B digital device, according to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used under the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
