Product Usage Instructions

- **Quick Fit Strap**

  The beatXP Nuke smartwatch is designed to fit your wrist perfectly. Ensure a snug fit for accurate Health
  Parameter Monitoring by wearing the watch a little tightly with the watch facing upwards.

Download and Connect to App
To access detailed records of your activities and health status, download the beatXP TRAK application and follow
these steps to connect your watch to your phone:

1. When you turn on the watch for the first time, a QR Code will be displayed. If you miss it, access the app list by
   pressing the crown button once. Scroll to the bottom and click on the QR Code option.
2. Use a QR Code scanner on your phone to scan the code. Fill in your details on our website and download the
   app to enjoy all the features of your beatXP Nuke smartwatch.

FAQ (Frequently Asked Questions)

- **How can I change the straps of my beatXP Nuke smartwatch?**

  To interchange straps, follow these steps:

  1. Locate the release buttons on the back of the watch.
  2. Press the release buttons simultaneously and slide out the current strap.
  3. Align the new strap with the pins on the watch and slide it in until you hear a click.

- **How do I charge my beatXP Nuke smartwatch?**

  To charge your smartwatch:

  1. Connect the charging dock to a power source using the provided cable.
  2. Place your smartwatch on the dock ensuring proper alignment with the charging pins.
  3. Allow the watch to charge fully before disconnecting it from the dock.

### Download & Connect with App
To get detailed records of your day-to-day activities and health status, you can download beatXP TRAK application. You can connect your watch to your phone in a few simple steps. Please follow the instructions given on the next page and enjoy all the features of your beatXP Nuke smartwatch.

Check out the following steps to download and install beatXP Smartwatch App to begin your fitness journey:

- When you turn the watch ON for first time, you will be presented with QR Code. If you miss it, go to the app list by pressing the crown button once. Then scroll to the bottom and click on the QR Code option.
- Use scanner on your phone to scan the QR Code and fill in your details on our website and download the app.
- Alternatively, you can download the beatXP TRAK app from Google Play Store (for Android devices) or Apple App Store (for iOS devices).

- Open the beatXP TRAK application and go to the device page. Click on Add Device card, allow permissions requested by the app and select your watch from the list to connect.
- Follow steps presented by the app to set up your watch completely. In case you still cannot use 'Calling', follow steps on the next page.

Connection with Bluetooth for Calling

Android Devices
Once your watch is connected to beatXP TRAK app correctly,

- Go to the phone's bluetooth settings and search for beatXP Nuke.
- Click on the watch name and connect it to Bluetooth. A pop-up will appear. Check the contact sharing and click on Pair.
- The watch should now be connected to your phone for calling.
- Make a call from your watch and talk seamlessly.

iOS Devices
Once your watch is connected to the beatXP TRAK app correctly,

- Go to the Settings page of your phone.
- Select and connect with beatXP Nuke.
- Click on Pair.
- Upon successful connection, the Bluetooth Calling function can be used.
- Make a call from your watch and talk seamlessly.
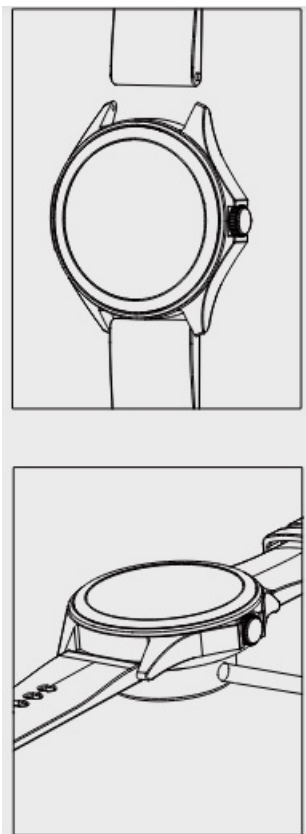

Tips to Boost the Performance

1. Please upgrade the beatXP TRAK application to the latest version from Google Play Store (for Android devices) or Apple App Store (for iOS devices).
2. **Recommended device system:**
   - for Android 4.4 or above
   - for iOS 9.0 or above

How to Interchange Strap
You can customize the strap of your smartwatch with any universal 20mm Strap. To detach the strap, pull the pin at the back. Similarly connect the new strap by pulling down the pin and fitting it.

Charging Instructions

- Turn the watch over, align and attach the charging pins to the magnet and gold pins. You will see the charging icon on your watch within 5 seconds. Fully charging the device can take up to 3 hours. The battery circle will become full when the watch is done charging.
- Please clean your watch before charging to avoid sweat or dirt corroding or damaging the gold pins.

Change Watch Faces

Long press the screen and the watch will go into edit mode. Swipe right or left to choose the adjacent watch face and click on any watch face to confirm. For customizing the watch faces or designing your own, go to the beatXP TRAK app and select a watch face from the watch face gallery and sync it with the watch. You can also design your watch face accordingly.

Sports Modes:

beatXP Nuke supports more than 100+ sports modes from Fitness, Leisure, Competition Classes, Dance Classes, Ball Games etc. including Running, Walking, Treadmill, Mountaineering, Cycling, Basketball, Zumba, Baseball etc. The watch only shows a partial number of these modes at a time to reduce clutter. You can customize the list according to your convenience. To customize the list from your watch, go to Sports → Customize → Add and then select the modes you want from various categories and click Save.

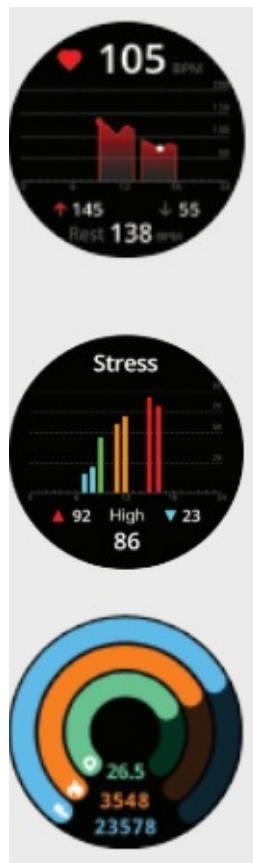

- **Heart Rate Monitoring:**

  Wear your watch properly, neither too tight nor too loose and go to the 'Heart Rate' application on your watch. The watch automatically starts measuring Heart Rate (The watch does not give a final reading as Heart Rate is dynamic and shows the current value in real- time).

- **Stress Monitoring:**

  After wearing the watch properly, open the 'Stress' application on it and measure the amount of psychological pressure you are feeling.

- **Activity Tracking:**

  Open the 'Activity Tracking' application on your watch to see how many steps your have moved, how many calories you have burnt and how much distance you have traveled today.

- **SpO2 Monitoring:**
  After wearing the watch properly, open the 'SpO2' application on your watch to measure your Blood Oxygen. Keep your watch facing upwards while measuring.
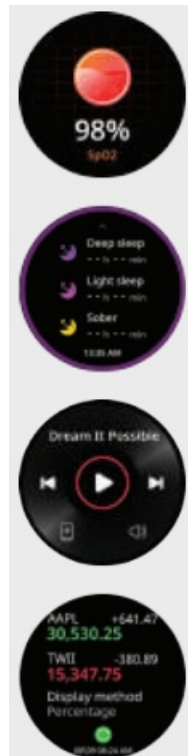

- **Sleep Tracking:**
  Wear your watch properly before going to sleep. The watch will record your sleep time and you can see the complete detailed data on the app after your nap.

- **Music Control:**
  You can control music playback of your phone directly from your watch without having to take your mobile phone out of your pocket.

- **Stock Market:**
  You can add stock prices in your watch from the beatXP TRAK mobile application and get real-time updates directly on your watch whenever you want.
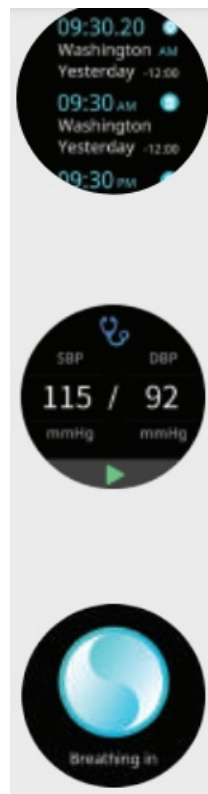

- **World Clock:**
  You can add multiple time zones in your watch from the beatXP TRAK mobile application.
- **Blood Pressure:** After wearing your watch properly, open the Blood Pressure application on the watch to measure the amount of blood pressure at that time.
- **Breathing Exercises:**
  In the menu bar, click on Breathing Exercise to exercise proper breathing. You can adjust the speed from the watch itself in the settings.

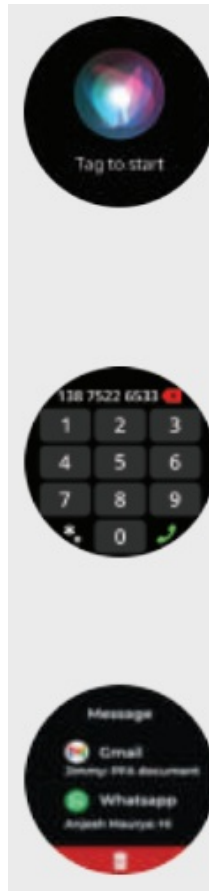

- **Voice Assistant:**
  You can talk to the AI assistant of your mobile phone directly from your watch (Please note that your phone's assistant should have the setting ON to work while your phone is locked for the best experience).
- **Calling**:

The beatXP Nuke smartwatch supports Bluetooth Calling. Connect your watch to the phone according to instructions provided earlier and go to the Phone application in your watch and dial whoever you want to talk to.

- **Notifications**:

The beatXP Nuke supports instant notifications. Turn ON the settings and permissions from your Phone app to receive the notifications directly on your watch.

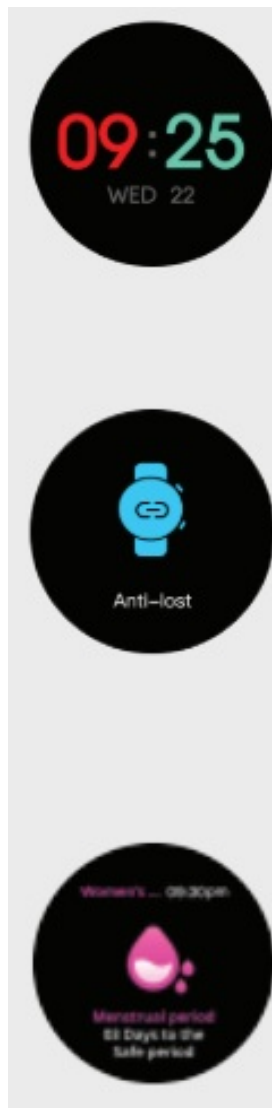

- **Always On Display:**

beatXP Nuke (1.32" Super AMOLED Display) is an AOD smartwatch and supports 2 AOD faces- (analog and digital). The two faces are always on and aesthetically look appealing, also saving more power compared to other watches.

- **Device Out of Range:**

Turn the 'Device Out of Range' reminder ON in your mobile application. Now, whenever your watch gets disconnected from the app, the watch will alert you.

- **Menstrual Health:**

You can track female menstrual cycle directly from your watch. Just record all settings in the app and the watch will provide updates directly.
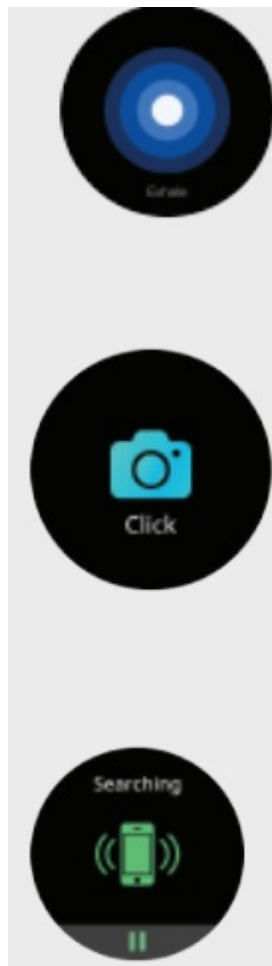

- **Breathe Rate:**

  Measure the current respiratory rate. (Values are for reference only and cannot be used on as medical basis).

- **Camera Shutter:**

  You can use your smartwatch as a shutter to take photos from your mobile phone. To use it, go to the beatXP TRAK app, Click on device and then choose Camera option to turn the camera ON. Then tap on the 'Click' icon showing on your smartwatch to take pictures.

- **Find My Phone:**

  When your watch is connected to mobile application, swipe up on the home screen and click on the Find My Phone icon or go to the app on the watch. Press Play to find your phone.
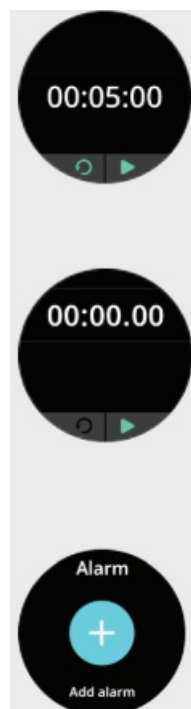

- **Timer:**

  You can also set yourself multiple targets with the timer application in the smartwatch to push your limits.

- **Stopwatch:**

  Your watch supports electronic timer count, hence you can record time taken during multiple activities.

- **Alarm:**

  You can set an alarm directly on your watch so that you never miss any important meeting or event.

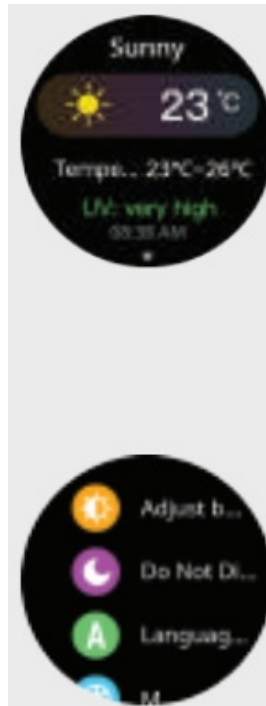

- **Weather:**
  - The watch also syncs with your mobile application to show the detailed weather of your location. Location can be updated in the application.

Settings:

You can customize multiple settings like Menu Modes, Always On Display, Power Settings, Brightness. etc directly from your watch through the Settings application.

- **Shortcut Menu:**

Just swipe down from home screen to reach the shortcut menu on your watch. Here you can find all of the important settings directly at your fingertips without having to open any application.

Troubleshooting

- **Continuous Heart Rate:**

The beatXP Nuke smartwatch supports 24X7 Heart Rate monitoring. Sometimes this may get disrupted and the graph shows a dotted line in the graph. Kindly ensure that you have worn the watch properly. Adjust it so that it is perfectly tight and in the right position. Also, please check if the Continuous Heart Rate monitoring Setting has been turned ON in the mobile application.

- **Other Issues:**

If you face any problems with Bluetooth Connection, please go to your device's settings and see if it shows beatXP Nuke in available devices. If already connected, remove the device and pair again. Also check if the watch is connected to the beatXP TRAK application.
