BLACKVUE External Connectivity Module (CM100LTE)

In the box

Check the box for each of the following items before installing the BlackVue device.

	Connectivity module		SIM eject tool
	Cable Clips (4ea)		Double-side tape
	User guide		SIM activation guide
	Screw Driver		

At a glance

The following diagram explains details of the external connectivity module.

Install and power up

Install the connectivity module at top corner of the windshield. Remove any foreign matter and clean and dry the windshield before installation.

Warning: Do not install the product in a location where it can obstruct the driver's field of vision.

- Turn off the engine.
- Unscrew the bolt that locks the SIM slot cover on connectivity module. Remove the cover, and unmount the SIM slot using the SIM eject tool. Insert the SIM card into the slot.

- Peel off the protective film from the double-sided tape and attach the connectivity module to the top corner of the windshield.

- Connect the front camera (USB port) and the connectivity module cable (USB).

- Use the pry tool to lift the edges of the windshield trim/molding and tuck in the connectivity module cable.
- Turn on the engine. The BlackVue dashcam and connectivity module will power up.

Note

- For full details on installing the dashcam on your vehicle, refer to the “Quick Start Guide” that is included in the BlackVue dashcam package.
- SIM card must be activated to use LTE service. For details, refer to the SIM Activation Guide.
