Description

LevelOne USB Fast Ethernet Adapter allows you to connect to the internet easily through the built-in port on your laptop. This is an ideal solution for MacBook Air or other computers that may have wireless built-in but don't come with an Ethernet port. Sometimes you need to physically connect to a network cable to help transfer files or access secure information. USB-0301 easily does the job, all through your USB port. USB-0301 is USB 1.0, 1.1, and 2.0 compliant. It also follows the Ethernet standards set by the IEEE 802.3 and 802.3u, allowing you to take advantage of the Fast Ethernet speeds of up to 100 Mbps. This provides a strong backbone for any high-speed broadband connection to the internet as well as fast speeds for the Local Area Network file transfers.
