COREL IDRAW Standard 2024 Graphic Design Software

Specifications

- **Product:** CorelDRAW Standard 2024
- **System Requirements:** Windows OS
- **Serial Key:** Required for installation
- **Installation Method:** Download from Amazon Software Library
- **License Agreement:** Allows installation on one computer/electronic device

Product Usage Instructions

- Close all applications and virus detection programs. Restart Windows for smooth installation.
- Download the product from your Amazon Software Library.
- Follow the installation wizard instructions.
- A serial key is required for CorelDRAW Standard installation. Obtain the key from Your Software Library in your Amazon account.
- To check if your system is 64-bit, go to Start > Settings > System > About.
- Under Device specifications, look for a System type.

Product Registration

- Sign in with your Corel.com account using the serial key for registration and access to online services.
- If offline, you can access the main product features. For online content, a periodic internet connection is recommended for updates.

FAQ

- How do I contact customer support?
- For assistance, contact Corel Customer Support at corelhelp@corel.com or 1-844-759-9903.
- Where can I get additional information and support?
- Refer to the FAQ document for common questions. For more resources, explore Corel's learning materials.

Support & resources

NOTE: Learning resources are based on the full version of CorelDRAW Graphics Suite and may demonstrate tools and features not available in CorelDRAW Standard.

Installation prep checklist

- Make sure that your system's date and time are set correctly.
- Make sure that your system has the latest updates installed.
- Close all applications, including all virus detection programs and applications that are open in the system tray or on the Windows taskbar. Not doing so may increase the installation time and interfere with the installation.
- Log in as a user with administrative privileges.
- Make sure that you have enough free disk space available on the drive where you want to install the application.
- For Windows users, delete the contents of the system's TEMP folders to avoid file and memory conflicts. To

navigate to the Temp folders, type %temp% in the Search box on the Windows 11 or Windows 10 Start menu.

- Make sure that your system is connected to the Internet.
- Install CorelDRAW Standard 2024 in its own directory to avoid conflicts with previous versions.

Installation

What are the system requirements?

- Windows 11 or Windows 10 (Version 21H2 or later), 64-bit, with the latest Updates
- Intel Core i3/5/7/9 or AMD Ryzen 3/5/7/9/Threadripper, EPYC
- 8 GB RAM
- 3 GB hard disk space for application and installation files
- Mouse, tablet or multi-touch screen
- 1280 x 720 screen resolution at 100% (96 dpi)
- For optimal performance, ensure you have the latest device drivers provided by the manufacturer
- An Internet connection is required to install and authenticate
- CorelDRAW Standard and access some of the included software components, online features, and content Installation,

How do I install CorelDRAW Standard?

1. Close all applications, including all virus detection programs. For smooth installation, we recommend that you restart Windows. This action will ensure that no restart is required by the latest system updates, and there are no memory issues.
2. Download the product from your Amazon Software Library.
3. Once in the installation wizard, follow the instructions for installing the software.

Note: To authenticate this product you must register your serial key. Please see the instructions below.

Do I need a serial key?

- Yes, a serial key is required for the installation of CorelDRAW Standard. Your serial key will be in [Your Software Library](#) within your Amazon account.

Can I install CorelDRAW Standard on more than one system?

- You have permission to use one (1) copy of this software on one (1) computer or electronic device at any given time, as set out in the End User License Agreement.
- Please visit the [Corel EULA](#) to learn more about a “Second Computing Device.”

How do I check if my system is 64-bit?

1. Select the Start button, then select Settings > System > About.
2. At the right, under Device specifications, see System type.

How do I register my product with Corel?

Signing in gives you access to important online services and content. You will need your serial key to complete your registration.

- You can register from within your program. Upon installing the program, you should be prompted to register online.
- You will need to create a Corel account (if you don't already have one). Enter your serial key to complete the registration process.
- You can also register your product at a later date. Go to <https://www.corel.com/corel/account/registerProduct.jsp> and log in or create your Corel account.
- Enter your serial key to complete the registration process.

Troubleshooting

I don't always have an Internet connection available.

How do I use product features, and can I access online content?

- As long as you have activated your product by signing in with your [Corel.com](https://www.corel.com) account, you have access to all main product features even if you are offline. To access some of the included software components, online features, and content, you must be online and authenticated. For best results, it's recommended that you access an Internet connection once a month for system updates.

How do I turn off popup ads in CorelDRAW?

- To turn off the popup ads, go to Help > Message Settings. Uncheck one or both of the first two options for product related messages and updates, as you prefer. In the tray notifications drop-down list, select Do not

show me tray messages for this application.

How do I change the language of the user interface and Help?

1. Click Tools > Options > Global.
2. Click General.
3. Choose a language from the User interface language list box. If you want to change the language of the user interface and Help when you start the application, enable the Ask me the next time the application starts check box.
4. Restart the application.

If there is only one language available in the User interface language list box, you must first install the additional languages that you want. For more information, see “How do I modify or repair a CorelDRAW Standard installation?”.

How do I modify or repair a CorelDRAW Standard installation?

1. Close all applications.
2. On the Windows Control Panel, click Uninstall a program.
3. Double-click the suite's name on the Uninstall or change a program page.
4. Enable the Modify option or the Repair option in the wizard that appears and follow the instructions.

Program features and utilities that are already installed may not appear in the wizard, or their checkboxes may appear disabled. Product languages can be selected on the last page of the wizard. Certain features, such as Copy installation files, cannot be added by modifying your installation.

Additional questions?

Still can't find the answer you're looking for?

Our product experts would be happy to assist you. Please reach out to the Corel Customer Support team using the contact information provided below.

NOTE: Please be advised not all components are available in all versions of the software.
