**BITMAIN S19 Hydro Server** 

#### **Product Information**

### **Specifications**

• Power supply AC input voltage: 342-418 Volts

• Power supply AC Input Frequency Range: 47-63 Hz

• Power supply AC Input current: 30 Amps

• Network connection mode: RJ45 Ethernet 10/100M

• Server Size (Length\*Width\*Height, w/o package): 410\*196\*209 mm

• Server Size (Length\*Width\*Height, with package): 570\*316\*430 mm

• Net weight: 15.2 kg

• Gross weight: 17.5 kg

• Operation humidity(non-condensing): 10-90%

## **Product Usage Instructions**

### Setting up the S19 Hydro Server

- 1. Unbox the S19 Hydro Server carefully.
- 2. Connect the power supply APW11 to the server following the provided guidelines.
- 3. Ensure the server is placed in a well-ventilated area with appropriate temperature and humidity levels.
- 4. Connect the server to a network using an RJ45 Ethernet cable.
- 5. Power on the server and follow the on-screen instructions for configuration.

### **Maintenance and Care**

• Regularly check the server for any dust accumulation and clean it using a soft, dry cloth. Avoid exposing the server to water or extreme temperatures.

#### FAQ

Q: What should I do if the server does not power on?

• A: Check the power supply connection and ensure it is securely plugged in. If the issue persists, contact customer support for further assistance.

## Q: Can I use the S19 Hydro Server outdoors?

- A: It is recommended to use the server indoors in a controlled environment to prevent damage from environmental factors.

#### Overview

- The S19 Hydro server is one of Bitmain's newest versions in the 19 Hydro server series. Power supply APW11 is part of the S19 Hydro server.
- All S19 Hydro servers are tested and configured before shipping to ensure easy setup.

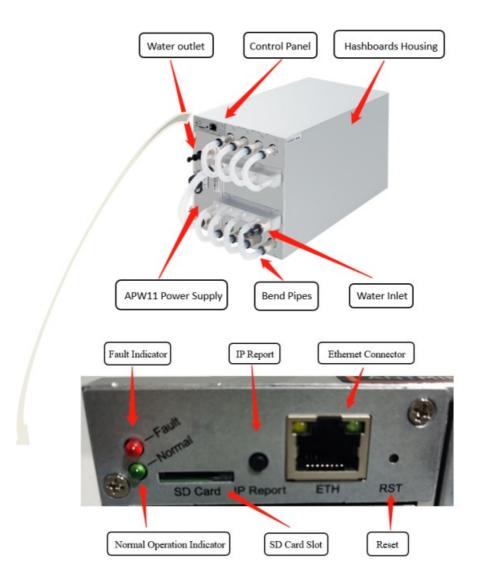

### Caution:

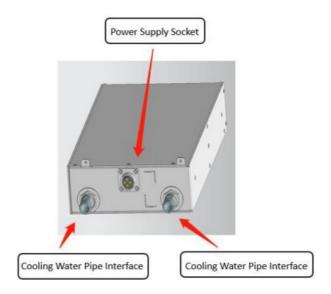

- 1. Please refer to the layout above to place your goods in usage in case of any damage.
- 2. DO NOT remove any screws and cables tied to the product.
- 3. Please note that the actual server shall prevail.
- 4. There must be an external specific Surge Protection device complying with IEC/EN 61643-11 either in front of the power supply or outside the end system (in a separate distribution box or as part of the building installation).
- 5. Do not plug or remove the device when it is powered on.
- 6. The external power supply shall have a disconnecting device, which can disconnect L1&L2&L3 simultaneously.
- 7. The S19 Hydro server shall be used simultaneously with the ANTSPACE HK3. Please click here for more details of ANTSPACE HK3.

## **Hydro Server Components**

The main components and control panel of S19 Hydro servers are shown in the following figure:

## **APW11 Power Supply:**

**Note:** Power supply APW11 is part of the S19 Hydro server. For detailed parameters, please refer to the specifications below.

## **Specifications**

Product Glance	Value			
Version	S19 Hydro			
Model	208-A			
Crypto Algorithm/Coins	SHA256/BTC/BCH			
Hashrate, TH/s	132 ± 3%	138.5 ± 3%	145 ± 3%	151.5 ± 3%
Power on wall@Tj65°C, Watt (1-1)	4554 ± 5%	4778 ± 5%	5003 ± 5%	5227 ± 5%
Power efficiency on wall @Tj65°C, J/TH (1-1)	34.5 ± 5%	34.5 ± 5%	34.5 ± 5%	34.5 ± 5%

Detailed Characteristics	Value			
Power Supply				
Power supply AC input voltage, Volt (2-1)	342~418			
Power supply AC Input Frequency Range, Hz	47~63			
Power supply AC Input current, Amp(2-2)	30			
Hardware Configuration				
Network connection mode	RJ45 Ethernet 10/100M			
Server Size (Length*Width*Height, w/o package), mm	410*196*209			
Server Size (Length*Width*Height, with package), mm	570*316*430			
Net weight, <b>kg</b>	15.2			
Gross weight, <b>kg</b>	17.5			
Environment Requirements				
Operation temperature, °C (2-3)	0~40			
Inlet water temperature, °C	20-40			
Water flow L/min	8±10%			
Water pressure bar	≤3.5			
Storage temperature, °C	-20~70			
Operation humidity(non-condensing), RH	10~90%			

## Notes:

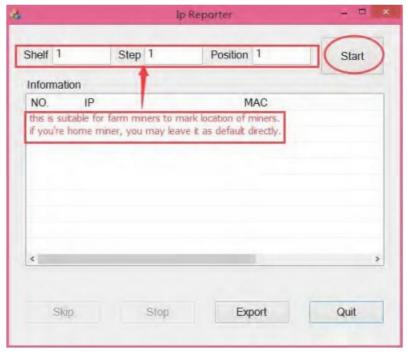

- Inlet water temperature
- Caution: Wrong input voltage may probably cause server damaged
- Three-phase AC input, 10A per wire
- Operation altitude is recommended below 2000m

## **Setting up the Server**

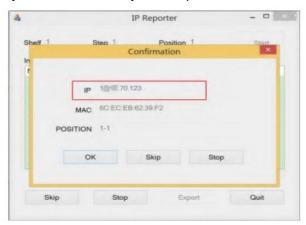

To set up the server: The file IPReporter.zip is supported by Microsoft Windows only.

Go to the following site: <a href="https://service.bitmain.com/support/download?product=IP-reporter">https://shop.bitmain.com/support/download</a>

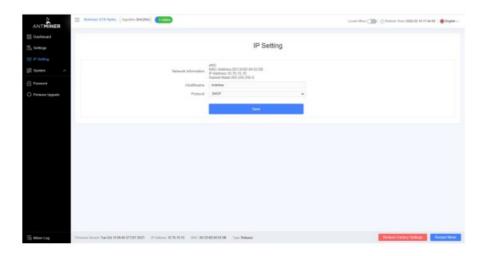

- 2. Download the following file: IPReporter.zip.
- 3. Extract the file.
  - The default DHCP network protocol distributes IP addresses automatically.
- 4. Right-click IPReporter.exe and run it as Administrator.
- 5. Select one of the following options:
  - Shelf, Step, Position suitable for farm servers to mark the location of the servers.
  - **Default** suitable for home servers.
- 6. Click Start.

- 7. On the control panel, click the IP Report button. Hold it down until it beeps (about 5 seconds).
  - The IP address will be displayed in a window on your computer screen.

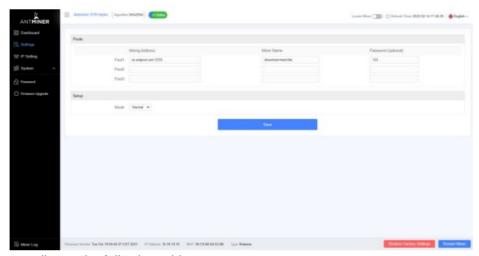

- 8. In your web browser, enter the IP address provided.
- 9. Proceed to login using root for both the username and password.
- 10. In the Protocol section, you can assign a Static IP address (optional).
- 11. Enter the IP address, Subnet mask, gateway, and DNS Server.
- 12. Click "Save".
- 13. Click <a href="https://support.bitmain.com/hc/en-us/articles/360018950053">https://support.bitmain.com/hc/en-us/articles/360018950053</a> to learn more about the gateway and DNS Server.

## Configuring the Server Setting up the Pool

## To configure the server:

1. Click Settings as below.

2. Set the options according to the following table.

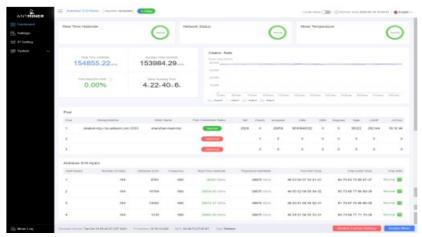

Option	Description
Mining address	Enter the address of your desired pool.  The S19 Hydro servers can be set up with three mining pools, with decreasing priority from the first pool (pool 1) to the third pool (pool 3). The pools with low priority will only be used if all higher-priority pools are offline.
Name	Your worker ID on the selected pool.
Password (optional)	The password for your selected worker.

3. Click Save after the configuration.

## **Monitoring Your Server**

To check the operating status of your server (taking S19 hydro 151.5T as an example):

1. Click the dashboard marked below to check the server status.

- **Note:** The frequency of the S19 Hydro server is fixed at the value of 600 MHz. Firmware will stop running when the Temp (PCB) reaches 80°C or the water temperature is either greater than 65°C or lower than 20°C there will be an error message "Fatal Error: Temperature is too high!" shown on the Bottom of the Kernel log page.
- 2. Monitor your server according to the descriptions in the following table:

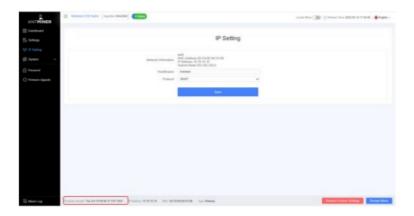

Option	Description
Number of chips	Number of chips detected in the chain.
Frequency	ASIC frequency setting.
Real Hashrate	Real-time Hashrate of each hash board (GH/s).
Inlet Temp	Temperature of the inlet (°C).
Outlet Temp	Temperature of the outlet (°C).
	One of the following statuses will appear:
Chip state	The Green Icon – indicates normal
	The Red Icon— indicates abnormal
l	

## **Administering Your Server**

Checking Your Firmware Version

## To check your firmware version:

- 1. Enter the backstage of your server, and find the firmware version on the bottom.
- 2. File System Version displays the date of the firmware your server uses. In the example below, the server is using firmware version 20211019.

## **Upgrading Your System**

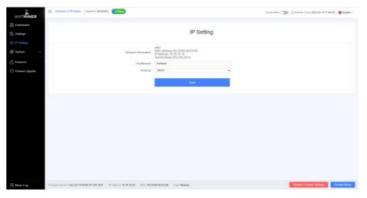

Make sure that the S19 Hydro server remains powered during the upgrade process. If power fails before the upgrade is completed, you will need to return it to Bitmain for repair.

## To upgrade the server's firmware:

1. In System, click Firmware Upgrade.

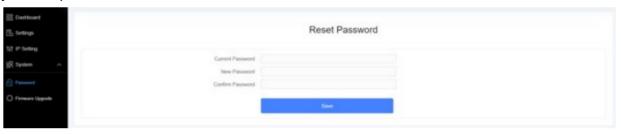

- 2. For Keep Settings:
  - Select "keep settings" to keep your current settings (default).
  - Unselect "keep settings" to reset the server to default settings.
- 3. Click the button and navigate to the upgrade file. Select the upgrade file, then click Update.
- 4. When the upgrade is completed, restart the server and it will turn to the settings page.

- 5. Click one of the following options:
  - **Reboot** to restart the server with the new firmware.
  - Go Back to continue mining with the current firmware. The server will load the new firmware the next time it is restarted.

## Modifying Your Password To change your login password:

- 1. In System, click the Password tab.
- 2. Set your new password, then click Save.

### **Restoring Initial Settings To restore your initial settings**

- 1. Turn on the server and let it run for 5 minutes.
- 2. On the control panel, press and hold the Reset button for 10 seconds.

Resetting your server will reboot it and restore its default settings. The red LED will automatically flash once every 15 seconds if the reset is operated successfully.

### **Environmental Requirements**

Please run your server under the following requirements

## **Basic Environmental Requirements Climatic Conditions:**

Description	Requirement
Operating Temperature	-20-50°C
Operating Humidity	20-90%RH (non-condensing)
Storage Temperature	-20-70°C
Storage Humidity	5-95%RH non-condensing
Altitude	<2000m

### Site Requirements of the Server Running Room:

- Please keep the server running room away from industrial pollution sources:
- For heavy pollution sources such as smelters and coal mines, the distance should be more than 5km.
- For moderate pollution sources such as chemical industries, rubber, and electroplating industries, the distance should be more than 3.7km.
- For light pollution sources such as food factories and leather processing factories, the distance should be more than 2km.
- If unavoidable, the site should be chosen in the perennial upwind direction of the pollution source.
- Please do not set your location within 3.7km from the seaside or the salt lake. If unavoidable, it should be built as airtight as possible, and equipped with air conditioning for cooling.

### **Electromagnetic Environmental Conditions:**

- Please keep your site away from transformers, high-voltage cables, transmission lines, and high-current
  equipment, for example, there should be no high-power AC transformers (>10KA) within 20 meters, and no
  high-voltage power lines within 50 meters.
- Please keep your site away from high-power radio transmitters, for example, there should be no high-power radio transmitters (>1500W) within 100 meters.

## Other Environmental Requirements

• The server running room shall be free of explosive, conductive, magnetically conductive, and corrosive dust.

The requirements of mechanical active substances are shown below:

## **Requirements of Mechanical Active Substances**

Mechanical Active Substance	Requirement
Sand	<= 30mg/m <sup>3</sup>
Dust (suspended)	<= 0.2mg/m <sup>3</sup>
Dust (deposited)	<=1.5mg/m <sup>2</sup> h

### **Requirements of Corrosive Gas**

Corrosive Gas	Unit	Concentration
H2S	ppb	< 3
SO2	ppb	< 10
Cl2	ppb	<1
NO2	ppb	< 50
HF	ppb	<1
NH3	ppb	< 500
O3	ppb	< 2
		·

**Note:** ppb (part per billion) refers to the unit of concentration and 1ppb stands for the volume ratio of part per billion.

## **FCC**

## Regulations FCC Notice (FOR FCC CERTIFIED MODELS):

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- 1. This device may not cause harmful interference,
- 2. this device must accept any interference received, including interference that may cause undesired operation.

## Note:

This equipment has been tested and found to comply with the limits for a Class A digital device, according to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used under the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

## EU WEEE: Disposal of Waste Equipment by Users in Private Households in the European Union

This symbol on the product or on its packaging indicates that this product must not be disposed of with your other household waste. Instead, it is your responsibility to dispose of your waste equipment by handing it over to a designated collection point for the recycling of waste electrical and electronic equipment. The separate collection and recycling of your waste equipment at the time of disposal will help to conserve natural resources and ensure that it is recycled in a manner that protects human health and the environment. For more information about where you can drop off your waste equipment for recycling, please contact your local city office, your household waste disposal service or the shop where you purchased the product.
