## Specifications

Lamp socket	E14
Lamp type:	LED, RGB+CCT
Brightness:	470 lm
Lamp voltage:	220 – 240 V- 50/ 60 Hz
Lamp power:	5.5 W
Color temperature:	2700 – 6500 K
APP dimmable:	Yes

## Start

Find and install the 'Smart Life – Smart living' app on App Store or the Google Play store depending on what device you are using. Register an account in the app to be able to proceed. Make sure you are connected to your local network.

Insert the lamp in a lamp socket and turn on the light. The lamp will start flashing. If it does not start flashing, reset the lamp by switching it on and off 3 times, then repeat the process again.

Press 'Add Device' in the app and choose 'Smart Light' from the list (Cleverio RGB + CCT 5.5 W E14). Enter the details for your network in the next step. Wait for the lamp to connect. A prompt will display if the connection was successful. You can now control the lamp in your app. **Note! Since the app needs to update regularly, the pairing process may differ from the manual.** If this happens, please follow the instructions in the app.

If you want to sync the plug to Amazon Echo, Google Home, or other services press 'Me' in the app, then 'More services' and choose the service of your choice and follow the steps.

## Safety information

Only suitable for working temperature between 0 °C to 35 °C. Not for outdoor use. Only for use in dry areas. Don't open or modify the devices in any way, this should only be carried out by a qualified technician due to the risk of electric shocks or short circuit.
