## Description

The EcoFlex multi-point lock platform, including Corbin Russwin Access 600 and SE LP10 Integrated Wired multi-point locks, is now available with internal end-of-line resistors for comprehensive monitoring of the circuit between the access control panel and lock. Integrating the end-of-line resistors into the lock not only eliminates the risk of undetected tampering, but reduces installation costs, simplifies specification, and offers the assurance of a factory installed and tested product.

## EAC Resistor Configurations
