IMPORTANT NOTES

Before you start to assemble: Check the package and make sure you have all of the parts listed in the Parts List section of this user manual.

Do not install or use the product if any parts are missing or damaged. Store in a safe place until ready to install.

Make sure that you have plenty of space and a clean dry area suitable for the assembly of this trampoline.

IT IS ESSENTIAL THAT THE INTENDED SITE FOR THIS TRAMPOLINE IS COMPLETELY FLAT AND LEVEL.

If the ground is uneven, this could cause movement in the frame and stress on the joined sections of the frame that could damage the trampoline and/or can cause serious injury.

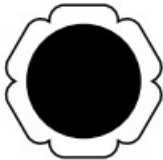

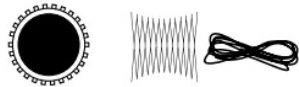

Never modify the construction or the design of the product.

Do not use any unauthorized parts with this trampoline.

This pack may contain small parts and is not suitable for children under six (6) years of age to be nearby during assembly.

IMPORTANT: Save this manual for future reference.

PARTS LIST

N o	Description	Part picture	Quantit y
1	Frame cover with skirt		1
2	Jump mat Safety net Tied rope		1
3	Suspension cords		30
4	Screws		30
5	Screw driver		1
6	Top rail		6
7	Lower encloser pole		
8	Upper encloser pole		6
9	Bottom pole with foam cover		6
10	Upper pole with foam cover		6
11	Leg tube lwXrivec nobubv		6

ASSEMBLY INSTRUCTIONS

Reference pictures for the instructions at pages 7-8

1. Begin by assembling 2 of the top rails together into an arc
2. Continue building a circle by adding the remaining 4 top rails to the arc you made in step 1.
3. Joining the 2 loose ends of the circle together may require you to stand the frame on edge and press downward on the 2 ends while connecting them together.
4. With the top rail frame connected into a circle, lay it flat on the floor (either side facing up they are identical). Then insert the tapered end of each of the 6 leg tubes into the 6 leg sockets that are facing up, as shown.
5. Align the screw hole in the leg with the hole in the leg socket. Then secure with screw and tighten. **DO NOT OVER TIGHTEN.** Repeat this until all 6 legs are securely attached to the top rail frame with screws.
6. After attaching all 6 of the legs securely to the top rail frame, turn the frame over so that the legs point downward, as shown.
7. To ensure that the enclosure mesh connectors will be properly aligned with the enclosure poles, hold up the mesh by one of the nylon patches with grommet and select the nylon loop sewn onto the jump mat that is

directly beneath the nylon patch you are holding. The patch at the top, the upper and lower hook & loop fasteners, and the nylon loop on the mat will all be along the same line (shown in white). This nylon loop (sewn to the mat) will be the first one you attach, and **MUST** be attached to the frame right next to one of the 6 enclosure pole sockets.

8. Lay out the jump mat in the center of the frame with the enclosure mesh facing up.
Then slide a suspension cord from left to right through the nylon loop you picked in step 7 as shown. (When securing the cords always position your left hand under, and right hand over, the frame.)
9. Use your right hand to stretch the loop's end of the cord **OVER** te top rail and your left hand to pull the "knob" end of the cord **UNDER** the top rail, then pass the knob through the loop.
10. **SLOWLY** release the loop end of the cord so that it captures the knob, locking the suspension cord in place, as shown. Use care when releasing the loop end around the knob, so that it does not slip off or pinch your fingers!
11. From the 1st attached cord, count around the jump mat to the 16th loop and repeat steps 1-3 attaching the 2nd cord directly across from the 1st.
12. Next, count back around the jump mat 8 loops and repeat steps 1-3 attaching the 3rd cord about half way between the 1st & 2nd cords.
13. Then, from the 3rd attached cord, count around the jump mat 16 loops and repeat steps 1-3 to attach the 4th cord. Numbers on the picture above show the approximate positions of the first 8 suspension cords. Continue connecting the remaining cords as shown in steps 1-3, but always connect a cord, and then switch to the opposite side of the trampoline to connect the next cord. Attaching the cords in this manner is important, as it will ensure even-tension around the entire jump mat. As you work, keep the enclosure mesh gathered to the center of the mat.
14. Lay the pad cover. Logo printed side up over the suspension cords. Carefully position each of the 6 openings in the pad cover over their corresponding enclosure pole sockets, as shown.
15. Carefully work the lower mesh skin (attached to the pad cover) down, around the entire perimeter of the trampoline, on the outside of the legs.
16. Align the grommet attached to the bottom of the lower mesh skirt with the hole near the base of the leg and secure with screw. **DO NOT OVER TIGHTEN.**
17. Repeat Step 9 with the remaining 5 grommets in the lower mesh skirt and their corresponding legs.
18. Insert the smaller diameter end of an upper enclosure pole into the larger diameter end of a lower enclosure pole and align screw holes. (You may need to slide the pre installed foam sleeves to gain access to the end of the poles).
19. Insert screw & tighten. **DO NOT OVERTIGHTEN!** Repeat steps 1&2 to assemble remaining 5 sets of upper & lower poles.
20. Insert the bottom end of enclosure pole assembly into the socket on frame, as shown. Align screw holes.
21. Insert screw & tighten. **DO NOT OVERTIGHTEN!** Repeat step 3 with the remaining 5 enclosure pole assemblies.
22. Locate the 6 nylon patches with grommets that are sewn onto the top edge of the mesh. Select a nylon patch that alligns with a pole. Carefully slip one of the patches over the top of the enclosure pole so that the grommet is alligned with the screw hole in the pole. Use care so that you do not tear the mesh.
23. Insert screw & tighten. **DO NOT OVER TIGHTEN!** Repeat step 5 with the remaining 5 patches and poles. When done properly, the enclosure mesh will be hanging on the **INSIDE** of the enclosure poles. The mesh should hang down somewhat straight and not "twist".
24. Locate the upper and lower sets of hook and loop fasteners sewn to the enclosure mesh. There are 6 upper

and 6 lower sets of hook & loop fasteners.

25. Tightly wrap both the upper & lower hook and loop fasteners around the enclosure pole foam to secure the mesh in place. Repeat this with the remaining upper and lower hook & loop fasteners on the other 5 enclosure poles.

SAFETY PRECAUTIONS

Warning:

- DO NOT attempt somersaults or flips. Paralysis or death can result if you land on your head or neck!
- No more than one person on the trampoline at a time. Multiple users increase the risk of injury.
- These instructions are important to minimize chances of injury. Please read them thoroughly before you assemble and use this trampoline.
- Maximum weight of the user shall NOT exceed 100lbs/45 kgs for this product. This product is intended for use by children between ages 3 to 6.
- Ensure space clearance between the trampoline and the environment.
Min. clearance 10ft/3m from ground to the top and 8ft/2,40m on all sides of the trampoline.
- Save this manual for future reference.

WARNING: Never leave the child unattended

SAFETY PRECAUTIONS

NO FLIPS!

ONLY ONE user at one time!

DO NOT USE IF INJURED!

Remove all hard and sharp objects before jumping!

DO NOT USE IF PREGNANT!

Daily inspection before use:

- Inspect legs for proper attachment or cracks.

- Inspect springs if loose or damaged.
- Inspect mat for tears or worn stitching.
- Inspect frame for sagging or cracks.

CLEANING & MAINTENANCE

A. Cleaning:

1. Clean the jumping mat and legs with soft wet cloth. Do not use aggressive cleaning detergents – alcohol or bleach – based ones, or such, containing abrasive particles.
2. Wipe dry afterwards.
3. Do not spray water or other liquids directly on the trampoline during cleaning. This way you will avoid the risk of damage of the trampoline due to rush on the metal parts and disturbance in the stability of the connections.

B. Maintenance and storage:

1. Carry out checks and maintenance of the main parts – frame, suspension system, mat, padding, and enclosure (safety net) at the beginning of each season and also at regular intervals. If these checks are not carried out, the trampoline could become dangerous.
2. You should:
 - check all nuts and bolts for tightness and tighten when required;
 - check that all spring-loaded (pit pin) joints are still intact and cannot become dislodged during play;
 - check all coverings and sharp edges and replace when required;
3. It is recommended to disassemble the trampoline and store it if the weather conditions are bad.
4. Try to avoid moving the assembled trampoline as it may bend during transportation. If relocation is required, at least 4 people, at a distance equal to one another, should lift the trampoline' frame. It must be carried horizontally.
5. In certain countries during winter period, the snow load and the very low temperature can damage the trampoline. It is recommended to remove the snow and store the mat and the safety net indoor.
6. Always before each use check that mat, padding, enclosure and soft surface are without defects.

NOTE: Sunlight, rain, snow and extreme temperatures reduce the strength of these parts over time.
7. Make sure all adhesive tapes/ belts/ buckles/ straps are properly fastened / tied before using the trampoline.
8. Protect the product from high humidity and high temperatures.
9. When you do not use the trampoline, store it away from children reach and pets.

Thank you for choosing BEBE STARS products
