Operation Guide

Assist Mode

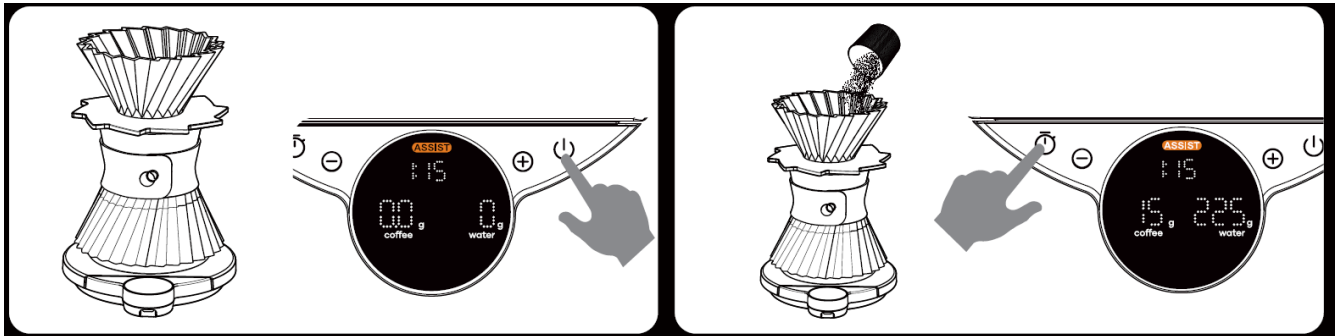

Powder to water ratio

1. Start Assist Mode

Press and hold the [Power Button] for 2 seconds to turn on the device, which defaults to Assist Mode.

2. Setup and Preparation

Adjust your preferred brew ratio by pressing or holding the – or [+] buttons.

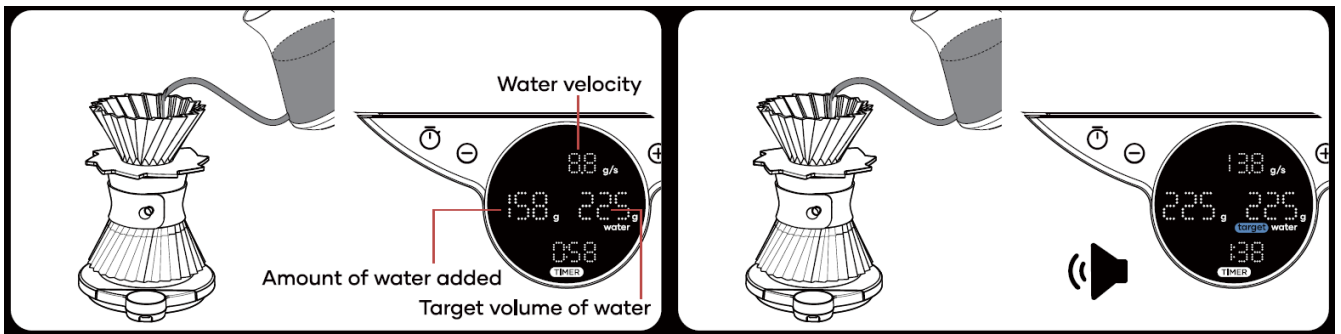

3. Place the equipment

Place the sharing pot and filter cup, then press the [Power Button] to zero the weight.

4. Start Brewing Interface

Add your ground coffee; the device automatically calculates the water needed. Tap the [Timer Button] to start brewing, with the timer and flow rate display enabled.

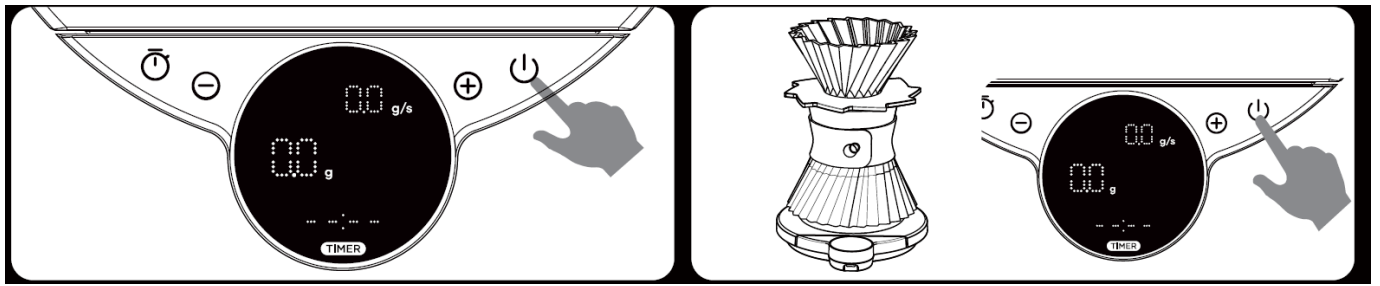

5. Start Brewing

Brew according to your method. The built in timer starts automatically, the top displays real-time flow rate, and upon completion of a brew, it shows the average flow rate for that session.

6. Brewing Complete

The device beeps when the water is 10g short of the target. Its beeps twice and the target icon lights up when the desired water amount is reached, signaling the end of brewing.
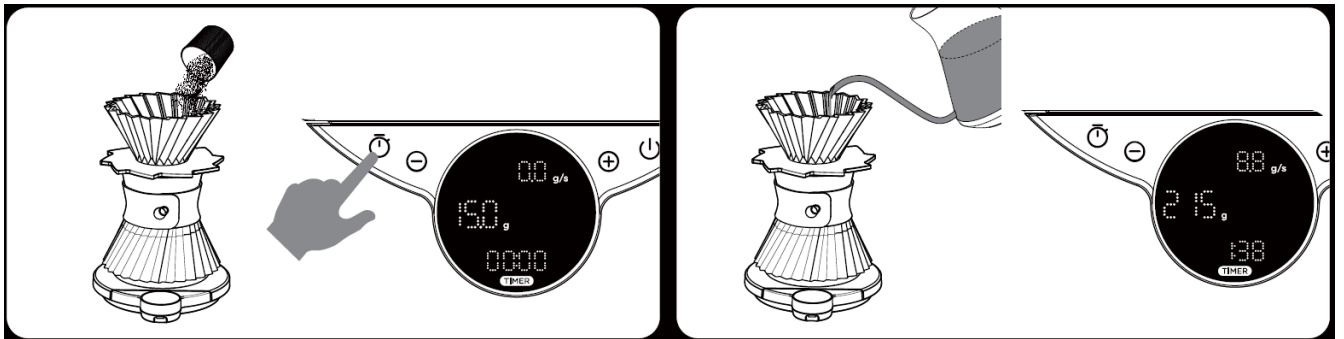

Weigh Mode

1. Weigh Mode

   Double-press the [Power Button] to switch modes and enter Weigh Mode. You can then lightly touch the − /+ to select and switch between different units: g/ml/oz.

2. Preparation

   Place the sharing pot and filter cup, then press the [Power Button] to zero.
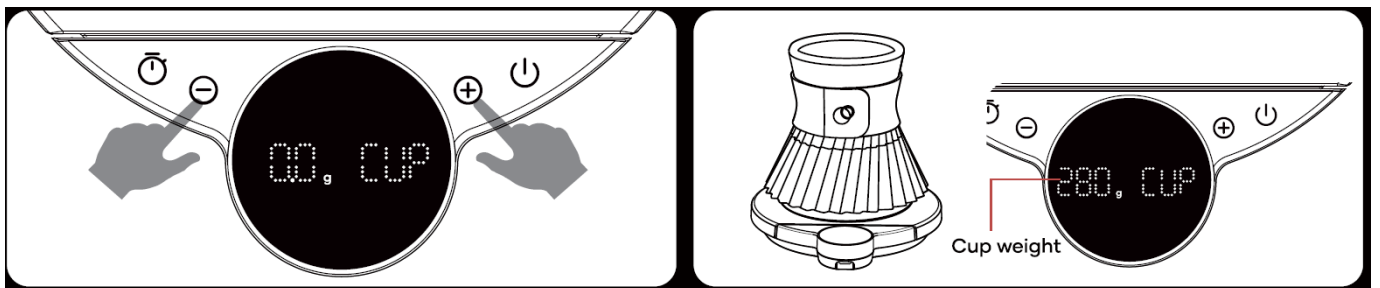

3.

   Start Brewing Interface

   Add your ground coffee, then tap the [Timer Button] to enter the brewing interface and start the automatic timer.

4. Start Brewing

   Add liquid, and the timer will start automatically, with the flow rate displayed at the top.
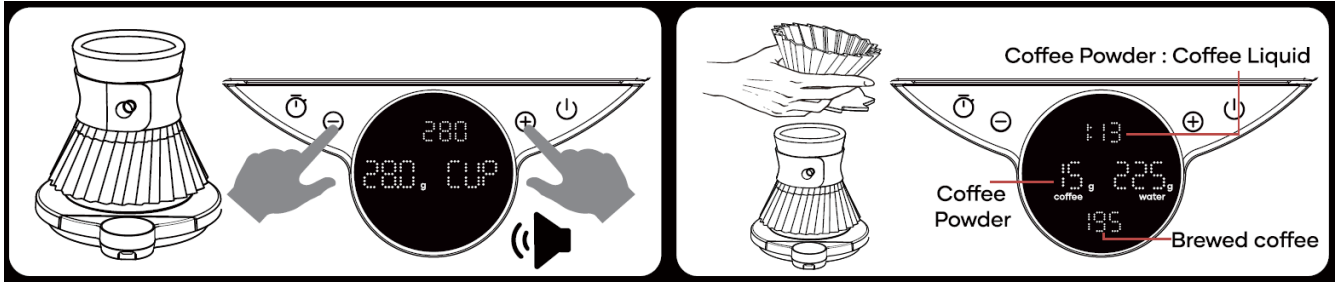

Match Mode

1. Enable Match Mode

   Clear the weighing area, then press the [Power Button] to zero.

   Hold − and + simultaneously for 2 seconds to enable Match Mode.

2. Set a Specific Sharing Cup

Place your designated sharing filter cup on the scale to enter its weight.

3. Complete Setup

   Hold [-] and [+] for 2 seconds. When the weight flashes and the machine beeps twice, the filter cup weight is successful y entered and the device automatically returns to Assist Mode. Add coffee grounds and press the [Timer Button] to brew.

4. Display Extracted Coffee Liquid Weight After completing the brewing in Assist Mode, remove the filter cup to display the coffee liquid weight.

5. Disable Match Mode

Hold [-] and [+] simultaneously for 2 seconds to set the sharing pot weight to O.

NOTE:

Cleaning and Maintenance

1. Coffee liquid can be corrosive. To prevent damage to the scale, please clean any residue from the weighing area promptly.

2. Avoid washing the weighing area With water directly; use a damp cloth to wipe and clean the area to prevent corrosion from coffee liquid.

3. Charging resets the scale to factory settings, clearing saved cup weights. To use Competition Mode again, you'll need to re-input the cup weight manually.

4. Low battery icon appears below 25% ⚡ . Charge soon to avoid power loss.
