TRACKER LOCK

Setting your own combination

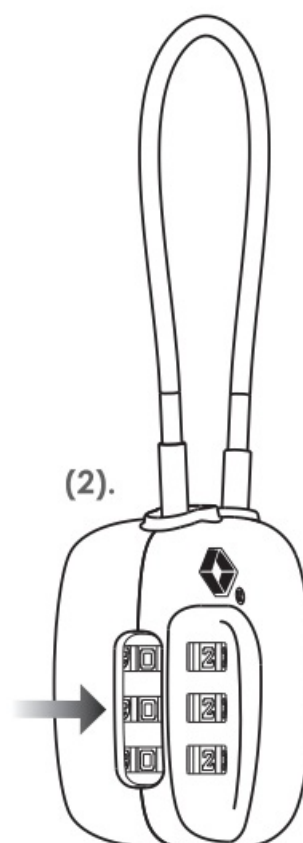

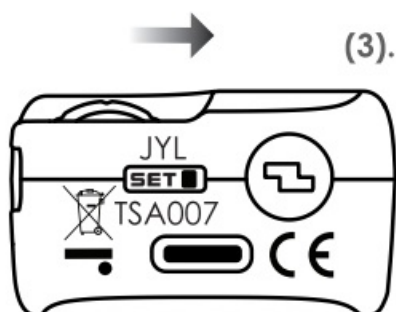

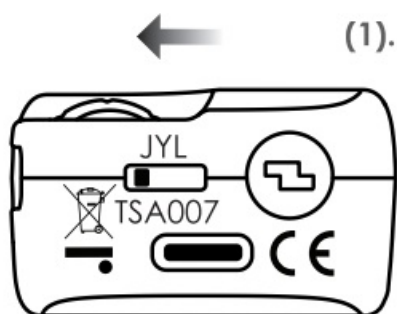

The factory combination number is set at 0-0-0.

To set your own number

1. Keep at the factory 0-0-0 setting, slide the combination “SET” switch [left] so the word “SET” disappears.
2. Turn the number wheels, to set your number, NOTE, this is the window on the side of the lock.
3. Slide the combination “SET” switch (right) so you can see the word “SET”. Your new number is now fixed.

You can change your combination and reset your lock by following the above steps as often as you like. Keep your combination in a safe and accessible place for future reference.

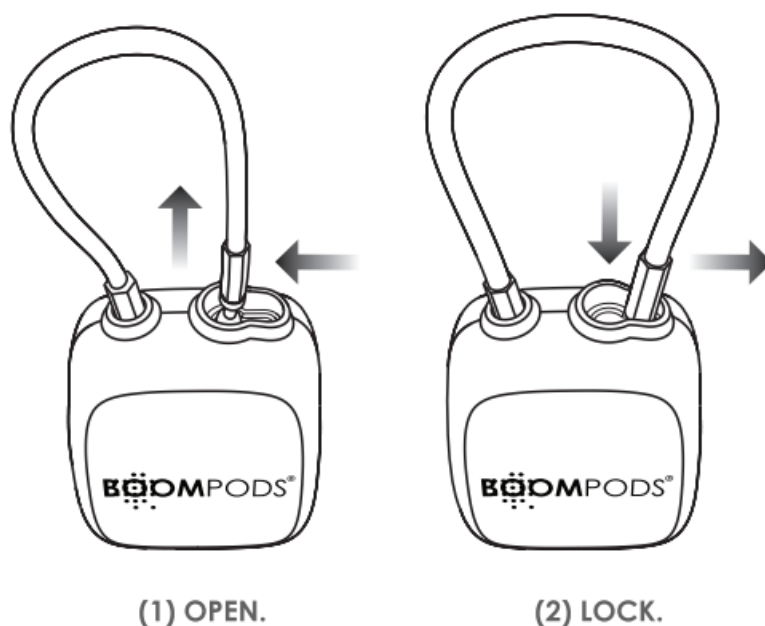

Using the cable

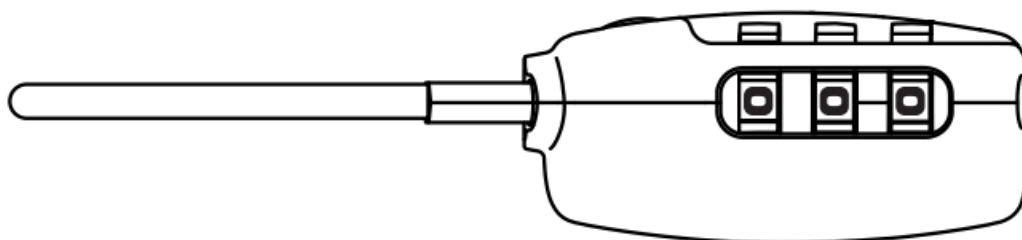

Now that you have set your combination number, you can use the cable lock.

1. Slide the right side of the cable over to the left, and then pull up.

2. To lock. simply place the cable back into the larger hole, and it will automatically slide into the locked position.

No Key Is provided. There Is no possibility to reset the lock if you have forgotten the code, so please record your combination In a safe and accessible place for future reference.

I HAVE FORGOTTEN MY COMBINATION

Unfortunately, once you set your combination on your lock, it cannot be overridden. You may be able to recover your combination if you have some time and patience. If your lock is a 3 digit combination lock, and you have about 30 minutes to spare, then please try all of the possible combinations from 000-999 (000, 001, 002, 003 through to 999). You may think this will take a long time, but it should not take you more than 30 minutes, and if you can remember the first digit of your forgotten code then it will take significantly less than 30 minutes. Try it out, as it will save you from potentially having to buy a new lock.
