blink RC1 XbotGo Remote Controller

Product Information

Remote Controller Specifications

- **Model:** XbotGo Remote Controller
- **Battery Model:** [battery model]
- **Signal Coverage Range:** [signal coverage range]
- **Temperature:** [temperature range]

Quick Start Guide

1. Open the battery compartment cover, then remove the insulating plastic sheet from the bottom of the battery and close the battery compartment cover.
2. Press and hold the power button for [duration] seconds to turn on/off the remote controller.
3. After turning on, press the function selection button to switch functions.
4. If the controller is powered on, the phone connection indicator flashes red.
5. To exceed the signal range (meters), the red menu indicator light and the circular ring light on the remote control will flash, indicating that the remote controller has been disconnected from the APP. If it returns to the reception range in less than a minute, the remote controller's blue light will turn on, and the connection will be automatically restored.
6. Sleep mode and Shutdown: The remote controller enters the dormant state without any operation. In the dormant state, press any button on the remote control to enter the connected state. After sleeping for more than five minutes, the remote control will automatically shut down. Press the power button and then close the device again after turning on to reconnect.

Note:

The disconnection of the remote controller during use will not affect the APP running on the phone. If the APP cannot find the remote controller during use, you can reset the remote controller by pressing the power button for [duration] seconds, then perform the pairing again.

Buttons and Functions

Before you use it, get familiar with the remote controller.

- **A.** Power Button
- **B.** Function Selection Button
- **C.** Confirm Button
- **D.** Directional Buttons (Circular Disk)
