Smart Power Socket User Guide

Take control of your connected devices from anywhere

Control your Power by:

BG Smart Sockets just got Smarter!

Now with a new parental lock function, you can disable your shared smart socket, limiting control via the Smart App, and with Siri shortcuts, you can now voice activate your smart socket through your iPhone, iPad, and Apple Watch. The IFTTT integration now allows you to activate sockets based on geo-location, weather, and the actions of other smart home devices.

Home Automation

Timers

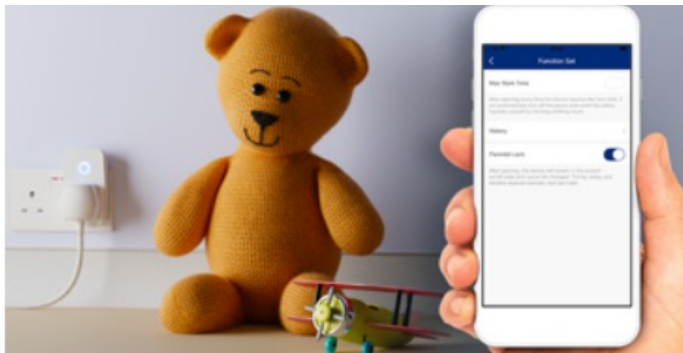

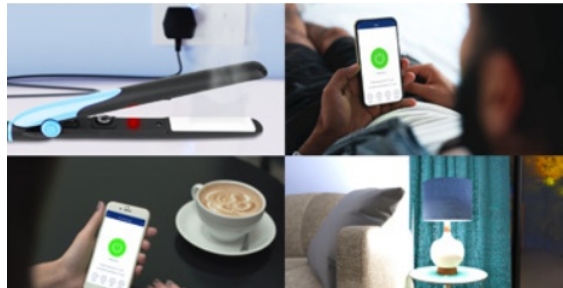

Set up timers so your device will turn on and off at specific times. Get our morning coffee ready or hence get on the morning and have energy by turning pockets off whilst you're not at home.

Set a Delay

Ideal for sockets and adaptors where you plug-in devices like hair straighteners for added safety, and charge your mobile device for a set amount of time so this turns off once it has reached a full charge.

Keeping you in control

		
<p>Parental Lock</p> <p>De-activate the faceplate buttons so these cannot be turned on or off at the wall, and prevent others from turning devices on or off, changing any of your settings within the app.</p>	<p>Share Control</p> <p>Invite other members of your household to share control of sockets within the App, whilst protecting our key settings with the parental lock.</p>	<p>Manage</p> <p>Create and manage more than 100 scenes between your devices for easy control.</p>

Smart Integrations

		
<p>Siri Shortcuts</p> <p>iOS users can now operate devices with Siri on their iPhone, iPad, or Apple Watch. Set your own custom phrase to operate individual devices or pre-configured scenes set up in the BG Home App.</p>	<p>IFTTT</p> <p>Connect all of your different smart Apps and devices for a truly integrated smart home. Use geolocation and weather services and synchronize actions with smart devices.</p>	<p>Amazon Alexa</p> <p>With the Amazon Alexa app, name your sockets and our devices on or off using voice commands.</p>

Use with the BG Home app
