BUILDING THE TOWER

Place the 54 blocks on a flat surface. Then, pile up the blocks in rows of 3 until you have a tower of 18 rows. Every row has 3 parallel blocks, perpendicular with the previous row on the horizontal line.

COURSE OF PLAY:

Can be played alone, by two players or by teams of two or more.

You must use only one hand to touch the blocks.

- 1. Choose which person begins to play.
- 2. Remove one block by pushing or pulling it from any level of the tower, except for the top row.
- 3. Place the block on top of the tower.
- 4. Taking turns, each player removes a block and places it on top, completing a row of 3 blocks. The top row must be completed before starting a new one.

GAME'S GOAL:

Keeping the tower balanced and replacing as many blocks as possible on top.

END OF THE GAME:

The last player to stack a block without making the tower fall wins the game. The game is lost and ends when a player makes the tower fall.

The person who made the tower collapse starts the next game.
