Example of key setting method

Example 1: The pasted key combination Ctrl + V set to key1

1. Enter the key setting interface, and then select key1 with the mouse

2. On the lower left side, select "Ctrl Shift Alt" column, click Ctrl, and then click the letter C, as shown below

3. The interface after selection is as follows. After confirming that Ctrl and C are selected normally, click the download button.

4. Next, you can copy the content first, and then press key1 on the keyboard product to confirm the effect after setting.

Example 2:++ENTER combination set to key2

1. The selection method is the same, first select Key2, then click + twice and enter once.

2. Click download after selecting:

Knob setting method

1. For a keyboard with only one knob, the corresponding number of the knob is "K1".

2. K1 left refers to counterclockwise rotation, K1 centre refers to pressing, and K1 right refers to clockwise rotation.

3. For example, if the knob is pressed set to pause or play, the next song is clockwise, the previous song is counterclockwise, or it is used for volume control. After pressing the corresponding selection, the download will take effect. (of course, other key values can also be written)

4. After selection, enter the multimedia column for setting:

KEY	Play/Pause	Prev Song	Next Song
Ctrl Shift Alt	Mute	Volume+	Volume-
