FCC Statement

§ 15.19 This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- 1. This device may not cause harmful interference, and
- 2. This device must accept any interference received, including interference that may cause undesired operation of the device.
- § 15.21 Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

§ 15.105 This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.— Connect the
 equipment into an outlet on a circuit different from that to which the receiver is
 connected.
- Consult the dealer or an experienced radio/TV technician for help.

Notice to Users in Canada for IC compliance: This equipment complies with the Class B limits for radio noise emissions from digital apparatus as established by the Radio Interference Regulations of Industry Canada

FCC Radiation Exposure Statement

The modular can be installed or integrated in mobile or fix devices only. This modular cannot be installed in any portable device; for example, USB dongle-like transmitters are forbidden. This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This transmitter must not be colocated or operate in conjunction with any other antenna or transmitter. If simultaneous with other transmitters

is required, re-evaluation of RF Exposure is required according to KDB 996369. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

If the FCC identification number is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains Transmitter Module FCC ID: TK4WLE7002E25 Or Contains FCC ID: TK4WLE7002E25

When the module is installed inside another Host, the user manual of the host must contain below warning statements:

- 1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
 - 1. This device may not cause harmful interference, and
 - 2. This device must accept any interference received, including interference that may cause undesired operation.
- 2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

The devices must be installed and used in strict accordance with the manufacturer's instructions as described in the user documentation that comes with the product.

The host product manufacturer is responsible for compliance to any other FCC rules that apply to the host not covered by the modular transmitter grant of certification. The final host product still requires Part 15 Subpart B compliance testing with the modular transmitter installed. The end user manual shall include all required regulatory information/warning as shown in this manual, including: This product must be installed and operated with a minimum distance of 20 cm between the radiator and user's body.

Antenna Type and Gain

The following antennas have been certified for use with this module. Antenna Specification list below:

Antenna No	Antenna Type	Frequency Band (GHz)	Max Antenna Gain (dBi)
1	Omni	2412 ~ 2462	4
		5150 ~ 5850	6
2	Omni	2412 ~ 2462	2.83
		5150 ~ 5850	3.98
3	Omni	2412 ~ 2462	2.22
		5150 ~ 5850	4.29
4	Omni	2412 ~ 2462	1.27
		5150 ~ 5850	3.68
5	Omni	5150 ~ 5850	3.51
6	Omni	5150 ~ 5850	3.49

IC Statement

This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions:

- 1. This device may not cause interference, and
- 2. this device must accept any interference, including interference that may cause undesired operation of the device.

IC RF Exposure statement

This equipment complies with IC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance 20cm between the radiator & your body. LE-LAN devices are restricted to indoor operation only in the band 5150-5250 MHz.

Frequently Asked Questions

- Q: What is the power requirement for the device?
 - A: The device operates on 3.3V with a power consumption of 8W.
- Q: Where can I find information on antenna compatibility?
 - A: Refer to the antenna specification list provided in the manual for certified antennas compatible with the module.
