FCC Caution

FC

Contains FCC ID:2ANDL-TYWE1S

Contains IC ID:23243-TYWE1S

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The distance between user and device should be no less than 20cm.

- If the appliance have the Wi-Fi function, the transmission power: less than 20dBm, and the radio frequency range is: 2412MHz – 2472MHz.
- The appliance is compliant with the RE Directive (2014/53/ EU).

Trouble Shooting

Description	Analysis of cause
Appliance can't be configured successfully	Please enable the permissions of Storage / Location / Camera / Wi-Fi / Bluetooth for this APP when installing. Otherwise it will have some problems when operating. Check the mobile connected WLAN router SSID and password is correct; Check whether there are additional settings of WLAN router as shown below. Firewall by router itself or by PC MAC address filtering Hidden SSID DHCP server Reboot WLAN router, mobile device and appliance (WLAN module) and connect appliance by CF or AP mode again. Before rebooting, check nobody has already connected to same appliance.
Mobile can't control appliance	When appliance (WLAN module) is rebooted and app displays device remove, ignoring this confirmation will lead to mobile device losing control permission of the appliance. You will need to connect the appliance by CF or AP mode again. In case of power failure, mobile device will lose control permission of appliance for 3 minutes after power failure. (Notification will now show up on the mobile device.) If you cannot control the app (appliance) even after power restored, you will need to connect the appliance by CF or AP mode again.
Mobile can't find appliance	App display appliance Device offline. Please check the following conditions. The appliance has been reconfigured. Appliance out of power. Router out of power. Appliance can't connect to router. Appliance can't connect to network through the router. Mobile device can't connect to network. After adding the device, it disappears in device list . Hold and slide down to refresh the device list. If it has no change, shut down the app and start again.
