Warning:
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

RF warning for Portable device:
The device has been evaluated to meet general RF exposure requirement. The device can be used in a portable exposure condition without restriction.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. this device must accept any interference received, including interference that may cause undesired operation.

FAQ

Q: How do I charge the T Detector?
A: The T Detector can be charged using the USB charging port located on the device. Simply connect it to a power source using a compatible USB cable.

Q: Can the T Detector be used in brightly lit environments?
A: For optimal performance, it is recommended to use the T Detector in low-light conditions or turn off room lights when scanning with the infrared lamps.

Q: What should I do if I encounter interference while using the T Detector?
A: If you experience interference during operation, try adjusting the positioning of the device or switch to a different scanning mode to minimize disruptions.
