User Manual
Model: T7

Headphone Overview

Notes on usage and operation:

Power on / off

Toggle the power-on key of Bluetooth to control the power-on / power-off of the headset.

Bluetooth Pairing:

1. The earphone will automatically enter the pairing mode after starting up.
2. Start the Bluetooth of the mobile phone, search / add Bluetooth devices, and select " T7" among Bluetooth devices that founded(some devices need to enter the password " 0000").
3. Headphones that have been successfully paired will automatically enter the reconnection mode after being turned on, and will automatically connect with the device that was successfully paired last time.

Music Control:

Click the multifunctional key to control the pause/play of music Click the key of volume up to increase the volume, and press and hold to switch to the next song. Click the key of volume down to lower the volume and press and hold to switch to the previous song.

Incoming Call Control

When there is a coming call, click the multifunctional key to answer the call, and click again to hang up the call. You can also tap the right shell of the earphone twice with your finger to answer the incoming call when someone calls in, and tap the right shell of the earphone twice again to hang up the call. When there is a incoming call, you can press and hold the multifunctional key to reject the call.

ANC Active Noise-cancelling:

Toggle the ANC active noise-canceling switch, the green indicator light will turn on for a long time and it means that the noise reduction feature will turn on. When the ANC switch is toggled again, the green indicator close down automatically, and it means that the noise reduction feature is turned off.

ANC Shift Switch:

Double-click the ANC shift switch to change the ANC gear position. (Shift between High and Low) Note: ANC shift feature is only effective both in Bluetooth mode and ANC turned on. The default degree of ANC is high-level.

Intelligent Playback:

Taking off the earphone when playing music, the music being played will automatically pause , and when you put on the earphone again, the music will play automatically.

Line-In Music Playing:

Use a 3.5mm to Type-C audio cable to connect headphones with mobile phones. computers and other devices to play music. Note: The headset must be turned off when using this feature. (This product does not give away audio cable, if necessary, please purchase audio cable through Bluedio official store)

Line-out Music Playing

First, connect the headphone No. 1 with the mobile phone via Bluetooth, then turn off ANC feature, and use the 3.5mm to Type-C audio cable to connect the headphone No. 1 with the headphone No. 2 to play music.

Note: ANC must be turned off when using the above feature. Headset No. 2 must support a 3.5 connector. (This product does not give away audio cable, if necessary, please purchase audio cable through Bluedio official store)

Charge Headset

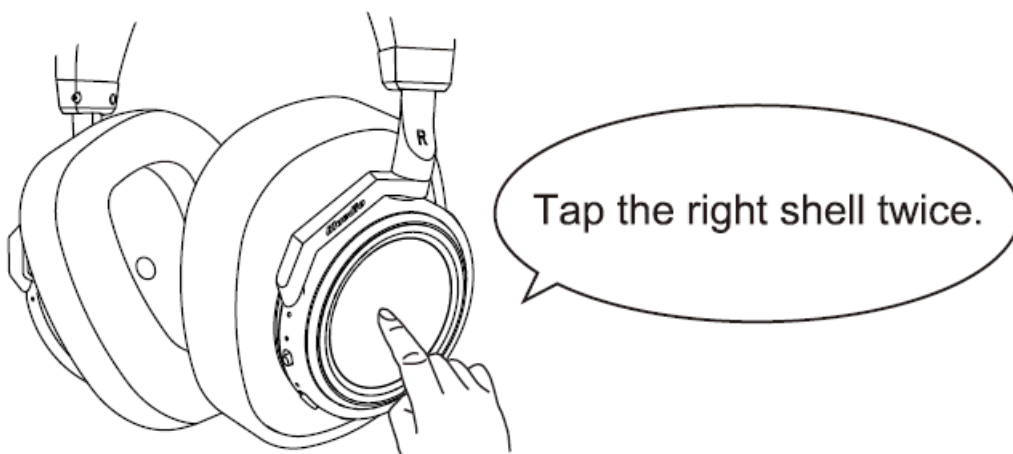

Turn off the headphones before charging, and use the standard charging cable to charge. When charging, the red indicator will be on all the time. It takes 2 hours for the headphone to be fully charged, and the blue indicator will be on after it is fully charged.
