Buttons Actions

Overview

Review/Mark button
Press to enter REVIEW mode and then press again to advance through the min/max temperatures. This action also places an inspection mark in the log if RECORDING is active. This validates your twice daily temperature logs.

Start/Clear/Stop button
Press to start recording
Press to Stop recording
Press to exit day summary

Downloading data

- The first thing we want to do before we download data from the VFC400 is stop the data logger from logging temperatures.
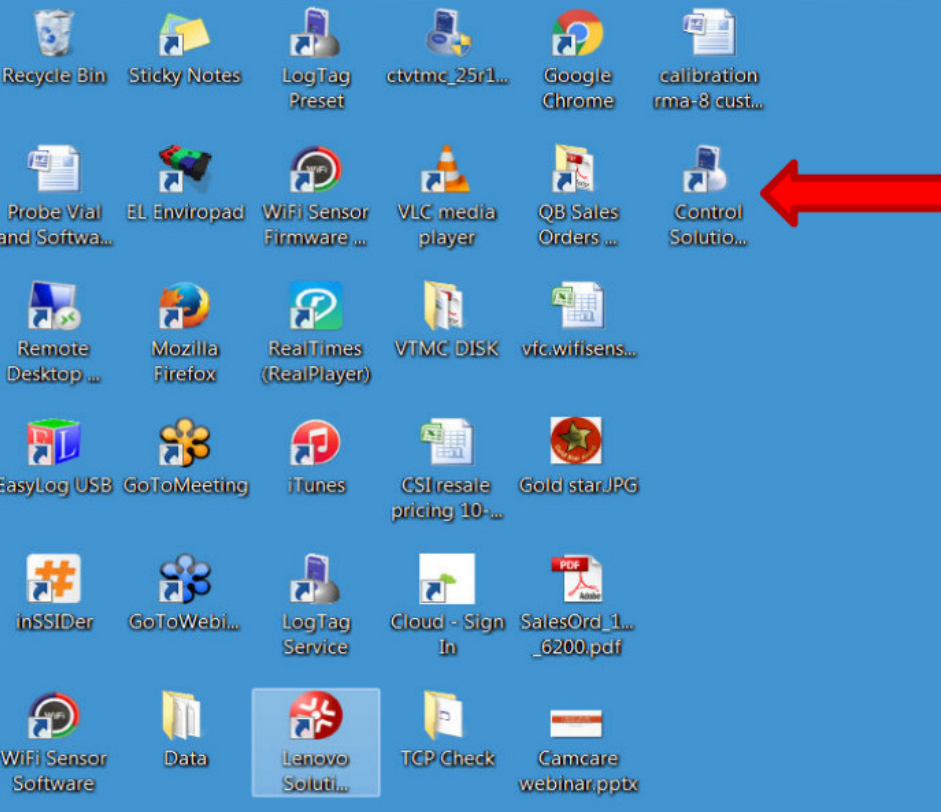

Downloading data
Stopping the data logger

When it is time to download the data from the data logger we suggest stopping the logger. To accomplish this you hold down the Start/Clear/Stop button for 1-2 seconds. The word STOPPED will appear on the screen as shown on the top left picture. The REC symbol will disappear after 1-2 seconds and you take your finger off the button quickly.

The logger will stop and the screen will only say STOPPED and show the number of days collected.

Downlaoding data

At your PC open up the Control Solutions VTMC software by double clicking on the Icon.

VFC400 Data Logger Configuration

- Plug your Docking Station into the USB port of your PC
- Insert data logger into the Docking Station firmly

Note: Make sure to download your data from your data logger prior to configuring/re-configuring as this will erase any and all data stored on your data logger.
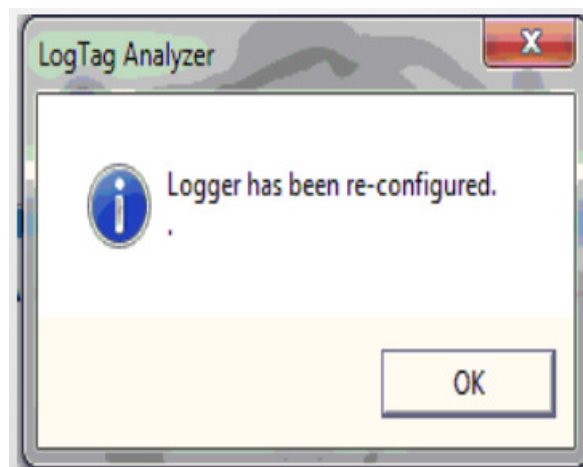

Docking Station

Downloading data

- After you insert the logger into the docking station you will see the following message:

A new LogTag has been detected in the interface. Please wait while its readings are downloaded.
There are 1 remaining LogTag(s) to download.

Cancel

A few seconds later the chart/data will pop-up on the screen and then the following message:

Click OK in the box and remove the data logger from the docking station.

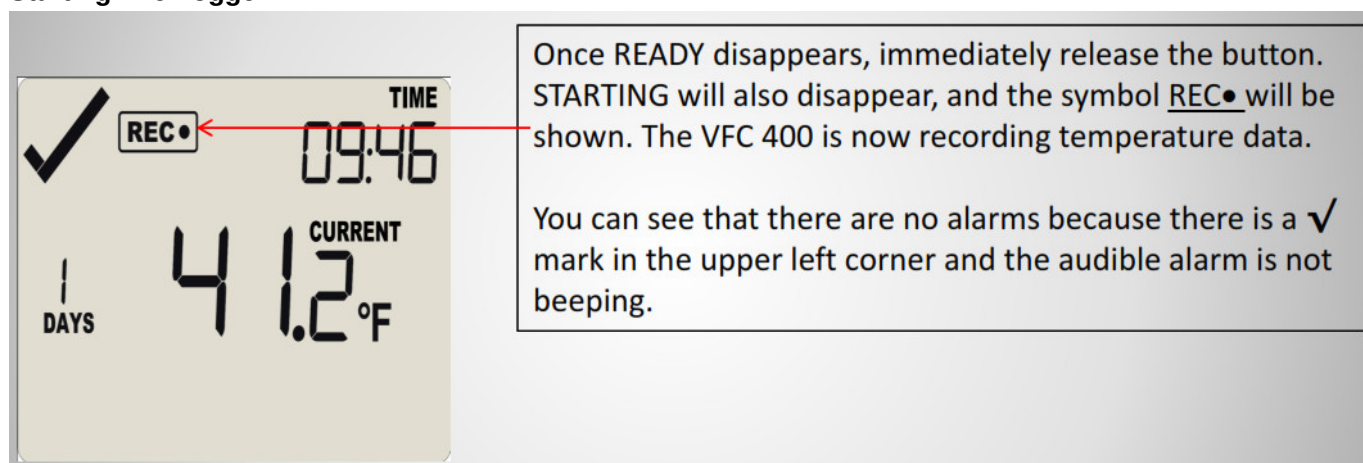

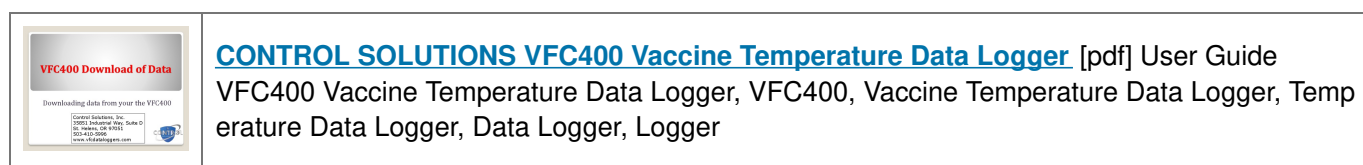

LogTag Analyzer

Logger has been re-configured.

OK

Starting The Logger

Recorder in *READY* mode

TIME
09:16
READY

The logger is now ready to start.
In Ready mode the recorder displays the time and the READY icon.

STARTING **TIME**
09:16
READY

To Start: Press and hold the Start/Clear/Stop button. First, STARTING is displayed in addition to READY. Then READY disappears.

Downlaoding data
Starting The Logger

✓ **REC•** **TIME**
09:46

CURRENT
41.2°F

1
DAYS

Once READY disappears, immediately release the button. STARTING will also disappear, and the symbol REC• will be shown. The VFC 400 is now recording temperature data.

You can see that there are no alarms because there is a ✓ mark in the upper left corner and the audible alarm is not beeping.
