Baseus BS-007Pro Editor Series Wireless Mouse

Please read the instructions carefully before using the product, and keep this manual properly.

Packing List

- Mouse X 1
- Charging cable X1
- Warranty card X 1
- Instruction Manual X 1

Product Specifications

- Name: Baseus Editor Series Wireless Mouse with Long Battery Life and Digital Display.
- Model: BS-007Pro
- Material: ABS+PC
- Dimensions: 121 mm X 65 mm X39 mm (error: 0.5 mm)
- Color: Starlight white, moon shadow gray, and photosynthetic green
- Weight: 80 g (\$1 g)
- Battery capacity: 800 mAh (lithium-ion battery)
- Interface type: Type-C
- Connection mode: Bluetooth+2.4G wireless connections
- Transmission distance: about 10 m
- Bluetooth version: Bluetooth 5.1
- Sensitivity: 800, 1200, 2000, 3000, and 4000
- Polling rate: 250 Hz for 2.4G mode, and 133 Hz for Bluetooth mode

Compatible systems

- 1.2.4G mode: Win7, Win8, Win10, Win11, Mac OS X10.4 or above, and iOS systems
- 2. Bluetooth mode: Win8.1, Win10, Win11, MacOS X10.4 or above, and iOS systems

Product Functions

1. Customizable shortcut button on the front: One-button screen lock, go back to home screen, screenshot, open My Computer, open the calculator, switch between windows, close customized programs, minimize windows, open the Run window, call out the Task Manager, and open customized files. This button is configured to go back to the home screen by default.
2. Customizable M button on the side: Select all, create, open, save, cut, copy, paste, undo, redo. This button is configured to perform the Save function by default.
3. Switch button in scroll wheel form: You can switch the damping modes of the wheel with one click, alternatively. This button defaults to the average speed mode. If you click this button, the mouse switches to the extreme speed mode. If you click this

button again, the mouse switches back to the average speed mode.

4. Side tilt scroll wheel: Slide the scroll wheel downward to turn the page left, and slide the scroll wheel upward to turn the page right.
5. DPI/Bluetooth pairing button: When you press and hold the Bluetooth pairing button for 2s, the Bluetooth icon on the OLED display will blink quickly, with an interval of 0.5s seconds. After the connection is established, the Bluetooth icon will remain on. You can switch among 5 levels of DPI in a cyclic pattern by clicking the button, including 800 (level 1), 1200 (level 2), 2000 (level 3), 3000 (level 4), and 4000 (level 5). (The cursor speed error is about 200 DPI.) The cursor defaults to 2000 DPI upon factory delivery.
6. Three-position toggle switch: It has 3 modes in total, include the 2.4G connection mode, Bluetooth connection mode, and shutdown mode.
7. OLED display: The OLED display can display real-time DPI (When switching DPI, it displays the latest DPI), remaining battery percentage (accurate to a single-digit percentage, and the charging sign during charging, connection status (2.4G or Bluetooth connection, etc. The OLED display is off when the mouse does not work for 110 seconds. You can press the button on the mouse to wake up the OLED display.

Instructions for Use

1. Installing the driver on the Windows computer
2. When you use the mouse for the first time, press and hold the left and right buttons for 3 seconds simultaneously. The computer automatically opens the driver download page.
3. Select the software for the Windows system to download, and complete the installation.
4. Enter the configuration page on the computer. Customize the button functions and set parameters such as DPI.

Installing the driver on the Mac computer

Open the browser on the computer, and enter the official website of Baseus APP (link.baseus.cn), open the software download page, select the software for the Mac system to download. The system redirects to the APP Store. Install and open the driver software. **Note:** Some functions, such as shortcut button settings, require authorization

permissions.

2.4G Connection

1. Take out the bottom USB receiver and insert it into the USB port on the computer.
2. Toggle the switch at the bottom of the mouse to 2.4G connection mode.
3. Click and move the mouse until the cursor appears on the screen.

Bluetooth Connection

When you use the mouse for the first time, toggle the switch at the bottom of the mouse to switch to the Bluetooth connection mode. At this time, the Bluetooth icon blinks quickly on the OLED display and the mouse enter the pairing state.

1. Turn on Bluetooth for pairing. Select the “Baseus Editor Pro” model. Click Connect.
Once the Bluetooth icon on the OLED display is always on, it is ready for use.
2. If you need to disconnect the existing connection and set up a connection with another PC device, press and hold the bottom
3. DPI button for 2s. At this time, the Bluetooth icon blinks quickly on the OLED display, and the mouse re-enters the pairing state.
4. Turn on Bluetooth for pairing. Select the “Baseus Editor Pro” model. Click Connect.
Once the Bluetooth icon on the OLED display is always on, it is ready for use.

Precautions

The product contains batteries. Therefore, keep the product away from fire sources. Please do not store the product in environments with high temperatures, strong light, or strong magnetic fields. Please do not disassemble and repair the product without authorization. If you encounter any problems, please contact Baseus’s after-sales customer service personnel. It is recommended to use a charger marked with “output voltage at 5 V, output current at 1 A and above” for charging. Please keep the product away from heat sources (such as heaters) while charging. If the battery is used improperly, it may cause leakage or explosion, or other hazards, resulting in personal injury or fire. Do not expose the product to moisture, high temperature, strong light, or strong magnetic fields, and avoid contact with conductive materials or liquids.

Common Issues and Troubleshooting Methods

Fault Symptom	Possible Causes	Solution
The OLED display does not light up.	The OLED display enters the sleep state.	Press the button to wake up the OLED display.
The mouse cannot connect to the computer through Bluetooth.	1. The toggle switch is not toggLED to the Bluetooth mode.	1. Check whether the toggle switch is toggLED to the Bluetooth mode.
	2. You did not press and hold the Bluetooth pairing button, and Bluetooth did not broadcast.	2. Press and hold the Bluetooth pairing button for more than 2s and ensure that the Bluetooth icon blinks on the OLED display.
	3. The Bluetooth driver of the computer is faulty.	3. Update the Bluetooth driver on the computer.

The USB receiver is unresponsive.	1. The receiver and mouse have not been paired.	Toggle the toggle switch to the 2.4G mode. Press and hold the DPI button for more than 2s. When the 2.4G icon blinks on the OLED display, insert the receiver into the A port of the computer until the 2.4G icon is always on. At this time, the mouse is ready for use.
	2. The receiver is loose and is not inserted in place.	2. Re-plug the receiver.
When installing driver software on Mac computer, it prompts that there is a malicious program.	Because of Mac computer's security mechanism, only software downloaded from the App Store and approved developers can be downloaded by default. Sometimes, the downloaded software is safe but is not issued from the above two channels. Therefore, the installation will be refused.	1. Open the System Preferences page and enter Security & Privacy.
		2. Click Open Anyway, and click Open in the pop-up dialog box to install the software normally.
The cursor has a lag or delay.	The mouse is affected by external source of interference.	Keep the mouse away from the source of interference, toggle the toggle switch to OFF mode, and then toggle it back to the original mode.

The cursor is frozen.	1. The mouse is out of power.	1. Charge the mouse before it is out of power.
	2. The receiver is loose.	2. Re-plug the charger.
	3. The mouse is subject to strong external interference.	3. Keep the mouse away from the source of interference, toggle the toggle switch to OFF mode, and then toggle it back.
The customizable button is unresponsive.	1. The button settings are incorrect.	1. Check the shortcut button settings in the APP.
	2. The mouse does not support the APP or device system.	2. Check the list of compatible devices of the product.

■ This symbol indicates that this product shall not be treated as household waste. Instead, it shall be handed over to the applicable collection point for the recycling of electrical and electronic equipment. Follow local rules and never dispose of the product with normal household waste.

Declaration of Conformity

Shenzhen Baseus Technology Co., Ltd. declares that the product complies with Directive 2014/53/EU. The full text of the EU declaration of conformity is available at the following internet address: <https://eu.baseus.com/pages/euro-compliance>

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This device complies with Part 15 of the FCC Rules. Operation is subject to

The following two conditions

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, under Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, and if not installed and used by the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
