# CC VECTOR

CC VECTOR RV Long Range WiFi Receiver System

## OVERVIEW

## Weather proofing

Before connecting the CC X Mile to the antenna, coat the threads of the antenna with the supplied silicone grease. This will help protect the threads from rust and water incursion.

**NOTE:** The 8dBi Antenna is shown, however the 15dBi Antenna is attached in the same way. Once the antenna is securely screwed onto the CC X Mile, use the supplied coaxial seal to completely cover the connection. We also recommend coating the USB connection with silicone grease and wrapping with the supplied coaxial seal for added protection.

## Mounting Instructions

## Antenna Safety Instructions

### Before Use

Please read these IMPORTANT SAFETY WARNINGS before use. It is important to read and understand all instructions.

### Lightning

You may need to ground your antenna if you live in an area prone to lightning.

### Wind

Installing an antenna on windy days can be dangerous. Slight winds can create strong forces against the antenna equipment.

### Power Lines

- Never mount an antenna near power lines.
- If a power line comes into contact with your antenna, DO NOT TRY TO REMOVE IT. Call your local power company.
- If you have doubts about your ability to install your antenna safely, please hire a licensed, bonded professional to do the work.

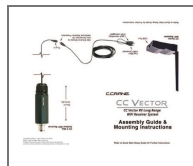

- Crane is not responsible or liable for damage or injury resulting from antenna installations.
