CloudMesh Satellite CMS2

Product Information: CloudMesh Satellite

The CloudMesh Satellite is a device that provides seamless Wi-Fi coverage in your home or office. It is designed to extend the range and improve the signal strength of your wireless network.

Features:

- Seamless Wi-Fi coverage
- Easy setup with the CloudMesh app
- Supports Wi-Fi 6 technology
- Multiple Satellites can be added for expanded coverage
- LED indicator for status and connectivity

Package Contents:

- CloudMesh Satellite
 - Power adapter
 - Ethernet cable
-

Product Usage Instructions:

1. Download the CloudMesh app from the App Store or Google Play.
2. Plug in the power adapter of the CloudMesh Satellite and power it on.

3. Connect one end of the Ethernet cable to either of the network ports on the CloudMesh Satellite.
4. Plug the other end of the Ethernet cable into a LAN port on your router.
5. Wait for the LED indicator on the Satellite to light up in white, indicating it is ready for use.
6. If you have more than one Satellite, use the CloudMesh app to add and configure additional Satellites.
7. To connect your devices to Wi-Fi, either scan the QR code provided by the CloudMesh app or manually search for the wireless network and enter the password.
8. You can manage your wireless network using the CloudMesh app.

Note: The username and password for the wireless network are case sensitive.
