NOTICE: The audio jack of controller can not be used when using ARMORX Pro

NAME OF EACH PART

ATTACH THE ARMORX PRO

1. Remove the battery compartment cover off the Controller and attach the ARMORX Pro to the battery compartment
2. Plug the USB-C flexible cable of ARMORX Pro into the USB port of the Xbox Series Controller,

NOTICE: For best performance, please fully charge the ARMORX Pro before using it for the first time.
It takes about 2.5 hours to fully charge a depleted battery.

CONNECT TO THE CONSOLE

- The Xbox Series controller with ARMORX Pro can support Xbox/ PC/ Switch originally. Hold the power button to turn on the ARMCORX Pro and plug the USB wireless adapter into the console's USB port. The ARMORX Pro will detect the platform automatically.
- LED1 slowly flashes meaning that the ARMORX Pro is connecting with the adapter And the fast flashes mean that the ARMORX Pro is paring with the adapter, After the connection is successful the LED1 will become always on (The adapter indicator is the same).
- After the connection is successful the LED1 and adapter indicator will become always on and switch to the corresponding platform color.
- LED2 flashes mean the connection between ARMORX Pro and the controller is unsuccessful and always on means connection success.
- To connect with the Switch console need to set: System Settings> Controllers and Sensors> Pro Controler Wired Communication On.

RE-PAIR

- ARMORX Pro is already paired with the adapter in the factory. The only situation you need to pair it with is that the connection of ARMORX Pro and adapter is failed.

The steps of repair:

1. After the ARMORX Pro is on, hold the [A→B] + [FN] Funtil the LED1 fast flashes, and the ARMORX Pro enters pairing mode
2. Plug the adapter into the console and hold the pair button on the adapter until the indicator fast flashes, and the adapter enters the pairing mode.
3. When the LED1 and adapter indicator are fast flashing means it is pairing. Please wait for it until the LED1 and adapter indicator become always on, and the repair is Successful.

MOTION CONTROL

1. The ARMORX Pro has a motion control function that allows you to use the gyroscope to simulate the action of

left/right joysticks in games that do not support motion control originally.

2. **Turn on:** Click once the MotionAim control button. The LED2 will be purple.

3. **Turn off:** Click the MotionAim control button once again to turn off the motion control. The LED2 will flash twice and turn off.

THE MODES OF MOTION CONTROL

There are three modes of motion control:
Global right joystick simulation, Response right joystick simulation, Global left joystick simulation.
The open methods of three modes:

1. Global joystick simulation:

   Holde +LS to open the global left joystick simulation,

   Hold + RS to open the global right joystick simulation.

2. Response joystick simulation:

   Holde + response button and press RS to open the response left joystick simulation.

   Open the motion control by clicking once the MotionAim control button will open the last mode you have used.

SUPPORT SWITCH ORIGINAL MOTION CONTROL

ARMORX Pro has a built-in 6-axis gyroscope, and the game of Switch console supports native motion control by default. There is no need to turn on Simulated motion control, please make sure Simulated motion control is turned off.

THE CALIBRATION OF THE GYROSCOPE

Put the Xbox Series controller that is already attached to the ARMORX Pro on the horizontal desk and press the

 + Xbox Series controller. The LED2 will slowly flash in purple. The LED2 flashes twice and turns off means the calibration is successful.

ADJUSTMENT OF RUMBLE MOTOR

1. Press+to change the vibration intensity of trigger motor. 4 gears vibration intensity can be changed cyclically: strong, medium, weak, off.

2. Press+to change the vibration intensity of handle motor. 4 gears vibration intensity can be changed cyclically:

strong, medium, weak, off.

ON-BOARD PROFILE

ARMORX Pro has 3 on-board profles can be cycle switched by click the |e).
The color of LED1 on the left side shows different profiles.

1. Orange is the first profile.
2. Green Is the second profle.
3. Blue is the third profile.

BATTERY

The ARMORX has 1300mAh to satisfy 10 hours using. The biggest factor affecting battery life is the vibration intensity of motor. The high-frequency vibration will greatly reduce battery life.
The charging power is 5V/1A, and it will take 2 hours to fully charge.

1. **Low battery:** When the battery is too low, the controller wil vibrate 3 times and the LED1 will flash quickly in red. It will cycle every 5 minutes.
2. **Charging:** When the ARMORX Pro is charging LED1 will be always on in red. And it will be always on in green after fully charged.
