DIMENSIONS	D100*345mm
MATERIAL	Wood/Plastic/Aluminum
POWER	12W . Max
VOLT	DC 5V
LIFESPAN	30000h

## APP Installation Procedure

### How to operate:

1. Download "Smart Life" App (two ways to get the APP)
  - A. Byscan barcode
  - B. Search \* Smart Life " by Google play (for android system). Search " Smart Life " by APP store (for Apple- iOS)

2. Register and sign in APP
  - A. Run the APP.
  - B. Login with your account & password, For the first time using, you have to register a new account.
3. Configuration
  - A. Power the WIFI LED Lamp. If you don't configuration it is a normal LED lamp

## B. How to connection to WiFi:

1. If no network is configured, the white light flashes for 18 seconds and prompt configure network when powering on the device.
2. You can use App configured network within 3 minutes after powering on the device
3. The product can be reset and the network can be cancelled after power on and off for 5 consecutive times.

C. Open the "Smart Life" APP, Click on the button "+" Select the WIFI network and enter the password (if applicable). Tap "next" (**Note:** Currently does not support 5G band WiFi network).

D. The app proceeds through the configuration process. Once connected, the "Add successfully" message appears (The name of the smart lamp in the app is "**ZF-Magic-T5**").

E. If you select "AP mode" after Click the "Add devices", you need go to WiFi settings and connect to hotspot. After connected, search WiFi router (no password). Device is connected.

## How to connect Smart Lamp to Alexa

1. Launch Smart Life App, sign in your account and make sure Smart Lamp is in device list.
2. Modify device name so that Alexa can easily recognize, such as: Living Room Light, Bedroom Light, etc.
3. Minimize Smart Life APP, then launch the Alexa App and sign in your Alexa account and make sure you have at least one Alexa voice-controlled device installed like Echo, Echo dot etc.
4. In the upper left corner of Home page, click <=> button to show App menu. Then click "Skills" in the menu.
5. Type in Smart Life in the search and click the search button next to it
6. Enable Smart Life to the skill, then sign in your Smart Life account to complete the account linking.
7. After linked account successfully, you can ask Alexa to discover devices. Alexa will show all the discovered devices after 20 seconds.
8. Back to Menu by clicking button, and then click button
9. In Smart Home page, you can group your devices for different categories. Your Smart Life APP has been skilled with Alexa. Now you can control your Smart Lamp through Alexa. After your smart lamp is connected with Alexa successfully, you can simply ask Alexa set your lamp like this:

- Alexa (or echo) set [bedroom light] to 50 percent
- Alexa (or echo), increase [bedroom light] to 50 percent.
- Alexa (or echo) set [kitchen light] to blue.

## Warm Tips:

1. Please check whether the device is connected with power and your phone is connected with WiFi.
2. Check routers: If the router is dual-band router, please select a 2.4GHz network to add device. You also need to open the router broadcasting function.
3. Set up the wireless router: Set encryption method as WPA2-PSK authorization type as AES, or set both as auto. The wireless mode cannot be only 5GHz. Please name router WiFi in English. In order to stay strong WiFi signal please keep device and router within a certain distance.
4. Check whether connected devices have reached the Maximum number router connection. If so, please try to

turn off the WiFi connection of some devices.

- 5. Make sure router wireless MAC filtering function is enabled.
- 6. Remove the device from the filter list and make sure that router is not prohibiting device from connection
- 7. Make sure the entered password is correct when adding a new device.
