ENGINEER AND ARCHITECT SPECIFICATIONS

Meter Module

- Voltmeter
- Ammeter
-  Listed and ULC Listed
- NYMEA, CSFM and FM Approved

Description

The Cerberus Piezotronics Meter Module, Model MM-35, is designed to provide visual indication of both battery voltage and charging current. It is used in conjunction with Battery Charger Modules, Models BC-35, BE-35 and in systems fitted with emergency standby power.

Both a voltmeter and an ammeter are contained in the MM-35. The voltmeter provides a voltage reading value of the battery at all times while the ammeter shows the charging current.

The Model MM-35 is placement supervised, providing a system trouble signal upon removal from the system.

The Model MM-35 is Underwriters Laboratories, Inc. listed.

Engineer and Architect Specifications

Two meters shall be provided, mounted in a single module assembly for the purpose of indicating the battery voltage and the battery charging current. This module, Cerberus Piezotronics Meter Module Model MM-35, shall be system interconnected by a plug and harness assembly and shall be operable with the main control panel.

The Meter Module, Model MM-35, shall only be used in conjunction with the Battery Charger Module, Model BC-35 and BE-35.

The Model MM-35 shall be placement supervised and shall be Underwriters Laboratories, Inc. listed.

Electrical Information

Current Requirement: Normal — None

Ordering Information

Model No.	Description	Shipping Wt.
MM-35	Meter Module	1 lb. (.45 kg.)

Typical Wiring

bus connector
to plug P2 of
BE-35 or BC-35
