Cameras P2P Mini Camera WiFi Camera SQ13 User Manual

P2P Camera

Warm tips:

1. Please charge the camera for 2 hours with a 5V/1 A LISS Charger before using it.
2. Make sure to format the Micro SD card into FAT32 before using it. (Power on without a Micro SD card inserted:
The red indicator light flashes twice slowly and then oil)
3. Make sure to tear the lens protection film off before using it, or it will affect the recording quality.
4. 1k sure to charge the battery at least once a month to prevent the battery from entering an aging state.

Damage caused by human factors is not covered by the warranty. After-sales Email: eu-sale@server.com

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Warning: Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment

Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance 20cm between the radiator and your body.
