CANTON S2 Changelog Smart Soundbox 3

Release Datum: 13.03.2023

New firmware revision

MCU Host	4123/7123
BLV	016
WiFi	15379
STS wireless	1.22
DSP	0.60
Chromecast built-in®	1.52.272222

Old firmware revision

MCU Host	4117/7117
BLV	013/015
WiFi	15271
STS wireless	1.17
DSP	0.60
Chromecast built-in®	1.52.272222

New functions and changes

- New menu item “ Touch Panel (TCH)” added to menu “System setup”. The function is intended to

enable/disable the Touch panel via the optional remote control.

- Added the function to connect the Soundbox 3 Smart wired to a Smart connect 5.1. With this function the control commands will be transmitted wirelessly between the Smart connect 5.1 and the Soundbox 3, while the Audio data will be transmitted wired from the analogue outputs of the connect to the AUX input of the Soundbox 3.
- Soundbox 3 is now prepared for being controled via the Canton Smart APP.

Bug fixes

General stability improvements
