Introduction

The CSR Bluetooth chipset technology offers a quick, effective, steady signal and low-latency, allowing you to move up to 50 feet (15 meters) away from your connected device while wearing headphones. Additionally, it allows us to simultaneously connect to two devices for music and calls. To satisfy your voice communication needs, an advanced CVC6.0 noise-canceling microphone would block out the noise in your vicinity and pick up your speech clearly and loudly.

Dual Microphone & Crystal Sound: Wireless Headphones offer dual-microphone boom technology, which blocks out the background noise and lets you concentrate on your meetings or music. Your voice would be more clearly and loudly captured by the detachable pole microphone. You can feel every low, mid, and high that the 40mm unit's speakers produce because to the boomy and roomy soundstage, which reproduces a wide variety of frequencies. The Bluetooth Headset is made to be as comfortable as possible. High-quality soft memory-protein memory foam earpads provide a gentle seal over the ears to block out outside noise, making the headset comfortable to use for extended periods of time without feeling heavy on your head or ears. With the multifunction button, you may redial, answer, reject, end, or transfer calls. The "+" and "-" buttons let you change the volume.

FAQ's

• What kind of headphones wears Ronaldo?

Ronaldo has partnered with Real Madrid's top player to develop his new Live Life Loud collection of headphones. Head Monster, who has the formal title "Head Monster," claims that "We didn't select Cristiano Ronaldo, he chose us." Lee, Noel

• Do Havit earphones work well?

The most comfortable wireless headphones I've ever tested are the Havit G1 earbuds, hands down! The Havit G1 Wireless headphones are fantastic, and I've been using them for the past three weeks. The G1 has exceeded all of my expectations, which is an uncommon occurrence for a device.

• What about Doqaus headphones?

High grade black rubber is used to create the DOQAUS Bluetooth headphones, which have a fashionable appearance and are quite durable. It may be your buddy in the DJ booth if you wish because it is strong enough to withstand daily use.

• How long does it take Zihnic headphones to charge?

The headset needs two to two and a half hours to fully recharge. You might recharge the battery.

• How are Havit earbuds charged?

The Havit I93 can be charged with a micro-USB connection, but you can also connect a conventional USB cable to it to use it as a power bank. The box should be able to fully recharge both earphones 8,5 times if you simply use it to charge your headphones.

• My havit TW916 won't charge.

The Havit TW916 True Wireless Stereo Earbuds have a smart storage box that also serves as a charging station. There is a charging cable input located underneath the unit.

• Why won't my Doqaus earbuds work?

The headphones need to be revived in some unpredictable circumstances because they are disorganized. Please hit the Reset button within the jack using a pin or any tiny object that may be inserted. Then, kindly switch the headphones back on. In case there is no electricity, please charge first.

- **Is Doquas a reliable name?**

Although the brand of these headphones isn't the most well-known in the world, they nonetheless have a large following on Amazon, where they have received a whopping 4,800 reviews with an average star rating of 4.4 out of 5. Customers said they give "good sound quality and comfortable fit" and are "great for the price."

- **Have Zihnic headphones a microphone?**

Superior Built-in microphone with CSR technology and Bluetooth 5.0: A built-in microphone on the Zihnic headset guarantees greater sound quality for hands-free calls.

- **How can I activate my Havit earbuds?**

Turn on, connect with Bluetooth. Remove the earphones from the charging case using method 1. Method 2: To turn on the earphones if they are off outside of the case, press and hold the MFB button on both sides for three seconds. Activate the two earphones.
