- **Watch Capacity:** [Watch Capacity]
- **Turntable Diameter:** [Turntable Diameter]
- **Cushion Size:** [Cushion Size]
- **Dimensions:** [Dimensions]
- **Net Weight:** [Net Weight]

Product Usage Instructions

Safety Information
Warning! This mechanical watch winder maintains the service of active watches but CANNOT by itself restart completely stopped ones. Manually wind any such stopped watches before placing them on the winder. Similarly, this winder's turntable is bidirectional, alternating between clockwise and anti-clockwise rotation. It is unsuited for use with watches with a unidirectional bezel, such as most premier diving watches.

Operation

1. Open the cover of your watch winder and take out one of the cushions.
2. Loosen your watch strap, place the watch on the cushion wrapping the strap around it, and refasten the strap.
3. Fit the cushion back into place on its turntable.
4. Repeat as needed, using only one watch per cushion. Close the cover.
5. Connect the winder to a stable compatible power source using the provided power cord or fit 2 AA batteries (not included) into the compartment at the bottom of the device.

6. Flip the power switch on the back of the winder to "I". The turntable will rotate clockwise for 2 minutes, pause for 6 minutes, rotate anti-clockwise for 2 minutes, and pause for 6 minutes again before restarting the cycle. For best results, rotate your watches for at least 3 hours each time.

7. When finished, turn off the turntable by flipping the power switch to "O". Unplug it if using a wall socket or extension cord.

4. Flip the power switch on the back of the winder to I. The turntable will rotate clockwise for 2 minutes, pause for 6 minutes, rotate anti-clockwise for 2 minutes, and pause for 6 minutes again before restarting the cycle. For best results, rotate your watches for at least 3 hours each time.
5. When finished, turn off the turntable by flipping the power switch to O. Unplug it if using a wall socket or extension cord.

Maintenance

- Clean the exterior of your watch winder with the provided cloth as needed. Do not use abrasive cleaners or

caustic chemicals.

- If any part of the winder is damaged or shows signs of malfunction, have it repaired or replaced before further use.
- If the winder will not be used for a prolonged period of time, cut off its power before storing in a cool dry place away from direct sunlight and inaccessible to children.
