baseus Metal Gleam Series 6 in 1 Multifunctional Type C HUB Docking Station

Product introduction

Product introduction

This product is a high-performance multifunctional docking station that provides high-definition display expansion functions for MacBook and other Type-C interface computers, which greatly improves work efficiency. It also provides expansion interfaces for USB 3.0, RJ45, and PD. The stylish and low-key design makes the desktop more tidy and beautiful, allowing you to enjoy a visual feast while working.

Product Accessories

- list HUB 1PCS
- User manual 1PCS
- Warranty card 1PCS

Product specifications

1. Suitable for mainstream Type-C notebooks such as MacBook Pro 2016/2017/2018/2019/2020, MacBook Air 2018/2019/2020
2. The USBport supports a maximum transmission rate of 5Gbps and is downward compatible with USB and USB
3. Hot-swappable, plug-and-play, easy to use
4. HDMI audio and video output up to 4K @ 30Hz
5. Supports 10M/100M/1000M adaptive Ethernet interface (without driver)
6. System Support: Mac OS X Yosemite, Mac OS El Capitan, Windows 10, and other operating systems.
7. Working voltage: 5V-20V

8. Quiescent current: < 400mA (local power consumption)
9. Working current: 400-2550mA
10. USB PD input support: 5V/9V/14.5V/20V ⚡5A (Max.)
11. Product size: 115.5mm*44.5mm*16.5mm
12. Product weight: 78.5\$5g

Appearance and interface

Appearance and interface As shown

No.	Name	Description
1	USB 3.0 interface	Used for connecting USB devices such as USB flash drives and hard disks
2	USB 3.0 interface	Used for connecting USB devices such as USB flash drives and hard disks
3	USB 3.0 interface	Used for connecting USB devices such as USB flash drives and hard disks
4	PD interface	Used for connecting Type-C chargers that support the USB PD protocol, supports up to 100W input
5	HDMI interface	Used for connecting to HDMI high-definition displays, supports up to 4K @ 30Hz
6	RJ45 Gigabit Ethernet port	Used for connecting the laptop to high-speed wired networks
7	Type-C male port	Type-C interface for computer connection

Feature instructions

1. U disk instructions Connect this product to the Type-C female socket of the computer, and then insert the USB flash drive or SD card. At this time, the computer will pop up the USB flash drive (support simultaneous reading). Click to enter, then you can copy, move, delete files, and perform other operations.=

2. Instructions for using a removable or solid state drive.

Connect this product to the Type-C female socket of the computer, and then insert the mobile hard disk or solid state hard disk. At this time, the computer will eject the drive letter of the mobile hard disk or the solid state hard disk. Click to enter, then you can copy, move, delete files, and perform other operations. Note 1: When connecting a hard disk or other device with high power consumption and it is not possible to connect properly, connect the charger to the Type-C socket of the product to charge the computer and hard disk.

3. Charging interface instructions

Connect this product to the Type-C socket of the computer, and then connect the Type-C charger of the computer to the Type-C socket. At this time, the computer will display the charging icon to represent that the computer is charging. Note 2: When plugging or unplugging the USB PD charger, the storage device will reconnect. Therefore, to avoid data loss when plugging and unplugging the USB PD charger, do not read or write data of the storage device. The storage device can be used normally after reconnecting.

4. Mouse, keyboard instructions

Connect this product to the Type-C socket of the computer, and then connect the mouse or keyboard to the USB 3.0 interface of this product to use the external mouse or keyboard.

5. Instructions for HDMI

Connect this product to the Type-C socket of the computer, and then connect the HD display to this product with HDMI audio and video cables. The system will automatically recognize the display and display the computer screen content synchronously. The display mode has a mirror display mode and an extended display mode. Set the display mode in the “Display” setting of Mac OS. For Windows system, go to the control panel and set it up in the “display” setting of the “system” option.

6. Network port instructions

Connect this product to the Type-C socket of the computer, connect the wired network to this product, insert the RJ45 network port plug into the RJ45 network port of the product, and plug and play on the Windows system computer; The setting steps are: System Preferences → Network → Click “+” to create a new service → select USB 10/100/1000 LAN → Create → Apply (If USB 10/100/1000 LAN turns into green now, it means successful connection.) At this time MacBook can access the Internet through the wired network.

Product precautions

1. Do not allow any object (such as flammables, needles) or any liquid (such as water, beverages) to fall into or infiltrate the product, which will result in the product not able to be used normally.
2. Do not use or place this product in the following places: humid environments (such as bathrooms, toilets); dusty environments, rotten objects.
3. When not using the device for a long time, put this product in a plastic box and store it to prevent dust from accumulating and the socket from oxidizing, which will cause poor socket contact.
4. When inserting and removing the PD adapter, the connected USB device will be quickly disconnected and reconnected within a few seconds to prevent data loss or damage. Please avoid disconnecting the PD adapter from the AC power during data transmission.
5. Because the current output of MacBook is about 1.2-1.5A, when multiple hard disks are connected and HDMI is used synchronously, when the load exceeds 1A, the computer will start the self-protection function. It will

prompt: USB power consumption is large. Disable and unplug the converter (and close the disable icon or restart). After reinserting, priority is given to the PD power supply.

- Do not repair or replace any part of the machine yourself (unless specifically instructed in this manual).

Please make repairs with your dealer or authorized agent. This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. this device may not cause harmful interference, and
 2. this device must accept any interference received, including interference that may cause undesired operation.
- Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

It is hereby declared that CAHUB-CWOG/WKWG000003, a product model of Shenzhen Times Innovation Technology Co., Ltd., complies with the provisions of Directive 2014/30/EU and Directive 2011/65/EU. The full text of the EC Declaration of Conformity can be found on the following website: www.baseus.com

This equipment complies with the provisions of Directive 2012/19/EU. It is strictly forbidden to dispose of this equipment with ordinary trash; it must be recycled.

This symbol indicates that the product shall not be treated as regular domestic trash, and must be delivered to a recycling center that is capable of recycling electronic and electrical equipment.
