Package Include

- 1 x 200 LED Decorative String Light
- 1 x Power Adapter
- 1 x Remote Control (include the CR2025 battery)
- 1 x Instruction Manual

Specification

Material: Copper + Plastic

Dimension: 66ft(20m)

LED quantity: 200 LED

Power lead length: 3.5m(11.5ft)

Waterproof Rate: IP44

Modes: 8 Lighting Modes

Rated **voltage:** 29V(US)

Wattage: 6w

Features

1. 8 Lighting Modes: Combination, In waves, Sequential, Slo-glo, Chasing/ flash, Slow fade, Twinkle/ flash, Steady on.
2. Low Voltage: Operating with 29V DC output voltage, it has excellent heat dissipation and it's safe to touch.
3. Dimmable: 100%-75%-50%-25% 4 level brightness.
4. Timer Function (3 types):
 - 6H: 6 hours on, 18 hours off.
 - 8H: 8 hours on, 16 hours off.
 - 6639H: 6 hours on, 6 hours off, 3 hours on, 9 hours off.
5. Convenient memory function:

The light will always keep the last mode you set for next time use.

Instructions for use:

1. Connect to power supply first to ensure that the lights work before installing.
2. Control the decorative lights using the buttons on the remote or the button of the power adapter.
3. The use of the button of the power adapter:
 - Turn off the light: Please long press the button 2 seconds.
 - Turn on the light: Please press the button.
 - Change Lighting Mode: Press the button to change mode.
 - Turn on the timer function: Please long press the button 3 seconds, then the green indicator light on, timer activated.
 - Turn off the timer function: Please long press the button 2 seconds, then the green indicator light off, the decorative light turn off also.
4. If you meet any quality issues, please contact us from "GET HELP WITH ORDER" under the order ID, we will offer free replacement or quick refund. Thank you!

Button of the Power Adapter

How to set timer function

1. Press the '6H', '8H' or '6639H' button of the remote toward the power adapter, then the indicator light on, timer activated.
2. You can also press the button of the power adapter 3 seconds, then the indicator light on, timer activated. 6 hours on, 18 hours off.

How to use the remote

1. Please take off the plastic on the remote battery before using it!
2. Make sure the remote control faces the power adapter.
3. Please try to change batteries, if the remote doesn't work!
4. Please store the remote control in a cool, dry place when not in use.

Please Note:

1. The remote has a CR2025 battery included and pre installed.
2. Replace battery per Instructions.
3. The Plug of the string lights is not waterproof. Be sure to protect plug from the rain. You can place it in a water proof outdoor power cord box or use a plastic bag to wrap the plug.

How to Extend: Optional

How To Install String Lights

If you need to wrap the light around a post or tree trunk, please see the following installation steps

Step 1: After receiving the product, please check whether the package is complete.

Step 2: Plug in the power supply first and check whether the light can be used normally.

Step 3: If you need to wrap the lights around the door post, do not unwind the lights (In order to facilitate transportation, the string lights will be fixed into a column). Find the plug first and unwind part of the light along the plug. Make sure to leave enough slack for the plug to reach an extension cord or electrical outlet.

Step 4: The rest of the light is recommended not to unwind, pick up string lights and starting at the bottom of door post, slowly winding on the door post or tree.

If you need to hang string lights in the eaves or other places, please see the following installation steps

Step 1: After receiving the product, please check whether the package is complete.

Step 2: Plug in the power first and check whether the light can be used normally.

Step 3: Measure the size of the place you need to hang. You can find the plug of the string lights and unravel the length of the corresponding size along the plug.

Step 4: Secure the hooks and clips in your chosen location.

Spread out the hooks evenly to prevent the light strings from drooping or gaping. Or you can also use Plastic Zip Ties or Ropes to fix it. (The package does not contain the hooks, clips, Plastic Zip Ties and the Ropes.)

Step 5: Carefully attach the light strands using the clips or the hooks. Make sure each section is free of tangles or twists.

Step 6: Then repeat the above installation steps to continue hanging the remaining part of the string lights.

Safety Tips For Hanging String lights

1. When using a ladder, make sure to set it down on a dry and level surface.
2. Have someone hold the ladder at the bottom to keep it from shifting throughout the process.
3. Use insulated nails or hooks to minimize electrical hazard.
4. Do not pull or twist String lights.

Our some suggestions

Plan Your Design:

The best way to hang Christmas lights outdoors is to start with a plan: Pick a Focal Point: For example, if you have columns that frame your entryway, that may be where you want to start.

Without a focal point, Christmas lights for a house or landscape look chaotic, and chances are good the final look won't be what you'd hoped for.

Consider the Surface: For example, if you want lights on the roofline or eaves, check factors such as gutter thickness and shingle flexibility. Other popular spots for outdoor Christmas lights include:

1. On bushes, hedges and trees
2. Around pillars, posts or deck railings
3. Around windows, door frames and other architectural features
4. Along driveways and pathways
5. Inside window boxes and planters

Make sure you have a way to hang lights on each of the surfaces you plan to decorate.

Measure Light Locations:

Calculate Lights for the Landscape: The number of lights you'll need to decorate trees and shrubs is a matter of personal preference, but as with your Christmas tree, a good rule of thumb is 100 lights for every 1-1/2 feet of tree or shrub you want to cover.

So, a 6-foot evergreen needs at least 400 lights for a basic level of lighting.

For a more striking effect, stagger two sets of lights side by side or look for lights that are spaced closer together. Denser lights equal a brighter display.

Warranty

We support 12 months of after-sales service 24-hour online customer service, please do not hesitate to contact us from "GET HELP WITH ORDER" under the Amazon order ID if you have any questions!

With Other People Share Joyful

The true joy of the holidays is in sharing experiences with others.

We'll show our creative and thoughtful ways to spread holiday cheer and safely enjoy time with our friends and loved ones.
