BenQ Account Management System

Product Information: Account Management System

The Account Management System (AMS) is a software developed by BenQ that allows users to easily access and manage their files and personal device environment. It provides a convenient way for users to access and manage their accounts, as well as guarantees efficient account management for IT personnel.

Key Features:

- Instant access and management of personal data from any BenQ Interactive Flat Panel (IFP)
- Personalized user environment and instant access to cloud storage
- Efficient account management and simplified setup for IT administrators

Introduction

The Account Management System (AMS) allows users to easily access and manage their files and personal device environment from any BenQ IFP. It improves the efficiency and convenience of managing accounts on BenQ's IFPs.

AMS Web Management

Registering a new account

1. Go to the BenQ Service website: <https://ams.benq.com>. Recommended browsers are Chrome and Firefox.
2. If you are an administrator, click "Register BenQ Account" to register an Administrator account for the company.
If you are a regular user, ask your company's administrator to create a user account for you. After receiving the account, click "Log in directly" after verifying your email.
3. After registration, you will see a message. As an administrator, click "Continue".
4. Fill in the required fields and click "Submit" to create a new Administrator account.

Creating a new account

1. As the administrator, log in and choose IAM.
2. Click "Create New Account" to continue.
3. Fill in the required fields and click "Submit" to create a new account. Choose between the roles of coordinator or user. For more information about the differences between coordinator and user, refer to the "Management Authority" section on page 15.

Introduction

Account Management System (AMS): Instantly Access and Manage Personal Data from Any IFP

To make it more convenient for users to access and manage their files and personal device environment, BenQ releases Account Management System (AMS) to make it easier for users to access and manage files as well as accounts. Additionally, AMS also guarantees a more effortless way for IT personnel to manage accounts, improving the efficiency and convenience of managing accounts on BenQ's IFPs to a whole new level.

Personalized User Environment and Instant Access to Cloud Storage through AMS

Personalized Workspace Environment

As IFP are generally considered to be public devices that store data from many users, the data is often unorganized and difficult to locate. There is no solution to customize each user's environment and filter out their data. AMS provides customized workspace environments, private local storage space, and personalized settings for user's convenience. Users can access their personalized workspace environment and settings on any IFP that they have logged into, and the process could be further accelerated with BenQ designed NFC cards.

Auto Login to Cloud Storage Accounts

Data on Android devices can be difficult for novice users to locate and bring with them. Cloud storage is the solution that fits this need, but logging into a cloud account with sensitive login credentials can be a risky behavior. AMS strengthens the level of security and gets rid of the complexity of entering passwords when users try to access their cloud storage accounts. With BenQ AMS, users only have to log into their cloud storage accounts once at setup/ account creation, and they can then start accessing data without having to login ever again on the IFP. AMS automatically sets permissions for personal and network folders, providing another way for users to easily find and organize their data. AMS makes accessing various storage spaces more secure and easily accessible.

Efficient Account Management and Simplified Setup for ITS

- **Efficient Account Management**

Traditionally, it is extremely time consuming to manage large amounts of user accounts for corporate IT managers. AMS provides a clear and intuitive user interface for IT managers to import and manage multiple user accounts.

- **One Step NFC Card Setting**

Connecting personal accounts to ID cards through traditional management software is a complicated process to implement. AMS eliminates the complicated process of setup and encryption and can link an account to an ID card through one simple step.

- **Hassle-free Account Binding with AMS**

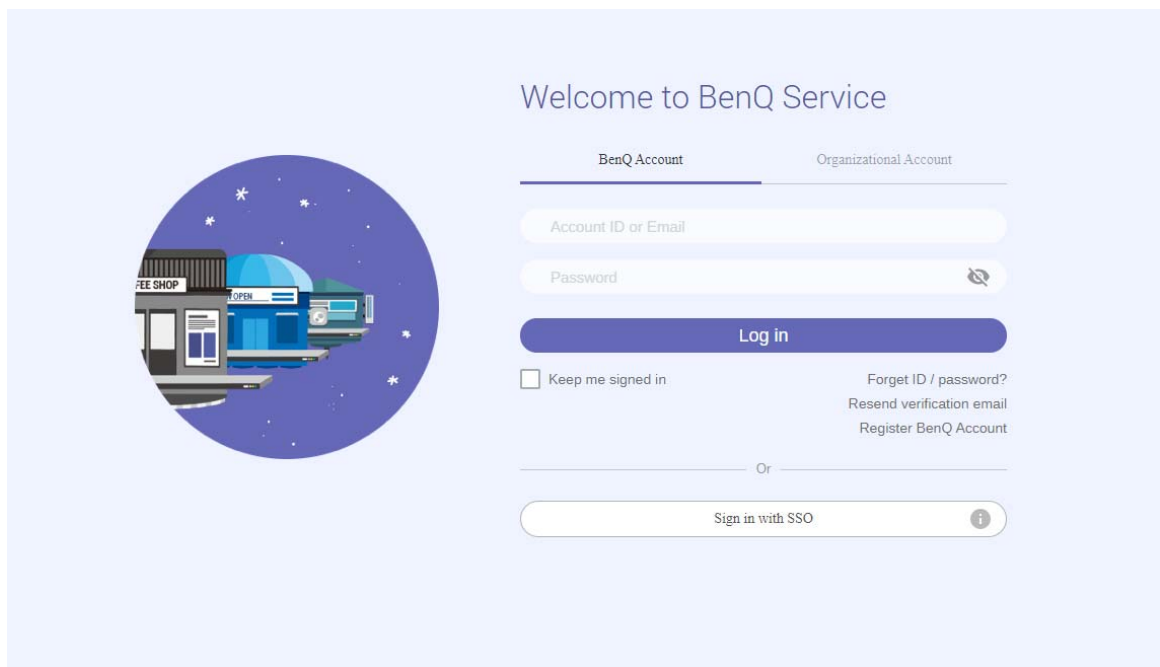

Traditional ways to match IFPs with data management systems are complicated and have limitations. AMS can simply bind devices seconds after the devices are connected to the network.

AMS Web Management

Registering a new account

You must have a valid account to access BenQ AMS.

1. Go to BenQ Service website: <https://ams.benq.com>. Suggested browsers are Chrome, Fire-fox.

Personal Settings

You can apply your personal settings to any IFP once you log in to your AMS account. Here are the available settings:

Item		Description
1.	Profile image	Tap to upload customized images. After signing in, the profile/background image will change accordingly.
2.	Wallpaper	
3.	General settings	Set the idle session logout time.
4.	App shortcut	Pin your frequently used apps on the home screen of the board.
5.	Cloud storage	Link your personal file hosting services to AMS to access your files on the board.
6.	Network drives	Link your network attached storage to AMS to access your files on the board.
7.	Personal bookmarks	Save your frequently visited websites as bookmarks for quick access on the board.

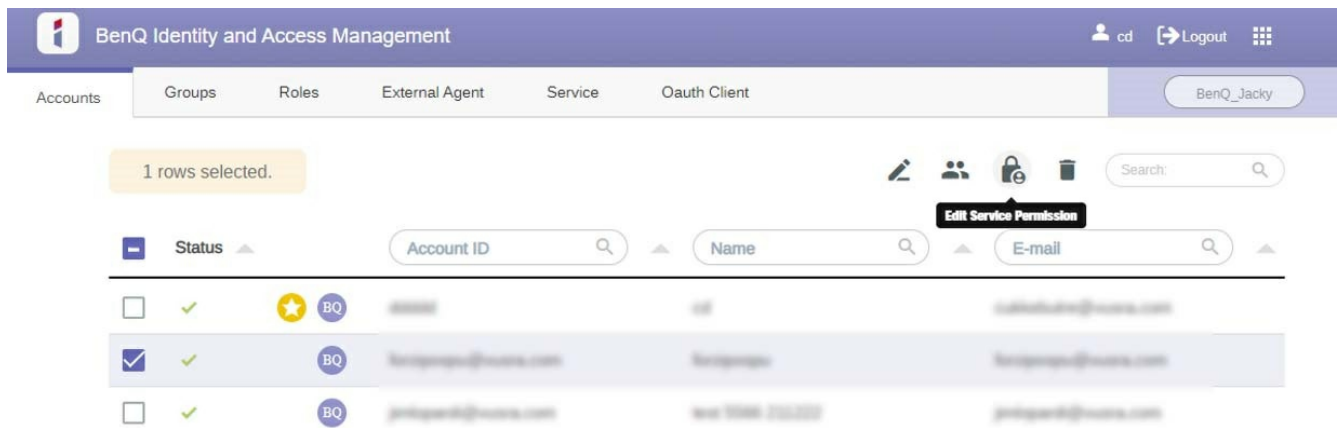

Security Settings

Administrators can manage access permissions of different accounts and equipment in IAM & AMS to prevent safety and security issues.

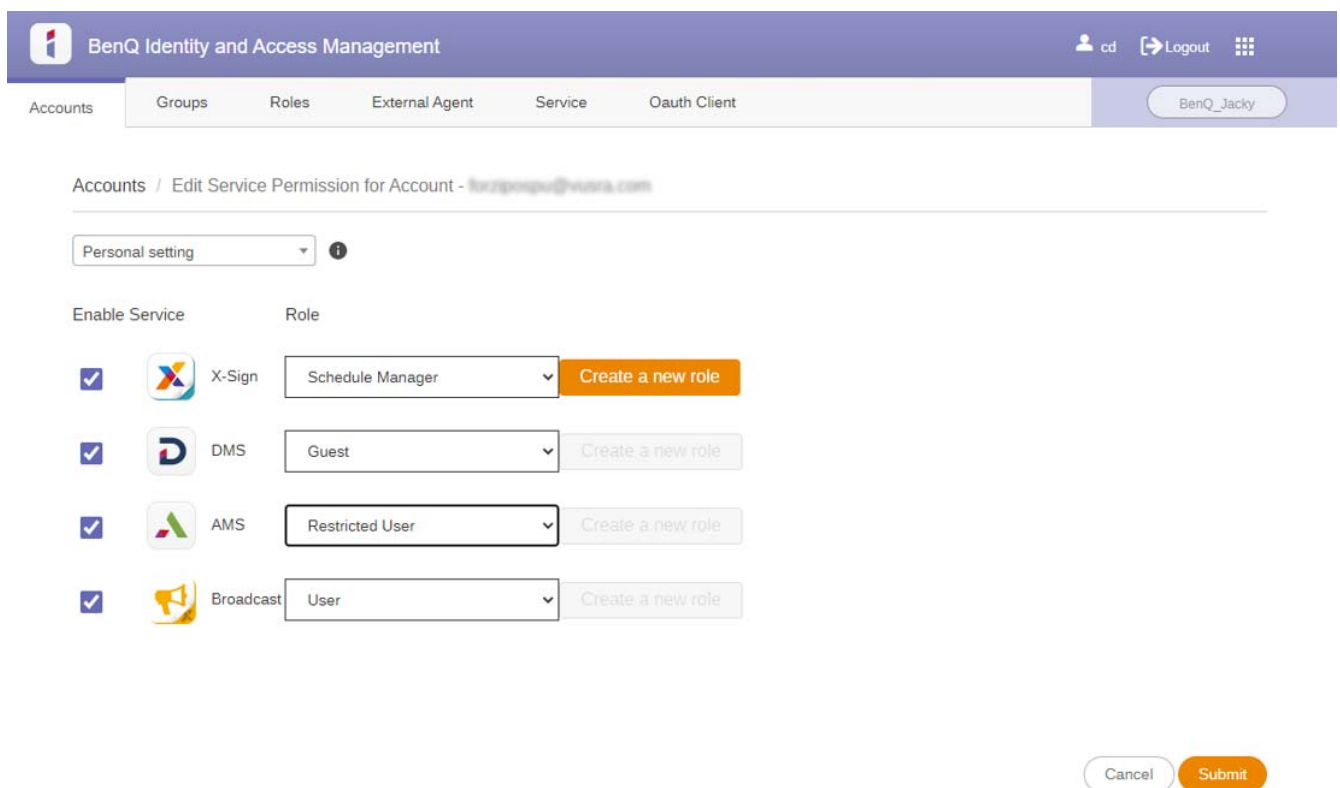

Restricted user

Administrators can set user's role as restricted user to minimize potential misuse.

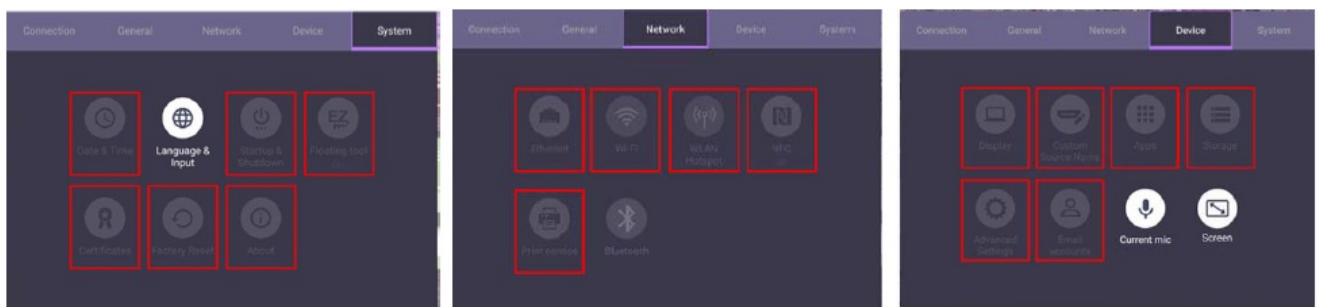

- In BenQ IAM (iam.benq.com), select the accounts you want to edit and click the icon edit service permission.

- Under AMS service, select Restricted User and click Submit.

- For restricted users, certain settings on their boards will be greyed out.

Authentication mode

Once authentication mode is activated, all functions of the BenQ board are only accessible after log in. Since the board is locked, students or people without an account will have no access to the board during recess.

- Under Equipment Management, select the devices you want to edit and click SET UP ENVI- RONENT

INFORMATION to edit service permission.

[Forget password?](#)

Login

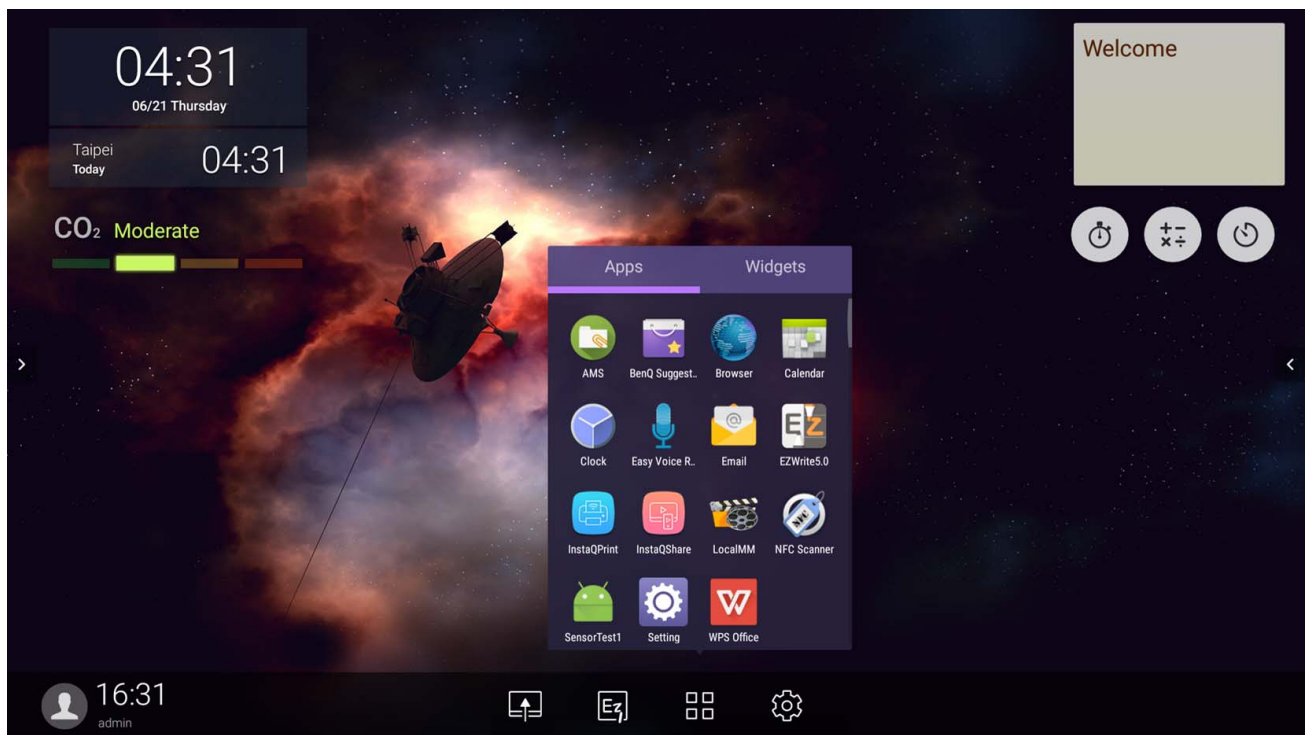

or

[Sign in with SSO](#)

- Scan the QR code with your smartphone to login.
- Enter the name and password of your AMS account.
- Access the accounts logged in recently.
- Sign in with your business e-mail account. See Single-Sign-On settings for more information.

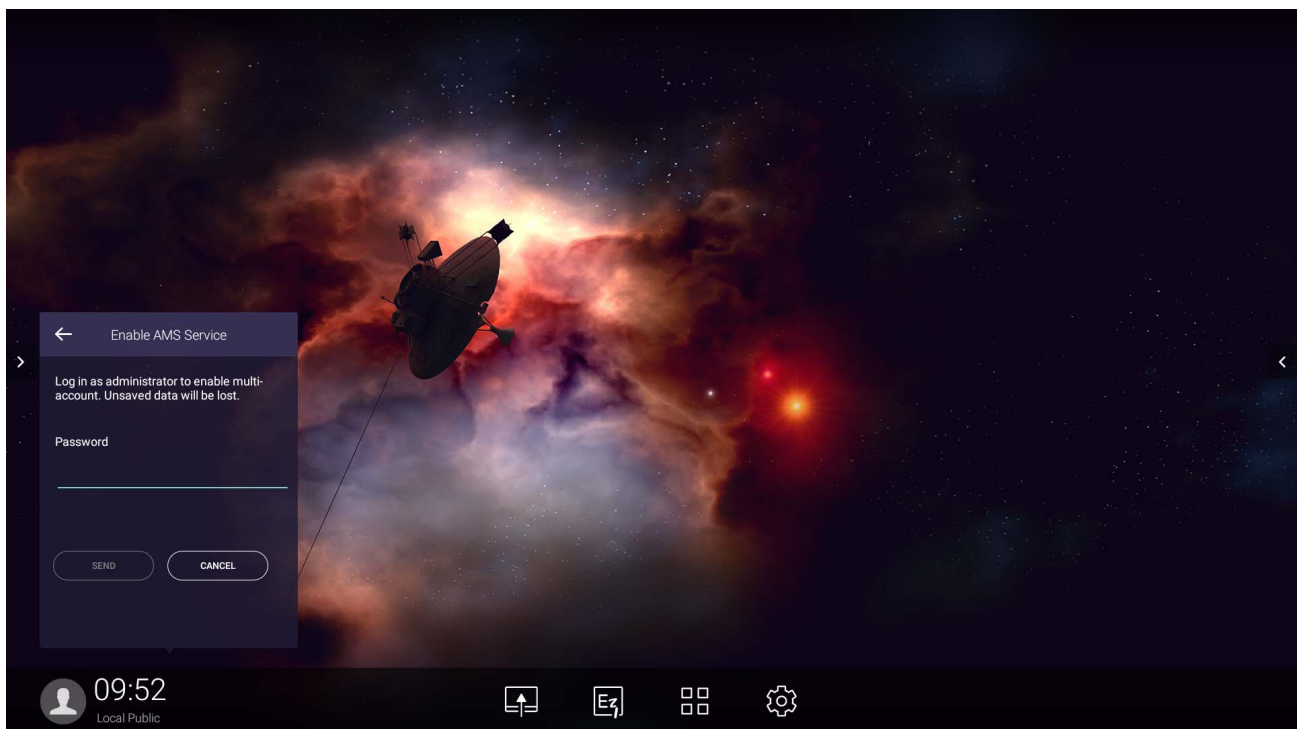

RP01K/RP02/RM02S/RM02K/RE01/CP01K

Tap to launch AMS. With this application, you can access your personalized workspace environment and settings and manage your files and accounts on IFPs that you have logged into.

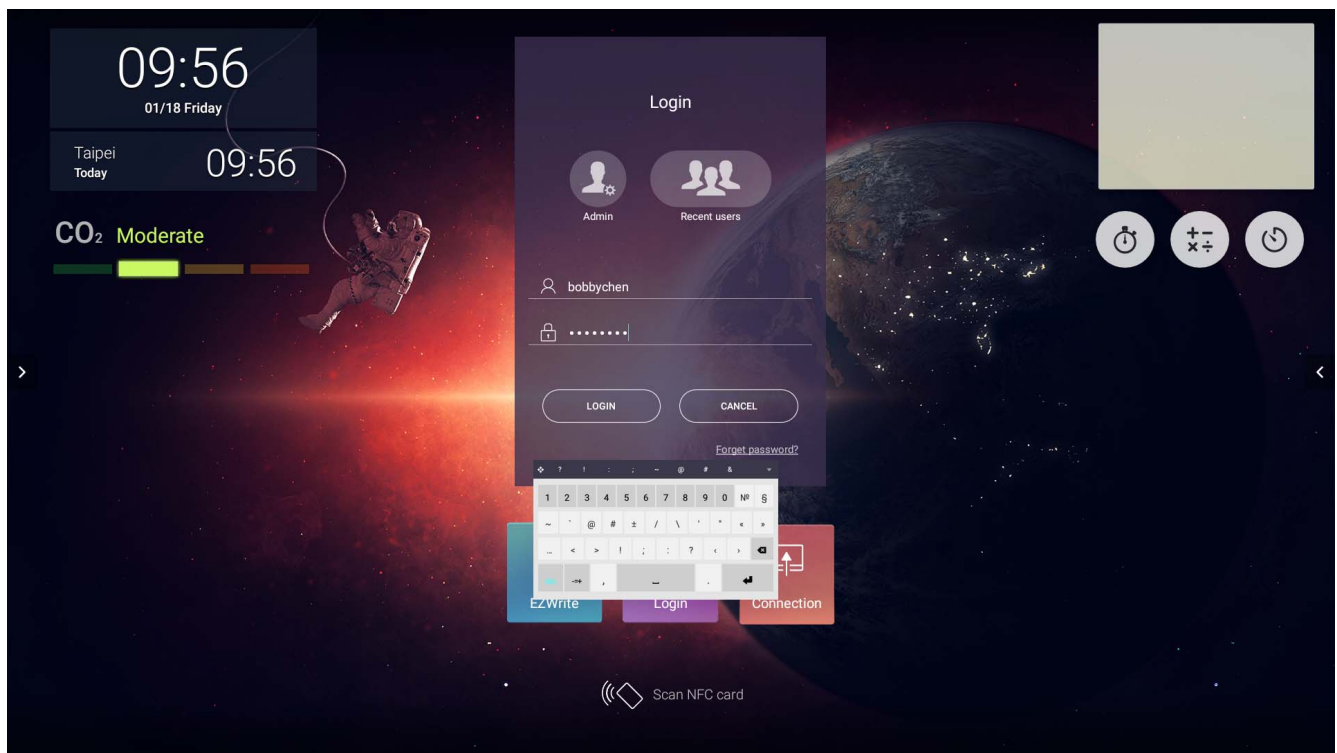

Signing in as local admin

To log in as local admin, enter the password and click SEND. The default password for local admin is “admin”. Change the password after logging in for the first time.

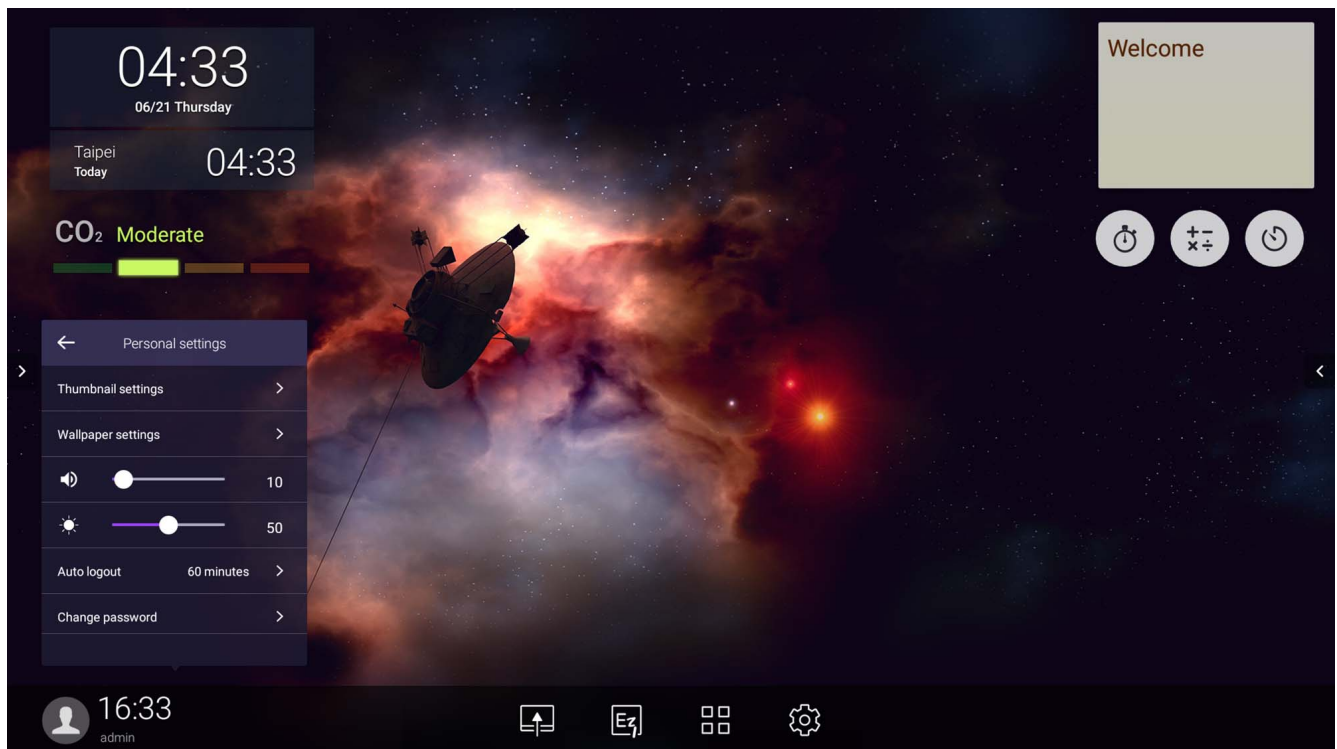

Signing in as AMS admin/user/coordinator

- Sign in as the AMS admin, user, or coordinator. For more information about the different management authority of AMS admin, user, and coordinator, see Management Authority on page 15.

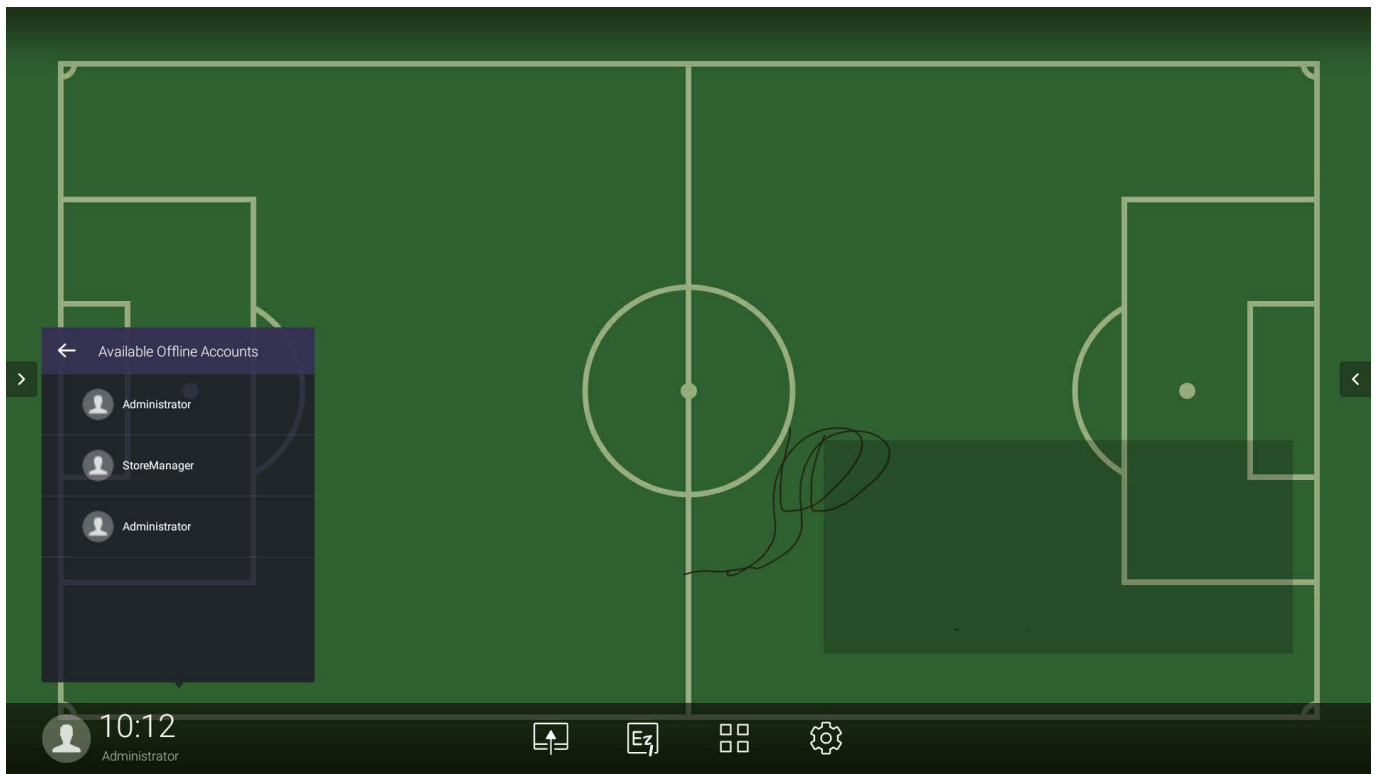

- To access your personal account, you have to ask the administrator to activate AMS service first and create your account through IAM service. Refer to Creating a new account on page 3 for more information.
- If you have recently used AMS, you can click Recent users to find your account.
- Under Personal settings, you can change the headshot, wallpaper, and password. You can also adjust volume, brightness, and set Auto logout.

Available offline accounts

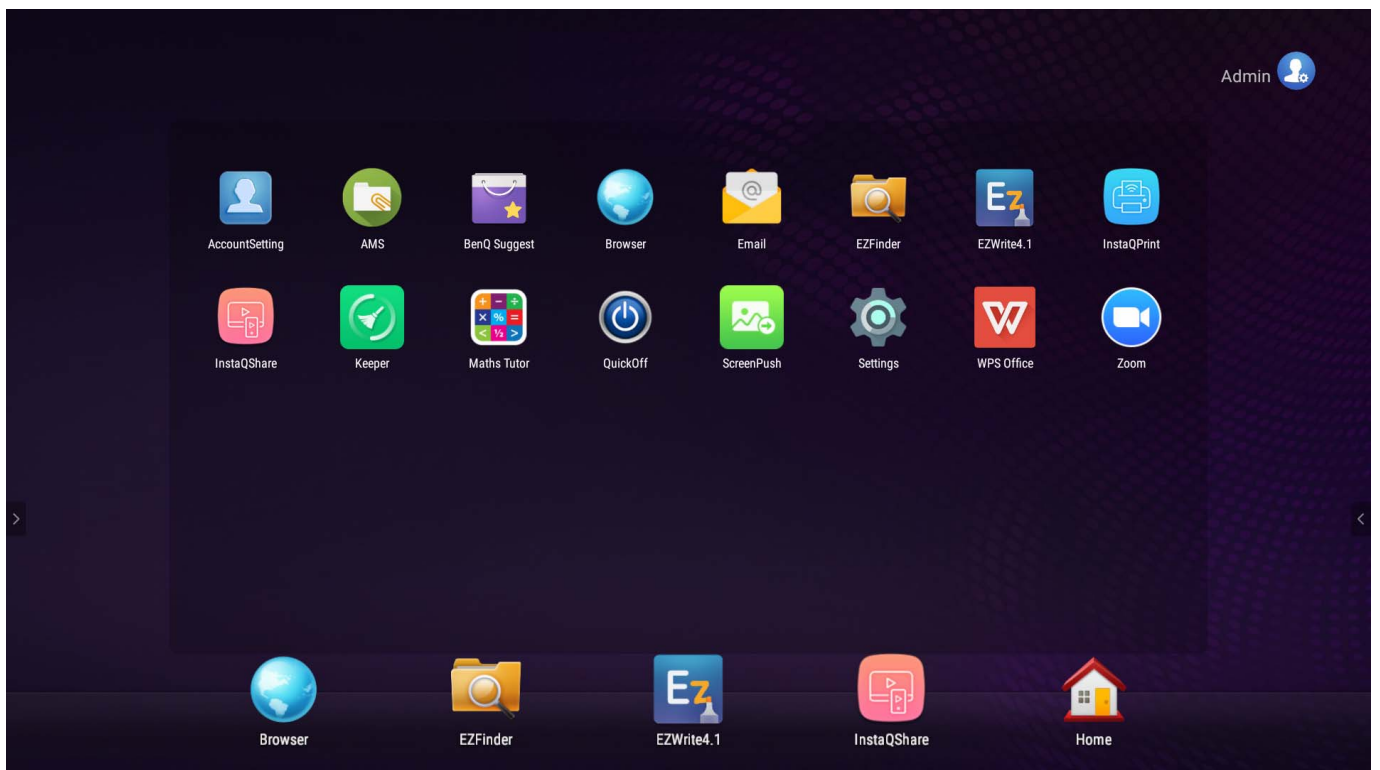

You can check the available offline accounts when you have problems connecting to the Internet. If you have logged in to your AMS account before, next time when the Internet doesn't work, you can still log in.

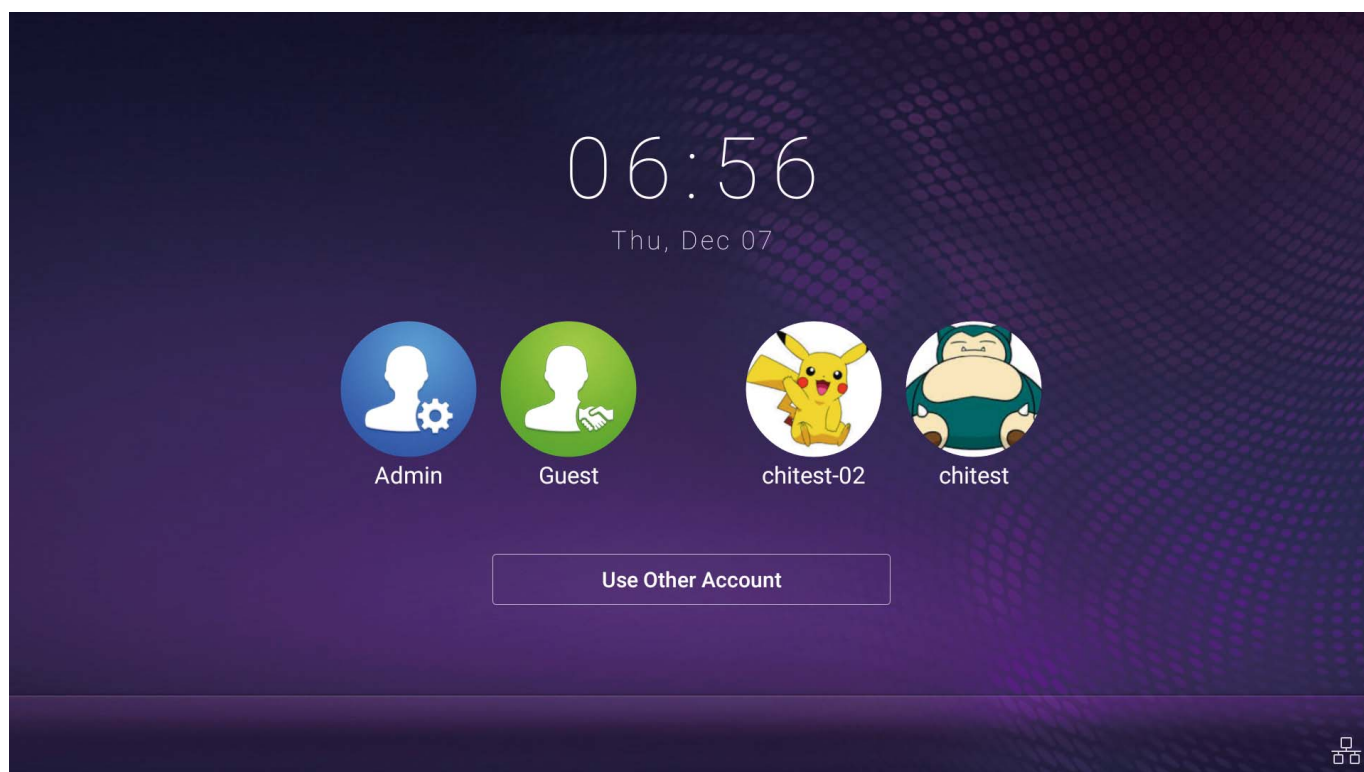

RP654K/RP704K/RP750K/ RP860K

Signing in as local admin

- Tap CONTACT ICON to launch Account Setting.

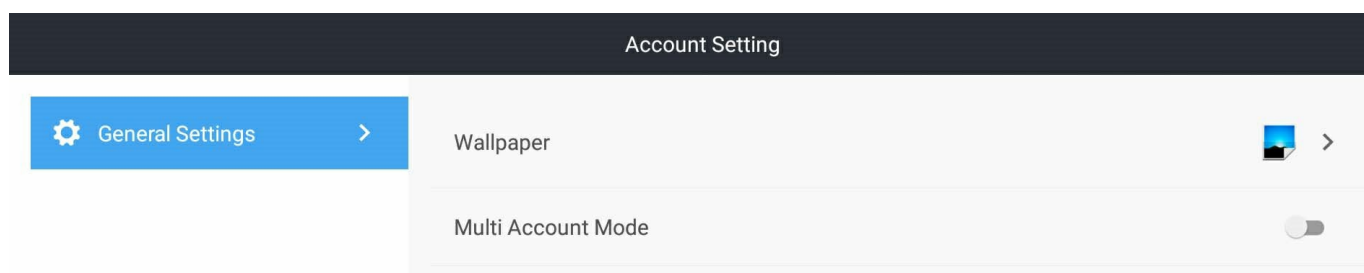

- Tab CONTACT ICON and sign in to continue Admin's Settings,

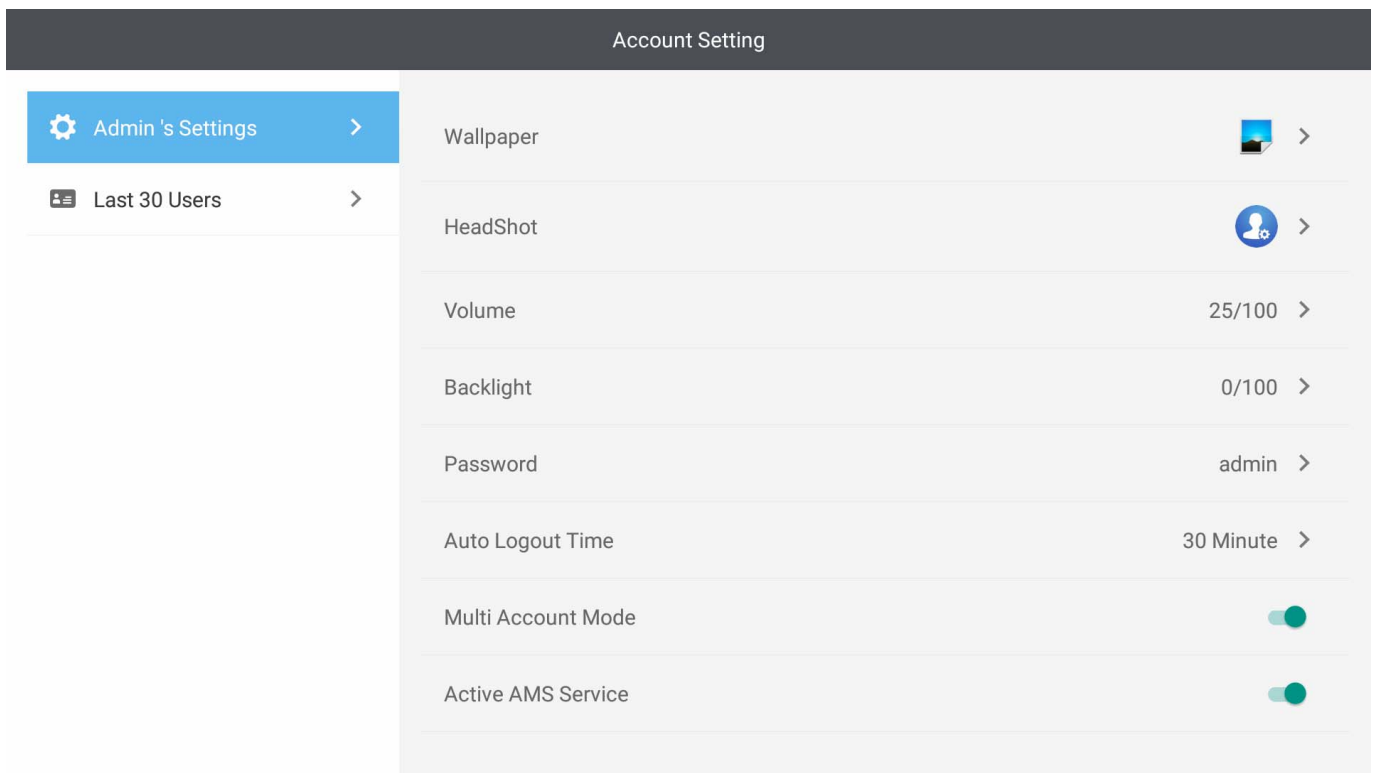

Item		Description
1.	Admin	Local admin
2.	AMS users	You need to create a new account first.
3.	Use Other Account	If you need to log in with a new account, tab Use Other Account .

Before launching the application, make sure your display is properly connected to the Internet.

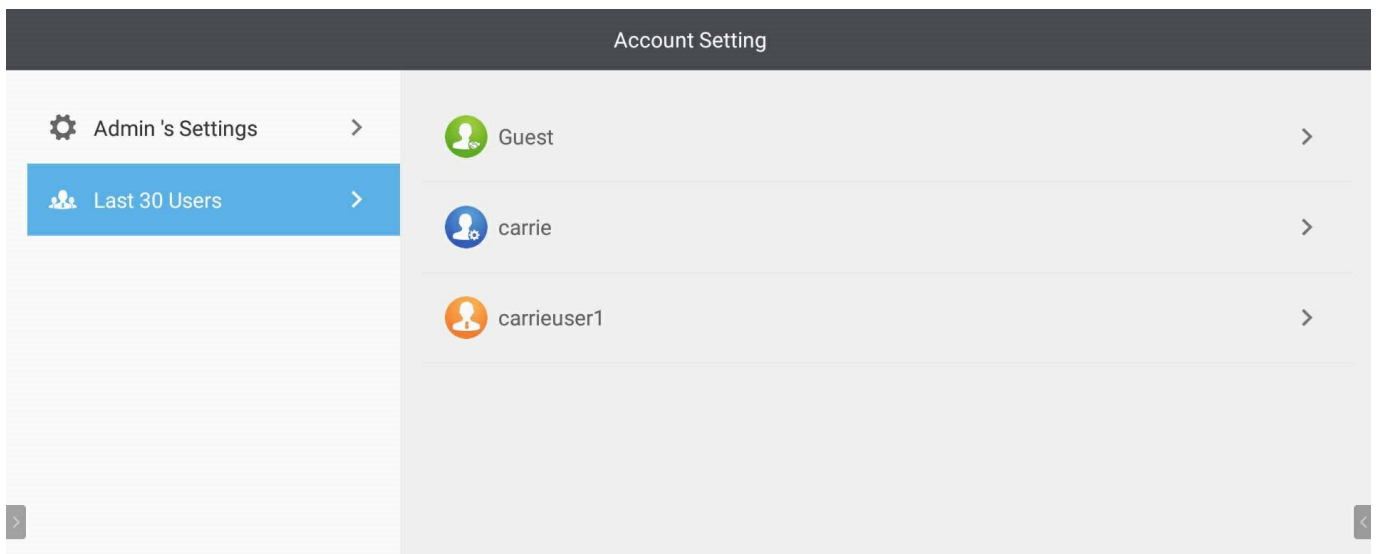

- To enable multiple user accounts, set Multi Account Mode to On. The mode is Off by default.

- After you set Multi Account Mode to On, continue to activate AMS Service.

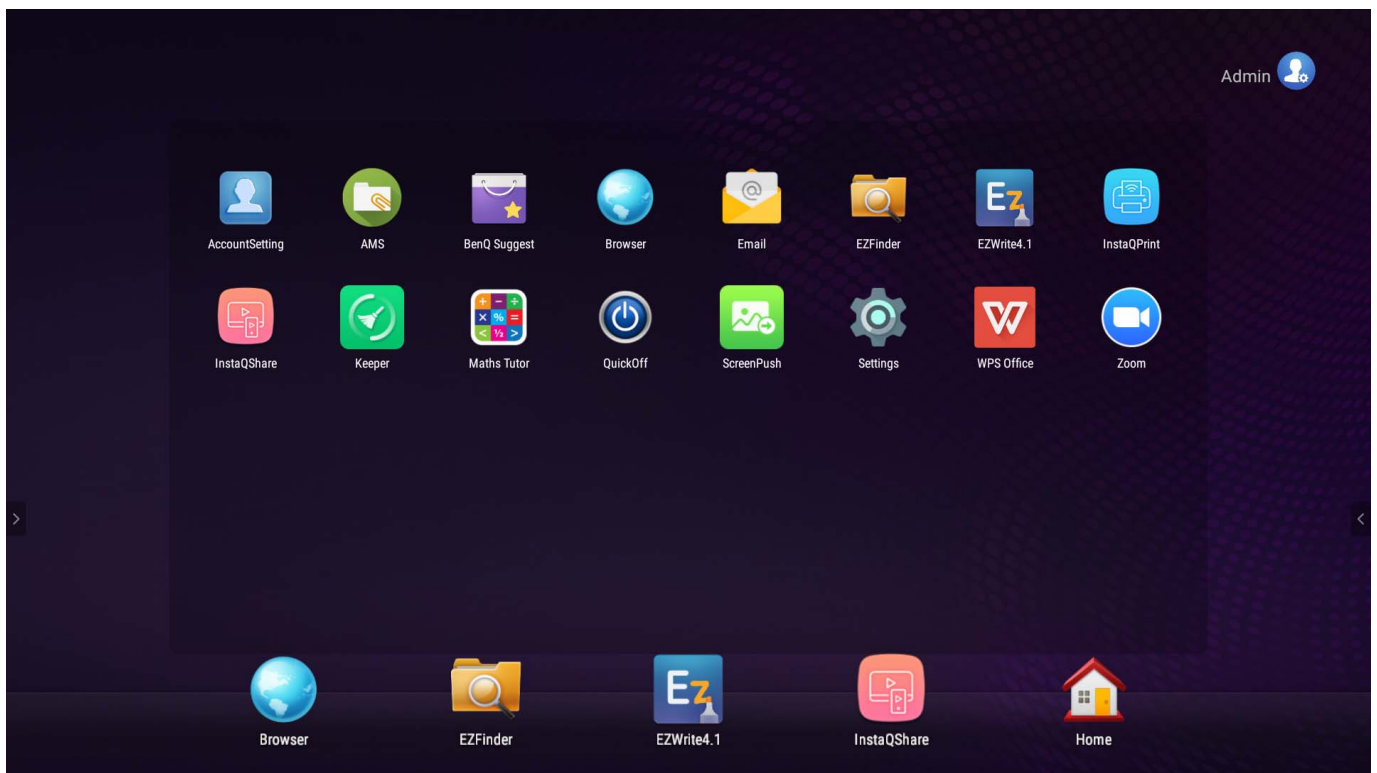

- You can also change Wallpaper, HeadShot, Password and adjust Volume, Backlight, and Auto Logout Time here.

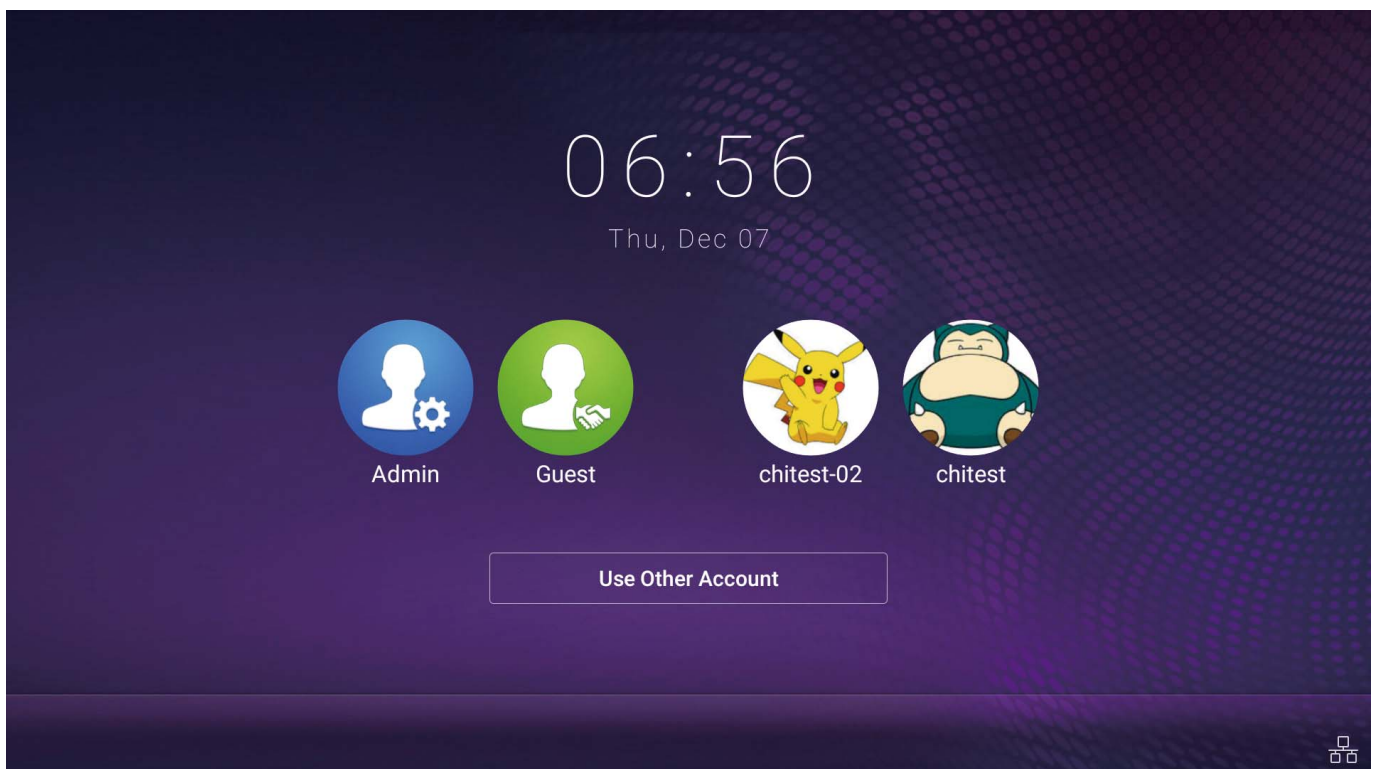

- You can check the last 30 users.
- Local admin can check accounts' login history but cannot check accounts' information.
- Local admin can edit Guest's information like Wallpaper, HeadShot, Volume, and Backlight.

Signing in as AMS admin/user/coordinator

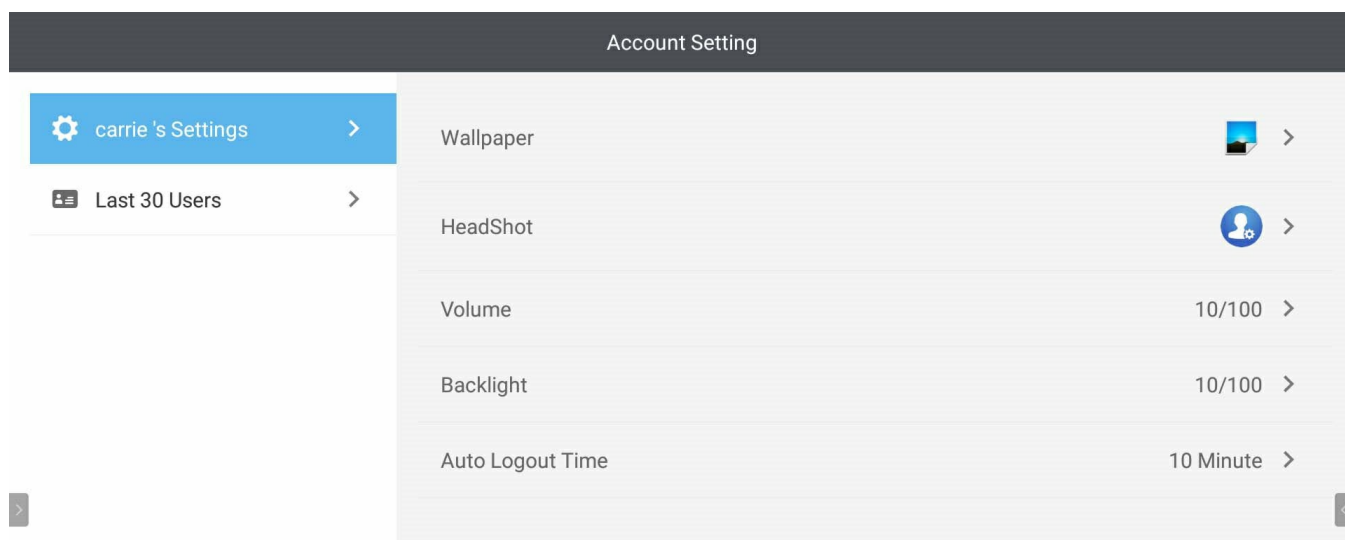

- Tap CONTACT ICON to launch Account Setting.

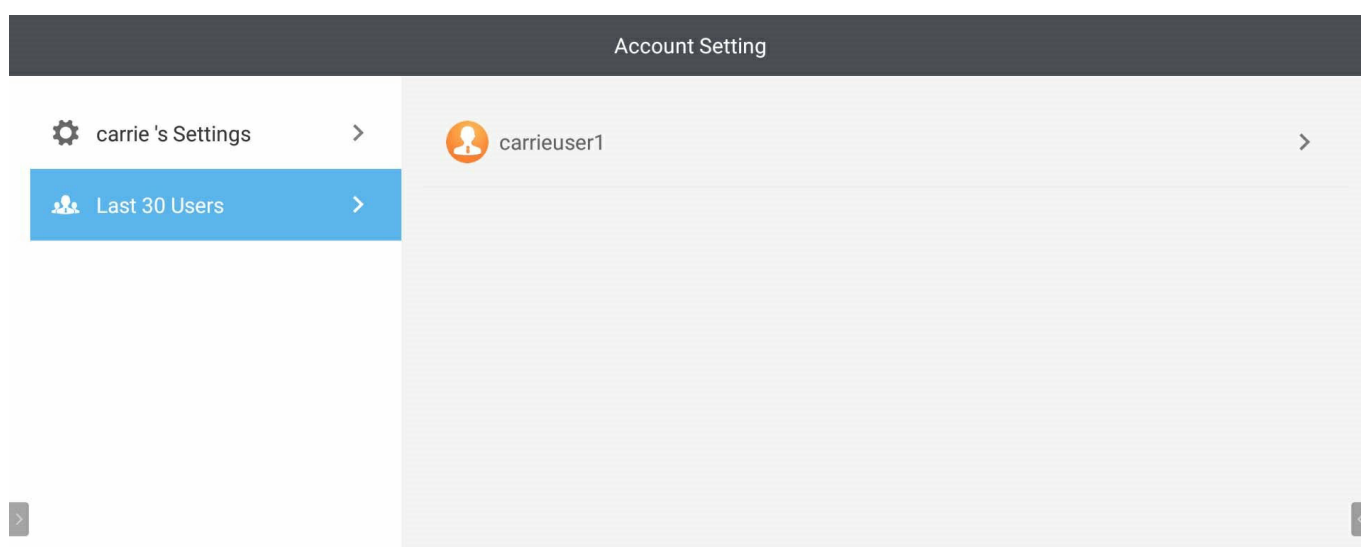

- Sign in as the AMS admin, user, or coordinator. Refer to Creating a new account on page 3 for more information. For more information about the different management authority of AMS admin, user, and coordinator, see Management Authority on page 15.

- Reset your password by receiving a reset email. Contact your local admin if you don't remember the email address you registered with or no longer have access to it.
- To access your personal account, you have to ask the administrator to activate AMS service first and create your account through IAM service. Refer to Creating a new account on page 3 for more information.
- You can change Wallpaper, HeadShot, Password and adjust Volume, Backlight, and Auto Logout Time here.

- AMS admin can check the last 30 users, while a regular user doesn't have access to this service. A regular user only has access to personal settings.

AMS Application

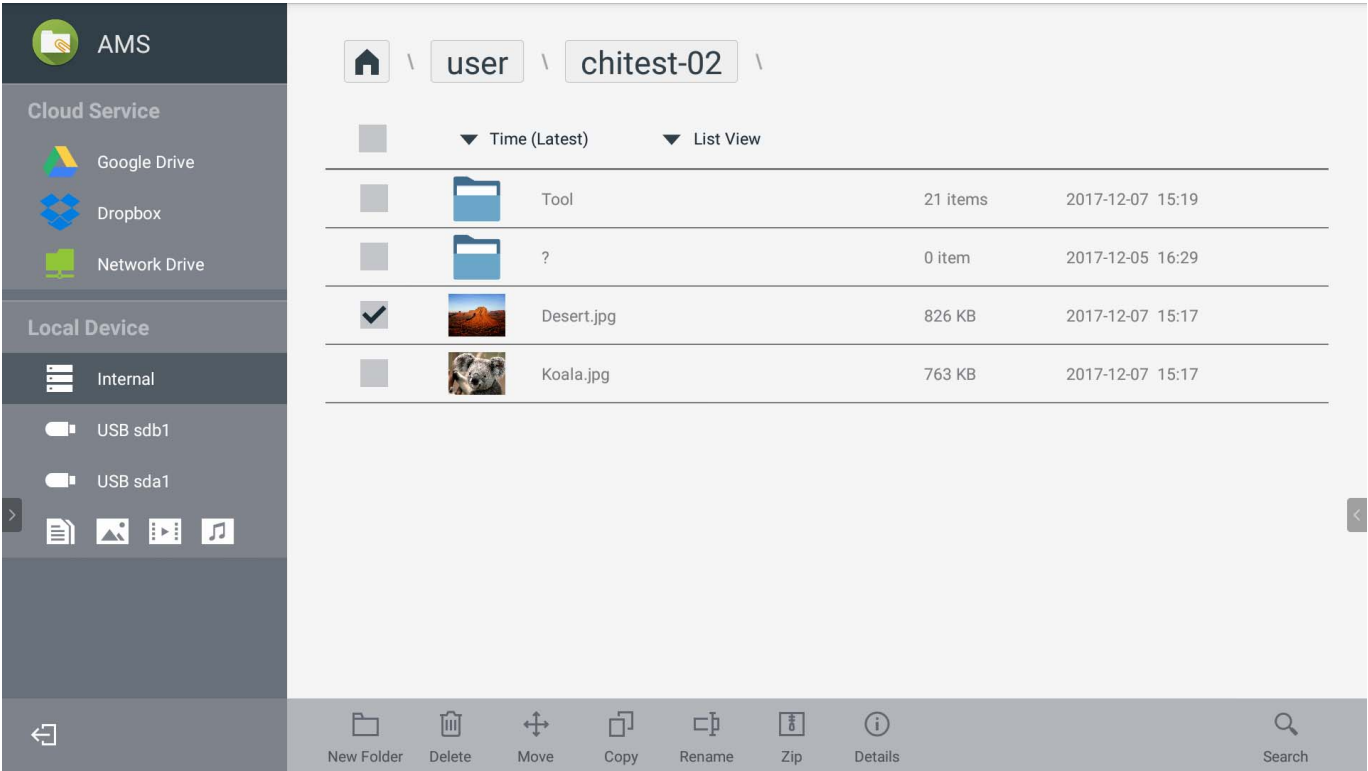

- Tap to launch AMS. With this application, you can access your personalized workspace environment and settings and manage your files and accounts on any IFP that you have logged into.

Before launching the application, make sure your display is properly connected to the Internet.

AMS file manager overview

While logging in, you will see four main parts, as described in the table below:

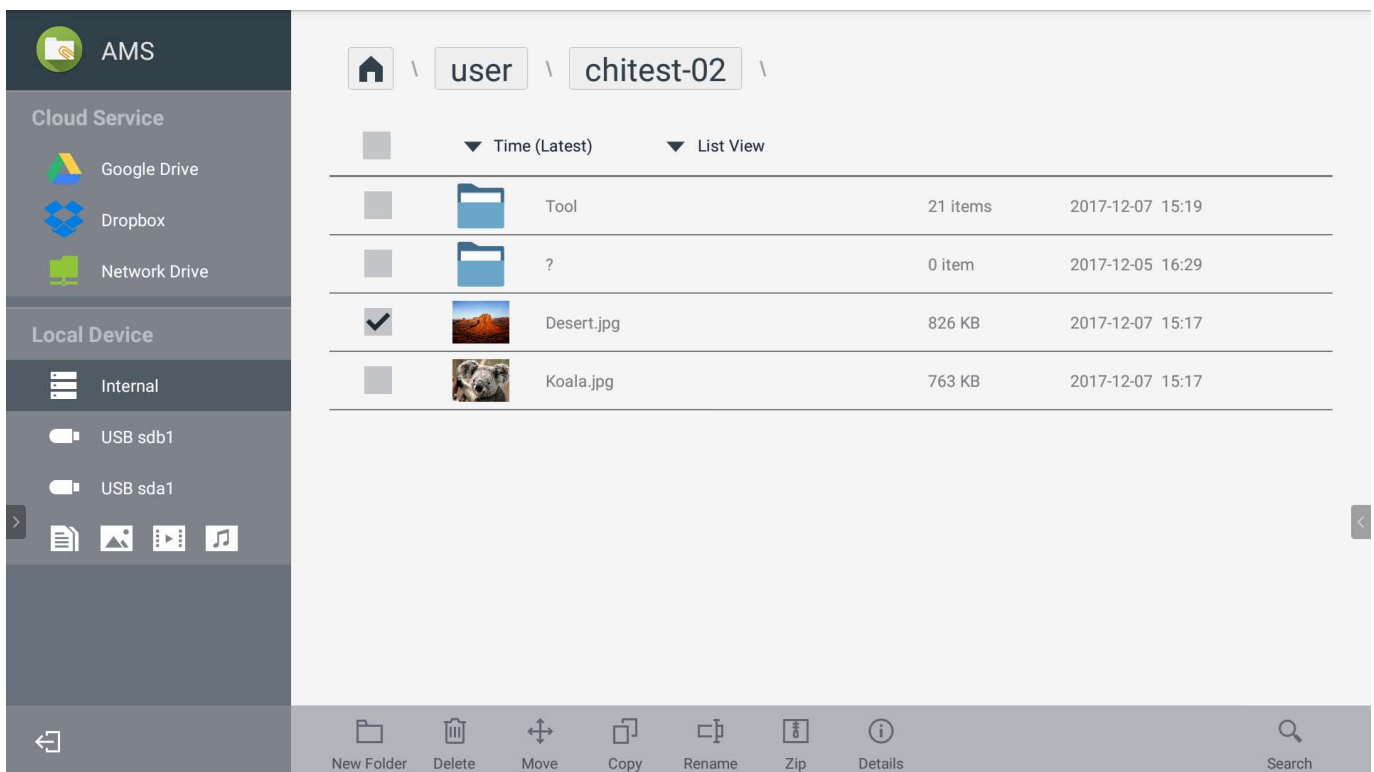

Item		Description
1.	Source Selection	<ul style="list-style-type: none"> You can open files from the cloud storage services like Google Drive, Dropbox, or network drive. You can also open files from the local devices like Internal, My Folder, or connected USBs. <p>The icon next to Google Drive, Dropbox shows that the account is bound to AMS service.</p>
2.	Folder Path	You can browse the file folder in this area.
3.	Listing Files	You can see a list of files from the storage device you select.
4.	Operating Tab	You can edit the files using the operating tabs here.

Regular users can only view their own files, while the local admin can view all users' files in the domain.

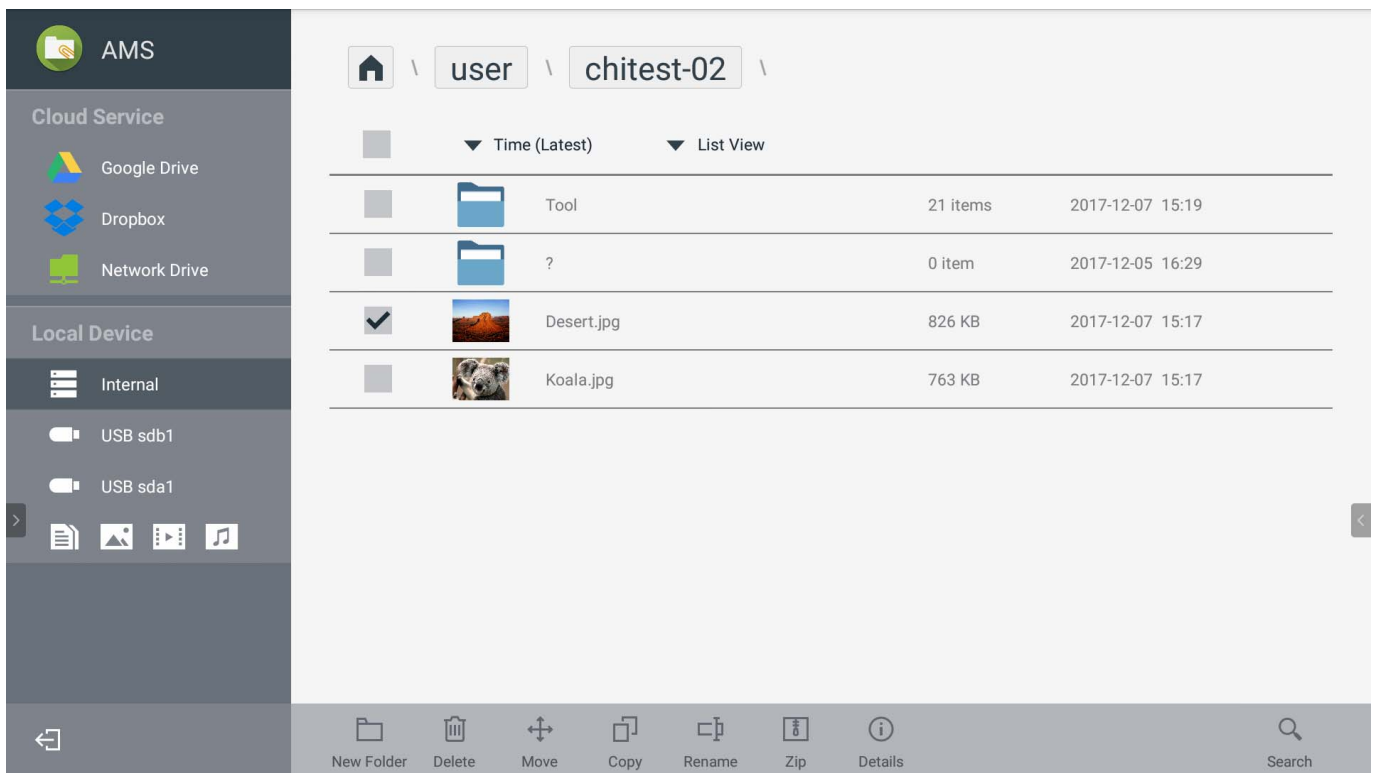

Searching files

Tap SEARCH and key in the file name to search the file.

Adding a new folder

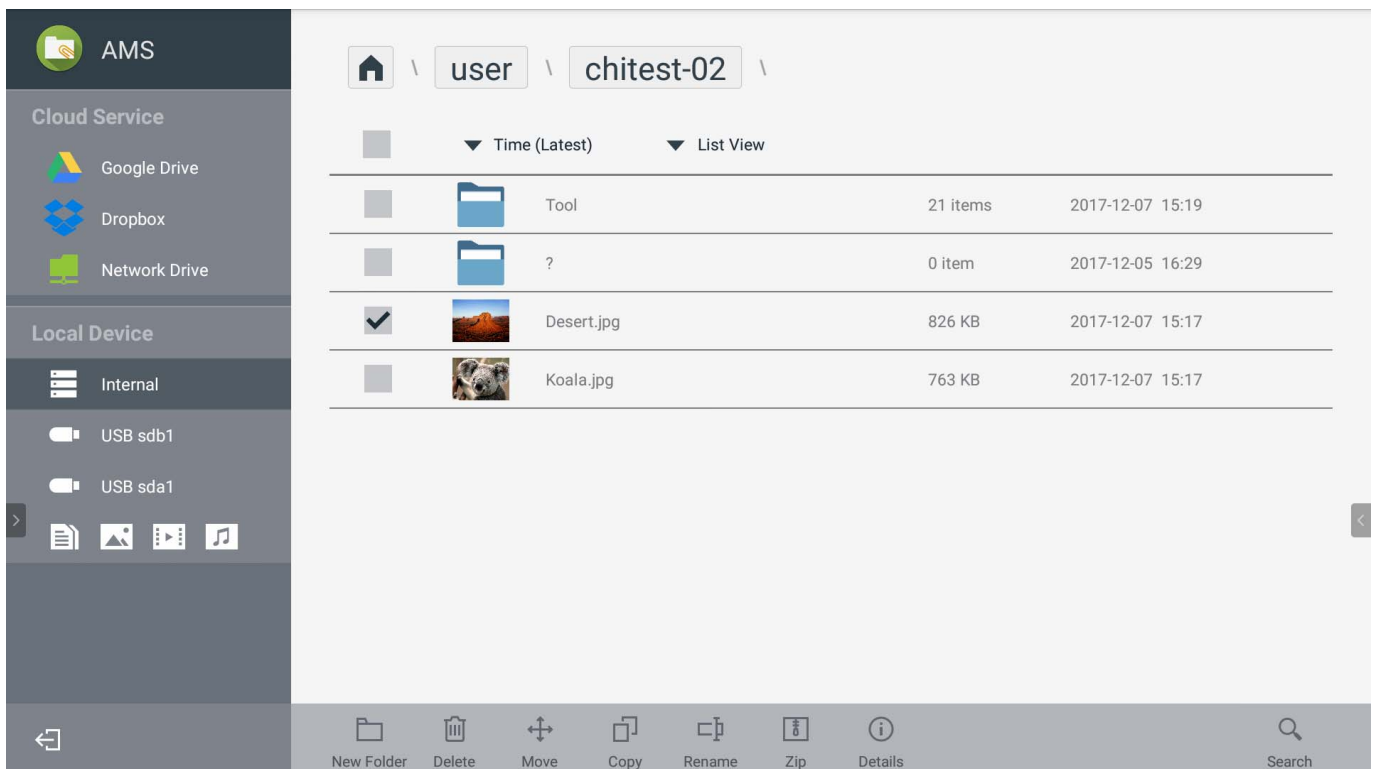

Tap SEARCH and key in the folder name to create a new folder. The name length should not exceed 64 characters.

- Local admin, AMS admin, coordinator can have access to all personal folders.
- The personal folders under the “user” path is only visible to the user.

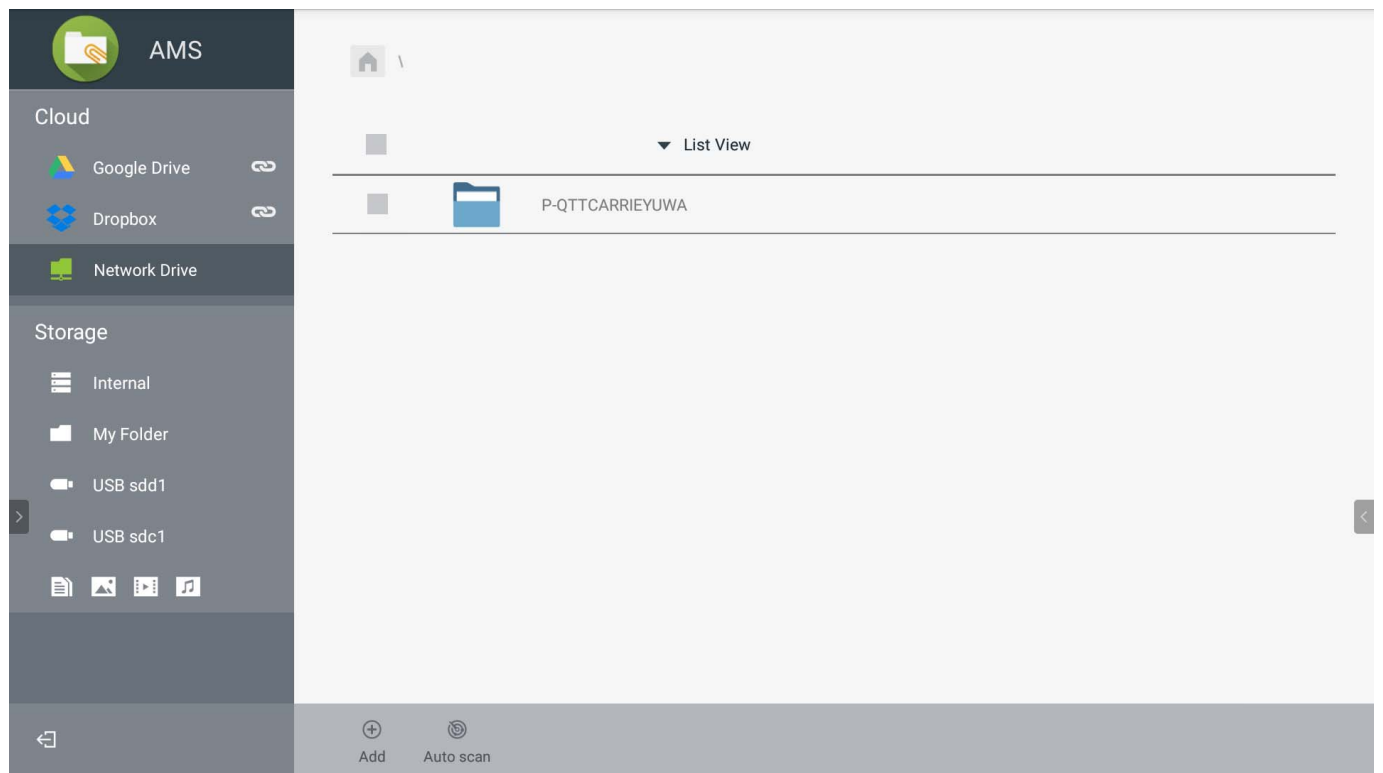

Editing files

You can edit the files using the operating tabs like New Folder, Delete, Move, Copy, Rename, Zip, or Search.

Adding another network drive server

You can add a new network drive server manually or by auto scan.

- To add a new network drive manually, fill in the following fields and click OK to continue.

Add new server

Name:

Domain name:

Ip address:

User name:

Password:

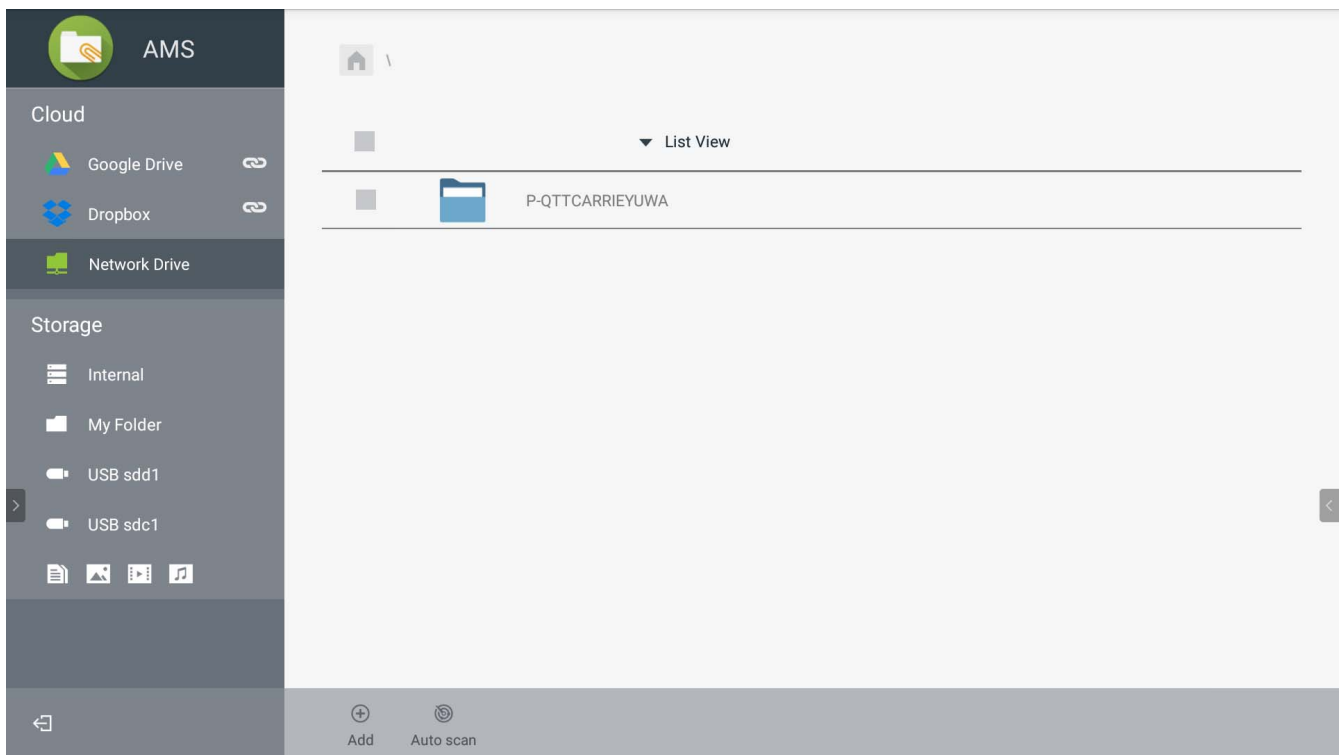

☐ Anonymous login

☒ Remember me

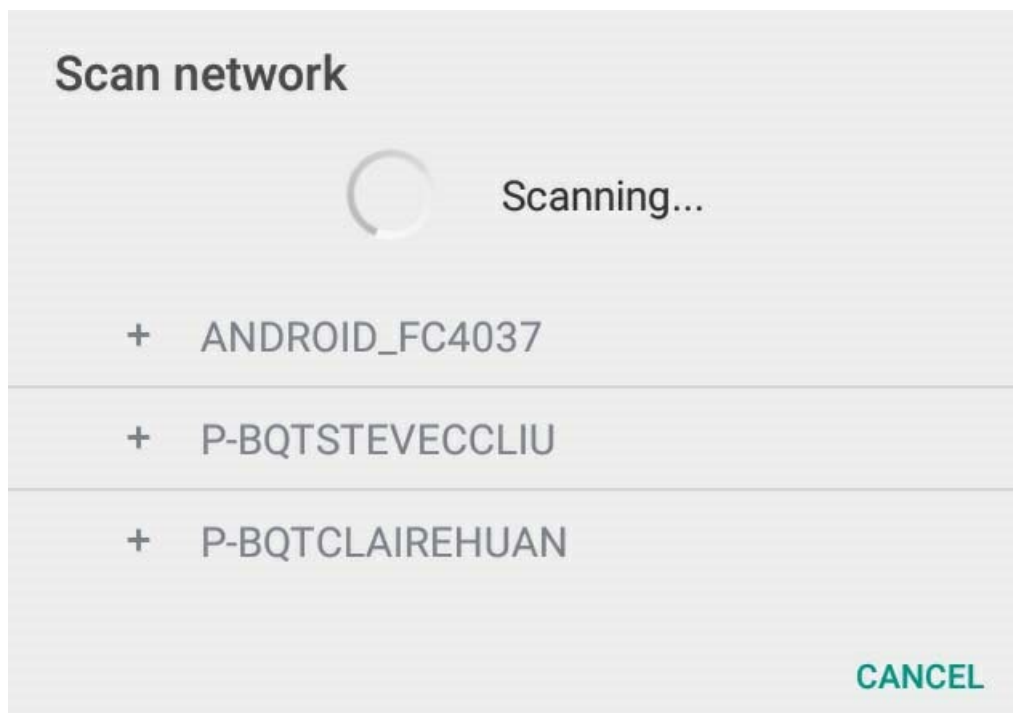

CANCEL

OK

- Remember me is checked by default.
- If you check Remember me, the system will automatically save Name/Domain name/Ip address/User name/Password. If you don't check Remember me, the system will only save Name/Domain name/Ip address.
- Check Anonymous login and you can directly log in to a network drive.
- Network drive settings, like account, password, Anonymous login, and Remember me, will be automatically saved to AMS server.
- When Anonymous login is checked, you can directly log in to network drive if the server accept Anonymous login. When Anonymous login is not checked, enter the account and password of your network storage.
- To add a new network drive by auto scan, tap Auto scan to scan network.

- The host names or IP addresses will be shown. The host names will be scanned first.

- The detected host name or IP address will be pre-filled in the corresponding fields. You can change them manually. Fill in other fields and click OK to log in.

Add new server
