Product Information

The Baseus Creator Wireless Mouse is a wireless mouse that comes with a left button, right button, scroll wheel, DPI button, DPI of 1600DPI, ON/OFF button, indicator, and USB receiver. The transfer distance of the mouse is 20m and it operates on 2.4G mode. The mouse sensitivity ranges from 800 to 1600DPI and has a response frequency of 250Hz. The mouse is compatible with various systems such as Windows, HarmonyOS, Apple OS, Linux, Vista, etc.

Product Usage Instructions

Before using the Baseus Creator Wireless Mouse, thoroughly read the user manual provided with the product. To connect the mouse to your device, first, install the batteries inside the mouse (make sure that the polarities are connected properly) and switch on the mouse. Take out the USB receiver from the back of the mouse and connect it to

your device. Switch to 2.4G connection mode and click and move the mouse until the cursor shows up on the screen. To change the sensitivity of the mouse (DPI), press the DPI button. Note that 1600DPI is the default

mouse sensitivity. Avoid exposing the product to high temperatures or fire sources and do not immerse it in water. Consumers should be held liable for any malfunction or damage caused by water ingress.

FCC Requirement

Any changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.
This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help
