Club 3D CSV-1564 GEN1 Triple Display PD Charge Dock Installation Guide

Contents

Club 3D CSV-1564 GEN1 Triple Display PD Charge Dock

Thank you for purchasing our CSV-1564 / CSV-1564W65 / CSV-1564W100 Product.
After unpacking the product, please make sure you have all the items provided and checked for any damages. In case of any missing/damaged parts please inform your supplier immediately
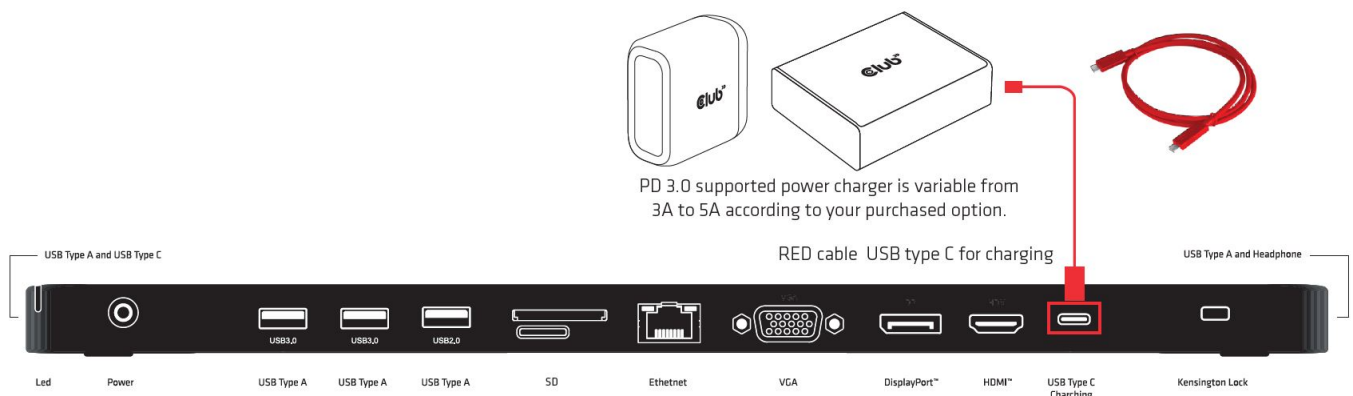

Product Information

The CSV-1564 / CSV-1564W65 / CSV-1564W100 is a docking station that allows you to connect your notebook or host system to multiple displays, peripherals, ethernet, and sound devices. It supports PD 3.0 supported power charger that is variable from 3A to 5A depending on the purchased option. The docking station comes with a black USB Type C cable and a red USB Type C cable for charging.

Product Usage

1. After unpacking the product, ensure that all the items provided are present and check for any damages. In case of any missing or damaged parts, inform your supplier immediately.
2. Connect the black USB Type C cable clicked onto the Dock and connect the angled connector to the Dock at that side of the Dock. Connect the other side of that cable to the USB Type C port of your Notebook/Host system.
3. Connect your preferred Display(s) to the designated connector(s) and power on your Display unit(s), peripherals, ethernet, and/or sound devices.
4. Connect the red USB Type C cable in the Power Charger into the USB Type C connector and the other side to the Marked RED USB Type Connector on the Dock.
5. Plug the Power Charger into a wall socket and switch the Dock ON. The blue indicator should be lit.
6. No need to connect your Host system to the Power Charger as the Dock will Dynamically Charge your Host system.
7. The docking station can be used safely at altitude 2000 meters/6562 feet and below.

If you have any further questions or concerns, please check our forum section on our website **www.club-3d.com**.
