battery life   low battery   battery level

- Charging, this machine is built with a rechargeable lithium battery. The first time you use this machine, please charge it. The charging indicator light is always on, full off, you can charge by the following ways.
- Connect to the computer for charging, and use a USB cable to connect to the computer.
- Use the power adapter or mobile power to charge.
- Charge the battery after each use, about 3 hours to fill up (charging time depends on the adapter), and then charge the battery for another 20 minutes as much as possible after filling up to ensure the battery is full for use.

Suggestion: Try not to use the function while charging, it may cause the battery as well

as the TF card to be damaged!

Note:
Usage scene:

- Please strictly abide by relevant laws of the country where the product is used, and do not use this product for any illegal purpose, otherwise, you should bear the consequences.

Operating temperature:

- Please use the product at the natural temperature and do not use it in temperature where human body can not adapt to.

Working humidity:

- Please use it in human suitable environment humidity, this product only supports IP66 waterproof, please use it in standardized scenes.

Shooting requirements:

- Please use the product in an environment with sufficient light sources and do not direct the camera at the sun and other strong light sources to avoid damage to optical devices.

Cleaning requirements:

- Do not use the product in an environment with too large dust density so as to avoid the lens and other components contaminated with dust, which will affect the camera effect. (If the lens has fingerprints or dust, please use clean soft material dust-free cloth to wipe it).

FCC STATEMENT

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference.
2. This device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, under Part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used under the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment to an outlet on a circuit different from that to which the receiver is connected
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet the general RF exposure requirements. The device can be used in portable exposure conditions without restriction
