BUTURE Beta05 Jump Stater

Specifications

- **Product:** Beta05 Jump Starter
- **Input:** USB-C
- **USB Outputs:** USB1, USB2 (18W)
- **Features:** Jumpstart Port, LED Light, Power Button, Power Level Indicator, Force Start Button
- **Compatibility:** 12V vehicles

Product Usage Instructions

Jump Start Your Car

1. Insert the jumper cable into the jump starter.
2. Connect the clamps to the car battery (red to +, black to -).
3. The jumper cable indicator turns solid green.
4. Start your car engine.

Force Start Function

1. If the car doesn't start after three attempts, use the Force Start Function:
    1. Press the force start button for 5 seconds.
    2. The jumper cable indicator turns green.
    3. Start your car engine.

Recharge

1. Insert the charging cable into the USB-C port.
2. Connect to a corresponding adaptor (not included).

Charge Electronic Devices

1. Plug the cable into any USB output port.
2. Press the power button to start charging.

LED Lighting

- Press the power button for 3 seconds to cycle through lighting modes:
    - Press shortly for a white strobe light.
    - Press shortly for the orange strobe light.
    - Press shortly for the SOS signal.
    - Press shortly to turn off the light.

Precautions

- Do not use it with less than 10% power.
- Recharge every 3 months.
- Wait 30 minutes before recharging after starting the car.
- Allow at least 60 seconds between starts to prevent overheating.

Important Safety Warning

- Store in a cool, well-ventilated place away from children and pets.
- Do not use it if the clamp or cable is damaged.
- Avoid connecting red and black clamps during output.

FAQ

- **Q:** What should I do if the indicator shows a solid red light?
- **A:** Follow the specific instructions provided based on the pattern of beeps and lights. If unsure, contact **support@ibuture.com** with details.

JUMP START YOUR CAR

1. Insert the jumper cable into the jump starter and connect the clamps to the car battery (red to +, black to -).
2. The indicator of the jumper cable turns solid green.
3. Start your car engine.

ABOUT THE FORCE START FUNCTION

- If three attempts fail when you correctly connect the clamps to your car, you can use the Force Start Function to enter boost mode.

3 steps to fix the problem

1. Press the force start button for 5 seconds.
2. The indicator of the jumper cable is green.
3. Start your car engine.

Warning: When using the Force Start Function, auto-detection and safety features will be disabled.

ABOUT THE TROUBLESHOOTING
In any of the following situations, the smart clamp will turn protections on:

| Indicator	Situations
Solid red light	· Jump starter battery is low and needs to be charged · Startup Timeout Protection —Press the force start button for about 3 until the indicator turns to steady green. It means that it returns to work
Solid red light with slow and brief beeps	· Reverse Charge Protection —Reconnect to try again
Solid red light with quick and brief beeps	· High-Temperature Protection —Remove the clamps to let it cool · Relay Short-circuit —Jumper cable failure. Contact **support@ibuture.com** with details
Solid red light with regular long and short beeps	· Short-circuit Protection — Do not connect smart clips or to the same metal · Reverse-connection Protection — Reverse smart clip to ensure the right connection · Over Limit Protection —Reconnect to try again
The green light flashes 5 times, then the red light is always on	· Five Intervals of Start-up Protection —Press the force start button for about 3 until the indicator turns to steady green. It means that it returns to work
Other	Please contact **support@ibuture.com** with details
