## Components for Setup

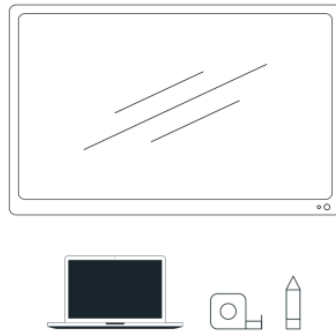

## In the box

- Bird Hub
- USB Type C Cable
- Power Cable
- Power Adapter
- Stylus with Charging Cable
- Remote with USB Dongle
- HDMI Cable
- L Type HDMI Connector

## Not in the box

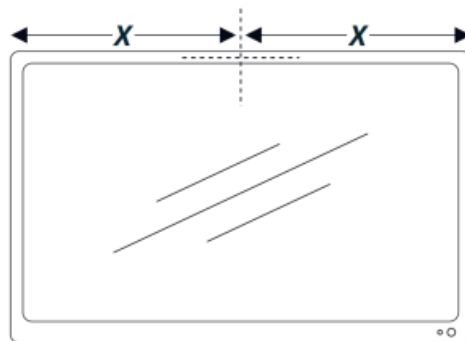

- Measuring Tape
- Marker
- Display Panel
- Computer

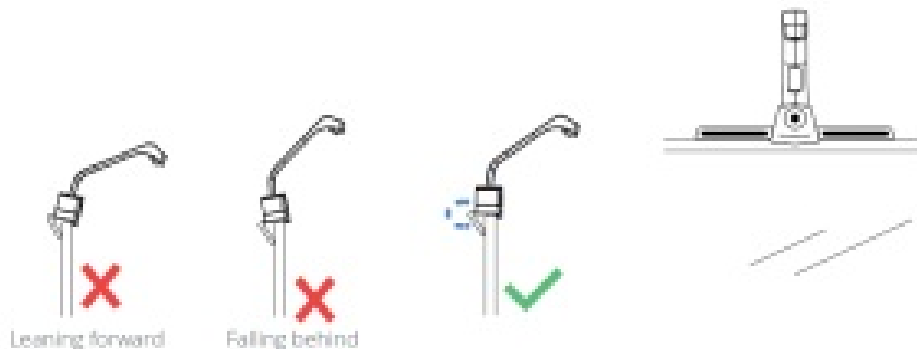

## Installation

### Basic Guidelines

Take care not to place the panel in direct sunlight. . For seamless experience the display panel has to be mounted firmly. If needed, add some extra padding (ex: sponge) for support between the panel and the wall to prevent it from shaking while writing.

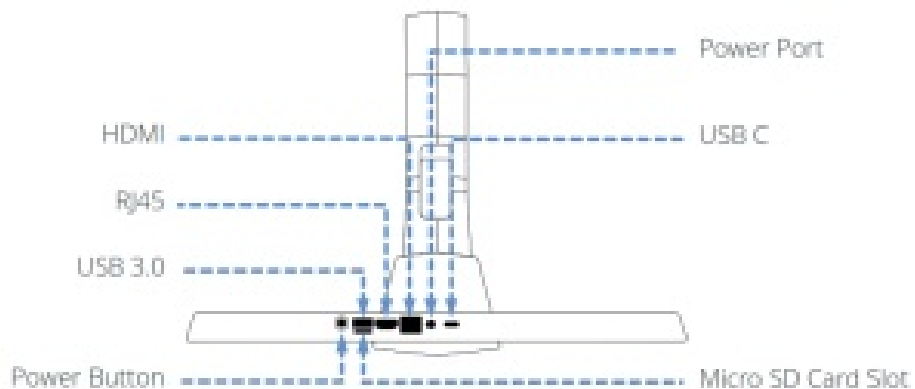

Measure and mark the centre and top list of the display. Place the device on the display and use the clip to fix it safely on the display. Make sure the device is not leaning forward or falling behind.

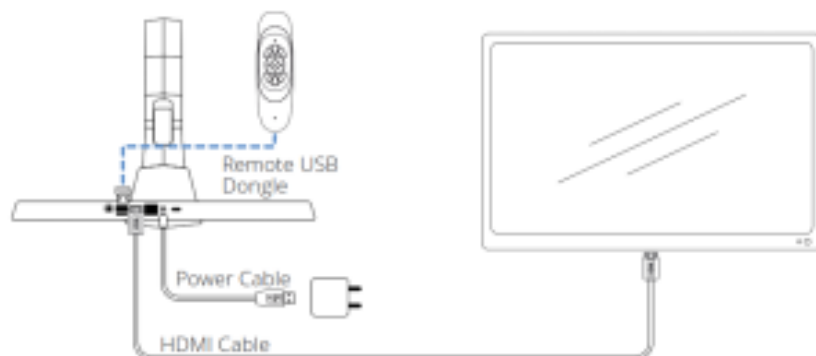

## Connectivity

## Port Description

## Connections: Appliance mode

## Setting Up

### First Boot- up

**Note:** Touching the board with your Stylus will not work as yet. First, calibrate the sensor. Use the USB remote (provided in the box) or a standard USB mouse or keyboard to do this set up.

If you see red markers touching all the four corners of the display, it is OK. Refer the images below for more clarity.

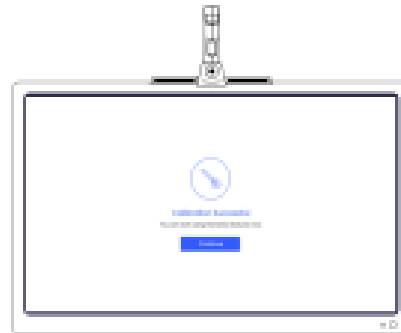

Red markers: Not visible

Red markers: Too much inside

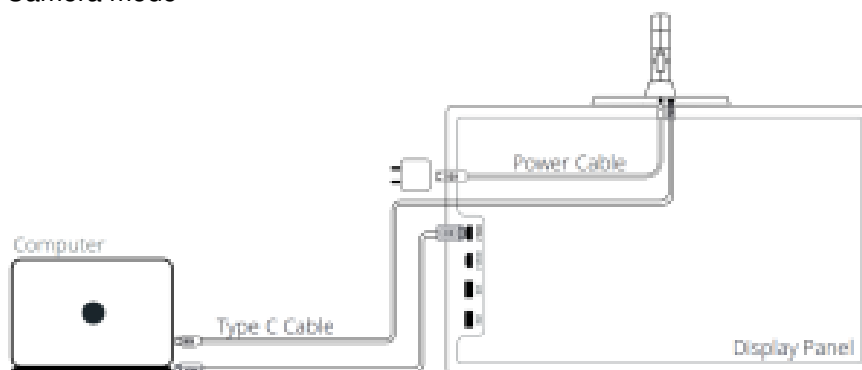

## Calibration

## Setup Wi-Fi & follow Instructions on screen to Register device

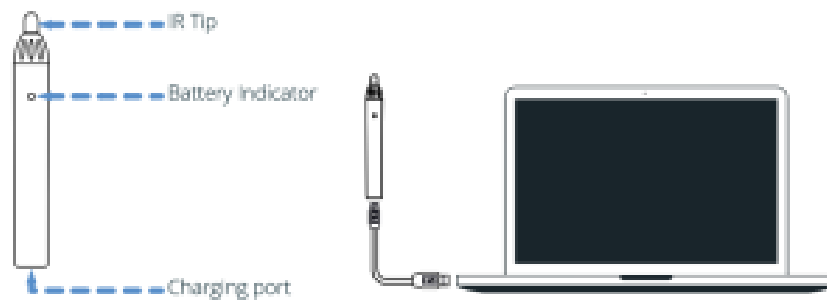

## Connections: Smart Camera mode

## Stylus

Note: Styluses needs to be charged before using for the first time.  
To charge Stylus use the Mini USB cable and connect the stylus to PC
